ADMINISTRATION) REGULATIONS, 2006**

**ARRANGEMENT OF REGULATIONS**

*Regulation*

**PART I—PRELIMINARY**

1. Title and commencement
2. Interpretation
3. Application

**PART II—AIR OPERATOR CERTIFICATE (AOC)**

4. Compliance with an air operator certificate
5. Application for an air operator certificate
6. Issuance of air operator certificate
7. Contents of air operator certificate.
8. Duration and renewal of an air operator certificate
9. Amendment of an air operator certificate
10. Access for inspection
11. Conducting tests and inspections

**PART III—AIR OPERATOR CERTIFICATION AND  
CONTINUED VALIDITY**

12. Base of operations
13. Management personnel required for commercial air transport operations
14. Qualification of personnel

*Regulation*

15. Company procedures indoctrination
16. Quality system
17. Submission and revision of policy and procedure manuals
18. Retention and maintenance of personnel and other records
19. Inspection of personnel and other records
20. Flight recorders records
21. Aircraft record
22. Authorised aircraft
23. Dry leasing of foreign registered aircraft.
24. Aircraft interchange
25. Wet-leasing of aircraft

26. Emergency evacuation demonstration
27. Demonstration flights
28. Facilities
29. Operations schedule

#### PART IV—AOC FLIGHT OPERATIONS MANAGEMENT

30. Operations manual
31. Training programmes
32. Aircraft operating manual
33. AOC holder's journey log
34. Designation of PIC
35. Required cabin crew members
36. Carriage of special situation passengers
37. Cockpit check procedure
38. Minimum equipment list and configuration deviation list
39. Performance planning manual
40. Performance data control system
41. Aircraft loading and handling manual
42. Mass and balance data control system
43. Cabin crew member manual
44. Passenger briefing cards
45. Aeronautical data control system.
46. Route guide and aeronautical charts
47. Weather reporting sources
48. De-icing and anti-icing programme
49. Flight supervision and monitoring system.

#### *Regulation*

50. Flight following system for charter flights operations
51. Communications facilities
52. Routes and areas of operation
53. Enroute navigational facilities
54. Flight safety documents systems
55. Safety management

#### PART V—AOC MAINTENANCE REQUIREMENTS

56. Maintenance responsibility
57. Approval and acceptance of AOC maintenance systems
58. Maintenance control manual
59. Maintenance management
60. Quality system: maintenance
61. Technical logbook
62. Technical logbook entries
63. Maintenance records
64. Release to service or maintenance section records of the technical logbook
65. Modification or repairs to aircraft
66. Aircraft maintenance programme
67. Maintenance, preventive maintenance and modifications

#### PART VI—AOC SECURITY MANAGEMENT

68. Security requirements

69. Security training programmes
70. Reporting acts of unlawful interference
71. Aircraft search procedure checklist
72. Security of the flight crew compartment

#### PART VII—AOC DANGEROUS GOODS MANAGEMENT

73. Approval to transport dangerous goods
74. Compliance with Technical Instructions
75. Limitations on the transport of dangerous goods
76. Classification of dangerous goods
77. Packing
78. Labelling and marking
79. Dangerous goods transport document

#### *Regulation*

80. Acceptance of dangerous goods
81. Inspection for damage, leakage or contamination
82. Removal of contamination
83. Loading restrictions
84. Provision of information
85. Training programmes
86. Dangerous goods incident and accident reports

#### PART VIII—GENERAL

87. Possession of the licence
88. Drug and alcohol testing and reporting
89. Inspection of licences and certificates
90. Change of name
91. Change of address
92. Replacement of documents
93. Certificate suspension and revocation.
94. Use and retention of documents and records
95. Reports of violation
96. Enforcement of directions
97. Aeronautical user fees
98. Application of Regulations to Government and visiting forces, etc.
99. Extra-territorial application of Regulations

#### PART IX—OFFENCES AND PENALTIES

100. Contravention of Regulations
101. Offences and penalties

#### PART X—EXEMPTION

102. Requirements for application
103. Substance of the request for exemption

#### *Review, publication and issue or denial of the exemption*

104. Initial review by the Authority

105. Evaluation of the request  
*Regulation*

PART XI—TRANSITION AND SAVINGS

106. Transition and savings

FIRST SCHEDULE—Operations Manual

SECOND SCHEDULE—Aircraft Operating Manual

THIRD SCHEDULE—Cabin Crew Manual

FOURTH SCHEDULE—Flight Safety Documents System

FIFTH SCHEDULE—Maintenance Control Manual

SIXTH SCHEDULE—Penalties

## STATUTORY INSTRUMENTS

2006 No. 55.

### **The Civil Aviation (Air Operator Certification And Administration) Regulations, 2006.**

*(Under sections 34(2) and 61 of the Civil Aviation Authority Act, Cap 354)*

IN EXERCISE of the powers conferred upon the Minister by sections 34(2) and 61 of the Civil Aviation Authority Act, and on the recommendation of the Civil Aviation Authority, these Regulations are made this 27th day of October, 2006.

#### PART I—PRELIMINARY

##### **1. Title and commencement**

These Regulations may be cited as the Civil Aviation (Air Operator Certification and Administration) Regulations, 2006 and shall come into force on the 1st day of January, 2008.

##### **2. Interpretation**

In these Regulations, unless the context otherwise requires—

- “accountable manager” means the manager who has corporate authority for ensuring that all operations and maintenance activities required by the air operator certificate (AOC) holder can be financed and carried out to the highest degree of safety standards required by the Authority;
- “aerial work” means an aircraft operation in which an aircraft is used for specialised services including, but not limited to, agriculture, construction, photography, surveying, observation and patrol, search and rescue and aerial advertisement;
- “aerodrome” means a defined area on land or water, including any buildings, installations and equipment, used or intended to be used either wholly or in part for the arrival, departure and surface movement of aircraft;
- “aeronautical product” means an aircraft, aircraft engine, propeller or subassembly, appliance, material, part or component to be installed thereon;
- “aeroplane” means a power-driven heavier-than-air aircraft, deriving its lift in flight chiefly from aerodynamic reactions on surfaces which remain fixed under given conditions of flight;
- “aircraft” means a machine that derives support in the atmosphere from the reactions of the air, other than the reactions of the air against the earth’s surface;
- “aircraft component” means any assembly, item component, part of an aircraft up to and including a complete engine or any operational or emergency equipment;
- “aircraft interchange” means an arrangement between two air operators in which the aircraft of the first air operator is crewed by the crew of the second operator at an interchange point linking their respective routes where operational control is transferred to the second operator for the period of the interchange;
- “aircraft technical log” means a document carried on board an aircraft for recording defects and malfunctions discovered during operation and for recording details of all maintenance carried out whilst the aircraft is operating between scheduled visits to the base maintenance facility; it also contains operating information relevant to flight safety and maintenance data that the operating crew needs to know;
- “aircraft type” means all aircraft of the same basic design;
- “airframe” means the fuselage, booms, nacelles, cowlings, fairings, airfoil surfaces, including rotors but excluding propellers and rotating airfoils of a powerplant and landing gear of an aircraft and their accessories and controls;

“air operator certificate (AOC)” means a certificate authorizing an operator to carry out specified commercial air transport operations;

“air traffic control (ATC)” means a service that promotes the safe, orderly, and expeditious flow of air traffic at aerodromes and during the approach, departure and en route environments;

“air traffic control (ATC) facility” means a building holding the persons and equipment responsible for providing ATC services;

“approved training organisation (ATO)” means an organisation established to conduct aviation training courses as approved by the Authority;

“appliance” means an instrument, mechanism, equipment, part, apparatus, appurtenance or accessory, including communications equipment, that is used or intended to be used in operating or controlling an aircraft in flight, is installed in or attached to the aircraft and is not part of an airframe, powerplant or propeller;

“approved maintenance organisation (AMO)” means an organisation approved to perform specific aircraft maintenance activities by the Authority;

“approved standard” means a manufacturing, design, maintenance or quality standard approved by the Authority;

“approved training” means training carried out under special curricula and supervision approved by the Authority;

“article” means any item, including but not limited to an aircraft, airframe, engine, propeller, appliance, accessory, assembly, subassembly, system, subsystem, component, unit, product or part;

“Authority” means the Civil Aviation Authority established under section 3 of the Civil Aviation Authority Act;

“avionics” means the electronics and electrical systems on aircraft and spacecraft such as the navigation, communications, flight data and control systems;

“balloon” means a non-power-driven lighter-than-air aircraft;

“cabin crew member manual” means a manual containing procedures, instructions and guidance for use by cabin crew members in the execution of their duties;

“calibration” means a set of operations, performed in accordance with a definite documented procedure, that compares the measurement performed by a measurement device or working standard for the

purpose of detecting and reporting or eliminating by adjustment errors in the measurement device, working standard or aeronautical product tested;

“cargo aircraft” means any aircraft carrying goods or property but not passengers; in this context the following are not considered to be passengers—

(a) a crew member;

(b) an operator’s employee permitted by and carried in accordance with the instructions contained in the operations manual;

(c) an authorised representative of the Authority; and

(d) a person with duties in respect of a particular shipment on board;

“certificate of release to service” means a certification made by an appropriately licensed or approved personnel relating to aircraft maintenance work that the work has been completed in a satisfactory manner in accordance with the requirements of the applicable regulations and Standards;

“check pilot” means a pilot approved by the Authority who has the appropriate training, experience and demonstrated ability to evaluate and certify to the knowledge and skills of other pilots;

“Contracting State” means a State that is signatory to the Convention on International Civil Aviation (Chicago Convention);

“course” means a programme of instruction to obtain a license, rating, qualification, authorisation or currency;

“dangerous goods incident” means an occurrence, other than a dangerous goods accident, associated with and related to the transport of dangerous goods, not necessarily occurring on board an aircraft, which results in injury to a person, property damage, fire, breakage, spillage, leakage of fluid or radiation or other evidence that the integrity of the packaging has not been maintained; any occurrence relating to the transport of dangerous goods which seriously jeopardises an aircraft or its occupants is deemed to constitute a dangerous goods incident;

“dangerous goods transport document” means a document specified by the ICAO Technical Instructions for the Safe Transportation of Dangerous Goods by Air, and completed by the person who offers dangerous goods for air transport and contains information about those dangerous goods;

“dry lease” means a contractual arrangement where the leased aircraft is operated by flight crew members of the lessee;

“facility” means a physical plant, including land, buildings and equipment, which provides the means for the performance of maintenance, preventive maintenance or modifications of any article;

“flight crew member” means a licensed crew member charged with duties essential to the operation of an aircraft during flight time;

“flight duty period” means the total time from the moment a flight crew member commences duty, immediately subsequent to a rest period and prior to making a flight or a series of flights, to the moment the flight crew member is relieved of all duties having completed such flight or series of flights;

“flight plan” means specified information provided to air traffic services units, relative to an intended flight or portion of a flight of an aircraft;

“flight safety documents system” means a set of inter-related documentation established by the operator, compiling and organizing information necessary for flight and ground operations and comprising, as a minimum, the operations manual and the operator’s maintenance control manual;

“flight time” means the total time from the moment an aircraft first moves under its own power for the purpose of taking off until the moment it comes to rest at the end of the flight;

“freight container” means an article of transport equipment for radioactive materials, designed to facilitate the transport of such materials, either packaged or unpackaged, by one or more modes of transport;

“glider” means a non-power-driven heavier-than-air aircraft, deriving its lift in flight chiefly from aerodynamic reactions on surfaces, which remain fixed under given conditions of flight;

“ground handling” means services necessary for arrival of aircraft at, and departure from, an airport, other than air traffic services;

“handling agent” means an agency which performs on behalf of the operator some or all of the latter’s functions including receiving, loading, unloading, transferring or other processing of passengers or cargo;

“heavier-than-air aircraft” means an aircraft deriving its lift in flight chiefly from aerodynamic forces;

“helicopter” means a heavier-than-air aircraft supported in flight chiefly by the reactions of the air on one or more power-driven rotors on substantially vertical axis;

“holdover time” means the estimated time de-icing or anti-icing fluid will prevent the formation of frost or ice and the accumulation of snow on the protected surfaces of an aircraft; holdover time begins when the final application of de-icing or anti-icing fluid commences and expires when the de-icing or anti-icing fluid applied to the aircraft loses its effectiveness;

“inspection” means the examination of an aircraft or aircraft component to establish conformity with a standard approved by the Authority;

“instrument approach” means an approach procedure prescribed by the Authority having jurisdiction over the aerodrome;

“interchange agreement” means a leasing agreement which permits an air carrier to dry lease and take or relinquish operational control of an aircraft to or from another air operator at an airport for a limited duration;

“journey log” means a form signed by the pilot in command of each flight that records the aircraft’s registration, crew member names and duty assignments, the type of flight, and the date, place and time of arrival and departure;

“lighter-than-air aircraft” means an aircraft supported chiefly by its buoyancy in the air;

“maintenance” means tasks required to ensure the continued airworthiness of an aircraft or aircraft components including any one or combination of overhaul, repair, inspection, replacement, modification and defect rectification;

“maintenance control manual” means a manual containing procedures, instructions and guidance for use by maintenance and concerned operational personnel in the execution of their duties;

“major modification” means a type design change not listed in the aircraft, engine or propeller specifications that might appreciably affect the mass and balance limits, structural strength, performance, powerplant operation, flight characteristics or other qualities affecting airworthiness or environmental characteristics or that will be embodied in the product according to non-standard practices;

“major repair” means a repair of an aeronautical product that might appreciably affect the structural strength, performance, powerplant, operation flight characteristics or other qualities affecting airworthiness or environmental characteristics or that will be embodied in the product using non-standard;

- “minimum equipment list (MEL)” means a list approved by the Authority which provides for the operation of aircraft, subject to specified conditions, with particular equipment inoperative, prepared by an operator in conformity with or more restrictive than, the master minimum equipment list established for the aircraft type by the aircraft manufacturer, and approved by the state of design;
- “modification” means a change to the type design of an aircraft or aeronautical product which is not a repair;
- “night” means the time between 15 minutes after sunset and 15 minutes before sunrise, sunrise and sunset being determined at surface level and includes any time between sunset and sunrise when an unlighted aircraft or other unlighted prominent object cannot clearly be seen at a distance of 4,572 metres;
- “operator” means a person, organisation or enterprise, engaged in or offering to engage in an aircraft organisation;
- “operational control” means the exercise of authority over the initiation, continuation, diversion or termination of a flight in the interest of the safety of the aircraft and the regularity and efficiency of the flight;
- “operational flight plan” means the operator’s plan for the safe conduct of the flight based on considerations of aircraft performance, other operating limitations and relevant expected conditions on the route to be followed and at the aerodromes or heliports concerned;
- “operations manual” means a manual containing procedures, instructions and guidance for use by operational personnel in the execution of their duties;
- “operations specifications” means a document that contains terms, authorisations, conditions and limitations that facilitate the Authority’s administration of the AOC by ensuring that the Authority and the certificate holder have a mutual and clear understanding of how the certificate holder will conduct its operations;
- “overhaul” means the restoration of an aircraft or aircraft component using methods, techniques and practices acceptable to the Authority, including disassembly, cleaning and inspection as permitted, repair as necessary, and reassembly; and testing in accordance with approved standards and technical data or in accordance with current standards and technical data acceptable to the Authority, which have been developed and documented by the state of design, holder of the type certificate, supplemental type certificate or a material, part, process or appliance approval under parts manufacturing authorisation (PMA) or technical standard order (TSO);
- “overpack” means an enclosure used by a single shipper to contain one or more packages and to form one handling unit for convenience of handling and stowage;

“package” means the complete product of the packing operation consisting of the packaging and its contents prepared for transport;

“packaging” means receptacles and any other components or materials necessary for the receptacle to perform its containment function and to ensure compliance with the packing requirements;

“pilot in command (PIC)” means the pilot responsible for the operation and safety of the aircraft during flight time;

“pre-flight inspection” means the inspection carried out before flight to insure that the aircraft is fit for the intended flight;

“propeller” means a device for propelling an aircraft that has blades on a powerplant driven shaft and that, when rotated, produces by its action on the air, a thrust approximately perpendicular to its plane of rotation and it includes control components normally supplied by its manufacturer, but does not include main and auxiliary rotors or rotating airfoils of powerplants;

“proper shipping name” means the name to be used to describe a particular article or substance in all shipping documents and notifications and where appropriate, on packaging;

“repair” means the restoration of an aircraft or aircraft component to a serviceable condition in conformity with an approved standard;

“rest period” means a period free of all restraint, duty or responsibility for a flight crew member of an AOC holder conducting commercial air transport operations;

“safety programme” means an integrated set of regulations and activities aimed at improving safety;

“safety management system” means a systematic approach to managing safety, including the necessary organisation structures, accountabilities, policies and procedures;

“satellite” means a satellite ATO at a location other than primary location of the ATO;

“secondary standards” means a standard maintained by comparison with a primary standard;

“signature” means an individual’s unique identification used as a means of authenticating a maintenance record entry or maintenance record; a signature may be hand-written, electronic or any other form acceptable to the Authority;

“state of design” means the Contracting State which approved the original type certificate and any subsequent supplemental type certificates for

an aircraft or the State which approved the design of an aeronautical product or appliance;

“state of manufacture” means the Contracting State, under whose authority an aircraft was assembled, approved for compliance with the type certificate and all extant supplemental type certificates, test flown and approved for operation; the state of manufacture may also be the state of design;

“state of origin” means the state in which dangerous goods were first loaded on an aircraft;

“state of registry” means the Contracting State on whose registry an aircraft is entered;

“substance” means alcohol, sedatives, hypnotics, anxiolytics, hallucinogens, opioids, cannabis, inhalants, central nervous system stimulants such as cocaine, amphetamines and similarly acting sympathomimetics, phencyclidine or similarly acting arylcyclohexylamines and other psychoactive drugs and chemicals;

“substance abuse” refers to—

- (a) the use of a substance in a situation in which that use was physically hazardous, if there has been at any other time an instance of the use of a substance also in a situation in which that use was physically hazardous;
- (b) a verified positive drug test result acquired under an anti-drug programme or internal programme of the Uganda government; or
- (c) misuse of a substance that the Authority, based on case history and qualified medical judgement relating to the substance involved, makes the applicant unable to safely perform the duties or exercise the privileges of the certificate applied for or held or may reasonably be expected, for the maximum duration of the medical certificate applied for or held, to make the applicant unable to perform those duties or exercise those privileges;

“substance dependence” means a condition in which a person is dependent on a substance, other than tobacco or ordinary xanthine-containing (e.g., caffeine) beverages, as evidenced by increased tolerance; manifestation of withdrawal symptoms; impaired control of use; or continued use despite damage to physical health or impairment of social, personal or occupational functioning;

“technical instructions” means the latest effective edition of the Technical Instructions for the Safe Transport of Dangerous Goods by Air (Doc. 9284-AN/905), including the supplement and any addendum, approved and published by decision of the Council of the ICAO;

“technical log” means a document carried on an aircraft that contains information to meet ICAO requirements; a technical log contains two independent sections- a journey record section and an aircraft maintenance record section;

“training programme” means a programme that consists of courses, courseware, facilities, flight training equipment and personnel necessary to accomplish a specific training objective; it may include a core curriculum and a specialty curriculum;

“training to proficiency” means the process of the check pilot administering each prescribed manoeuvre and procedure to a pilot as necessary until it is performed successfully during the training period;

“unit load device” means a type of aircraft container, aircraft pallet with a net, or aircraft pallet with a net over an igloo;

“wet lease” means a contractual arrangement where the leased aircraft is operated by flight crew members of the lessor;

“working standard” means a calibrated standard that is used in the performance of maintenance or calibrations in any work area for the purpose of forming the basis for product acceptance or for making a finding of airworthiness approval for return to service to an aircraft or aircraft component; a working standard may be maintained by comparison with primary standards, secondary standards, reference standards or transfer standards, as appropriate but shall not to be used to test, measure or calibrate other working standards or measurement devices.

### **3. Application**

(1) These Regulations apply to air operators carrying passengers, cargo or mail for remuneration or hire whose principal place of business or permanent residence is located in Uganda.

(2) Except where specifically noted, these Regulations shall apply to all commercial air transport operations by air operator certificate holders for which Uganda is the state of the operator.

## **PART II—AIR OPERATOR CERTIFICATE (AOC)**

### **4. Compliance with an air operator certificate**

(1) An operator shall not engage in commercial air transport operations unless that operator holds a valid air operator certificate (AOC) issued by the Authority.

(2) An AOC referred to in sub-regulation (1) shall authorize the operator to conduct commercial air transport operations in accordance with the conditions and limitations that may be specified in the AOC.

(3) The issue of an AOC by the Authority shall be dependent upon the operator demonstrating an adequate organization, method of control and supervision of flight operations, training programme and maintenance arrangements consistent with the nature and extent of the operations specified.

#### **5. Application for an air operator certificate**

(1) An operator applying to the Authority for an AOC shall submit an application—

- (a) on a form and manner prescribed by the Authority; and
- (b) containing any other information the Authority requires the applicant to submit.

(2) Except for the operations manual specified in regulation 30 and the maintenance control manual specified in regulation 58 which shall be submitted at least 90 days before the date of intended operation, an applicant shall make the application for an initial issue or reissue of an AOC at least 60 days before the date of the intended operation.

#### **6. Issuance of air operator certificate**

(1) The Authority may issue an air operator certificate (AOC) to an applicant if the applicant—

- (a) has a principal place of business and it is registered in Uganda;
- (b) meets the applicable regulations and standards for the holder of an AOC;
- (c) is properly qualified and adequately staffed and equipped to conduct safe operations in commercial air transport and maintenance of the aircraft;
- (d) holds a valid air service license issued under the Civil Aviation (Licensing of Air Services) Regulations; and
- (e) has met any other requirements as specified by the Authority.

(2) The Authority may refuse to issue an air operator certificate if—

- (a) the applicant does not meet the requirements specified in sub-regulation (1);
- (b) the applicant previously held an AOC which was revoked;
- (c) the applicant is not suitable by reason of previous conduct and experience to properly maintain an AOC; or

(d) an individual who has previously contributed to the circumstances that caused the revocation of an AOC obtains a substantial ownership in the applicant organization or is employed in a position specified by these Regulations.

**7. Contents of air operator certificate**

(1) An air operator certificate (AOC) certificate shall consist of—

(a) a certificate for public display issued by the Authority; and

(b) operation specifications containing the terms and conditions applicable to the certificate.

(2) The certificate specified in (1) subregulation (a) shall contain—

(a) a certificate number specifically assigned to the AOC;

(b) name and location of the main place of business of the AOC; and

(c) date of issue and period of validity.

(3) Operation specifications shall contain—

(a) a certificate number specifically assigned to the AOC;

(b) a description of the type of operations authorised;

(c) the type of aircraft authorised for use;

(d) the authorised areas of operations; and

(e) other special authorisations, approvals and limitations issued by the Authority in accordance with the standards which are applicable to the operations and maintenance conducted by the AOC holder.

**8. Duration and renewal of an air operator certificate**

(1) An air operator certificate (AOC) issued by the Authority shall be valid for 12 months from the date of issue or renewal, unless a shorter period is specified by the Authority or—

(a) the Authority amends, suspends, revokes or otherwise terminates the certificate;

(b) an AOC holder surrenders the certificate to the Authority; or

(c) the Authority establishes that the air operator has suspended operations for more than 60 continuous days; or

(d) the AOC holder notifies the Authority of the suspension of operations.

(2) Where the Authority suspends an air operator certificate, the AOC holder shall return that certificate to the Authority.

(3) An application for renewal of an AOC shall be made on a form prescribed by the Authority not later than 60 days before the certificate expires.

(4) An applicant for an AOC which has expired shall make an initial application.

#### **9. Amendment of an air operator certificate**

(1) The Authority may amend an air operator certificate (AOC) if the—

(a) Authority determines that the amendment is necessary for the safety in commercial air transport and in public interest; or

(b) AOC holder applies for an amendment, and the Authority determines that the amendment is necessary for safety in commercial air transport and in the public interest.

(2) Where the Authority stipulates in writing that an emergency exists requiring the immediate amendment of the AOC in the public interest with respect to safety in commercial air transportation, such an amendment is effective on the date the AOC holder receives notice of the amendment.

(3) An AOC holder shall operate in accordance with the amendment unless it is subsequently withdrawn.

(4) An amendment stipulated by the Authority, other than an emergency amendments, shall become effective 30 days after notice is issued to the AOC holder.

(5) An amendment proposed by the AOC holder shall be made at least 30 days prior to the intended date of any operation under that amendment.

(6) A person shall not perform a commercial air transport operation for which an AOC amendment is required, unless that person has received notice of the approval from the Authority.

#### **10. Access for inspection**

(1) An air operator certificate (AOC) holder shall for the purpose of inspection—

(a) grant the Authority unrestricted access to any of its organisations, facilities and aircraft;

(b) ensure that the Authority is granted unrestricted access to any organisation or facilities that it has contracted for services associated with commercial air transport operations and maintenance for services; and

(c) grant the Authority unrestricted access to the cockpit of the aircraft during flight operations.

(2) An AOC holder shall provide to the Authority a forward observer's seat on the AOC holder's aircraft from which the flight crew's actions and conversations may be easily observed.

(3) Where the seat specified in sub-regulation (2) is not suitable for purposes of inspection, the suitability of the seat location and the ability to monitor crew member actions, conversations and radio communications shall be determined by the Authority.

#### **11. Conducting tests and inspections**

(1) The Authority shall conduct surveillance on the air operator certificate (AOC) holder to ensure continued eligibility to hold an AOC and associated approvals.

(2) An AOC holder shall allow the Authority to conduct tests and inspections, at any time or place, to determine whether the AOC holder is complying with the applicable laws, regulations and the terms and conditions of the AOC.

(3) An AOC holder shall make available at its principal base of operations the current—

(a) AOC and its operation specifications;

(b) operations and maintenance manuals; and

(c) a list that includes the location and individual positions responsible for each record, document and report required to be kept by the AOC holder under the applicable regulations or standards.

(4) Upon failure by an AOC holder to make available to the Authority upon request, any document, certificate or report, the Authority may suspend the AOC or any of its operation specifications.

### **PART III—AIR OPERATOR CERTIFICATION AND CONTINUED VALIDITY**

#### **12. Base of operations**

(1) An air operator certificate (AOC) holder shall maintain a principal base of operations in Uganda.

(2) An AOC holder shall submit written notification to the Authority, to establish or change the location of a principal base of operation at least 30 days before the proposed change.

#### **13. Management personnel required for commercial air transport operations**

(1) An air operator certificate (AOC) holder shall have an accountable manager, acceptable to the Authority, with authority to ensure that all operations and

maintenance activities are financed and carried out to the highest safety standards required by the Authority.

(2) When conducting commercial air transport operations, the AOC holder shall have qualified personnel, with proven competence in civil aviation, available and serving in the following positions or their equivalent—

- (a) Director of Operations;
- (b) Chief Pilot;
- (c) Director of Maintenance;
- (d) Quality Manager; and
- (e) Director of Safety.

(3) For the purposes of sub-regulation (2) “competency in civil aviation” means that an individual has a technical qualification and management experience acceptable to the Authority for the position served.

(4) The Authority may approve positions, other than those listed, if the AOC holder shows that it can perform the operation safely under the direction of fewer or different categories of management personnel due to the—

- (a) kind of operations involved;
- (b) number of aircraft used; and
- (c) area of operation.

(5) An AOC holder shall—

- (a) state in the general policy provisions of the operations manual required by these Regulations, the duties, responsibilities, and authority of personnel required under sub-regulation (2);
- (b) list in the manual, the names and business addresses of the individuals assigned to those positions; and
- (c) notify the Authority within 10 days of any change in personnel or any vacancy in any position listed.

(6) An AOC holder shall make arrangements to ensure continuity of supervision if operations are conducted in the absence of any required management personnel.

(7) Required management personnel shall be contracted to work sufficient hours, to ensure that the management functions of the AOC holder are fulfilled.

(8) A person serving in a required management position for an AOC holder shall not serve in a similar position for any other AOC holder, unless an exemption is issued by the Authority.

#### **14. Qualification of personnel**

(1) The accountable manager shall possess the following qualifications—

- (a) a background in the management of commercial air transport operations;
- (b) knowledge of these Regulations and other regulations and materials published by the Authority that are applicable to flight operations and aircraft maintenance; and
- (c) knowledge of the operations and aircraft maintenance requirements of the air operator certificate (AOC) holder.

(2) The minimum qualifications for a director of operations are—

- (a) an airline transport pilot licence; and
- (b) 3 years experience as PIC in commercial air transport operations of large aircraft.

(3) The minimum qualifications for a chief pilot are—

- (a) an airline transport pilot licence with the appropriate ratings for at least one of the aircraft used in the AOC holder's operations;
- (b) 3 years experience as PIC in commercial air transport operations; and
- (c) a commercial pilot licence with instrument rating in lieu of the airline transport pilot licence if the PIC requirements for the operations conducted require only a commercial pilot licence.

(4) The minimum qualifications for a director of maintenance are—

- (a) a licensed maintenance engineer with appropriate airframe, powerplant and avionics ratings; and
- (b) three years experience in maintaining the same category and class of aircraft used by the AOC holder including one year in the capacity of returning aircraft to service.

(5) The minimum qualifications for quality manager are—

- (a) a technically qualified person in the field of aircraft maintenance or flight or ground operations;
- (b) at least three years experience in the field of aircraft maintenance, flight or ground operations; and
- (c) must have successfully completed a training in quality management recognized by the Authority.

(6) The minimum qualifications for director of safety are—

- (a) a technically qualified person in the field of aircraft maintenance or flight operations;
- (b) at least 5 years experience in the field of aircraft maintenance or flight operations; and
- (c) must have successfully completed a training in safety management systems course recognized by the Authority.

(7) An AOC holder may approve the employment of a person who does not meet the appropriate qualification or experience if the Authority issues an exemption upon finding that that person has comparable experience and can effectively perform the required management functions.

#### **15. Company procedures indoctrination**

(1) A person shall not serve nor shall any air operator certificate (AOC) holder use a person as a quality manager or a director of maintenance unless that person has completed the company indoctrination curriculum approved by the Authority, which shall include a complete review of the operations manual and maintenance control manual procedures pertinent to their duties.

(2) An AOC holder shall ensure that the quality manager and the director of maintenance undergo company indoctrination training that covers the following areas-

- (a) AOC holder's organisation, scope of operation and maintenance, and administrative practices as applicable to their assignments and duties;
- (b) appropriate provisions of these Regulations and other applicable regulations and guidance materials;
- (c) AOC holder policies and procedures; and
- (d) appropriate portions of the AOC holder's operations manual and maintenance control manual.

#### **16. Quality system**

(1) An air operator certificate (AOC) holder shall establish a quality system and designate a quality manager to monitor compliance with, and adequacy of, procedures required to ensure safe operational practices and airworthy aircraft.

(2) Compliance monitoring in accordance with sub-regulation (1) shall include a feedback system to the accountable manager to ensure corrective action as necessary.

(3) An AOC holder shall ensure that each quality system established as required by sub-regulation (1) includes a quality assurance programme that contains

procedures designed to verify that all operations are being conducted in accordance with all applicable requirements, standards and procedures.

(4) The quality system, and the quality manager specified in sub-regulation (1) shall be acceptable to the Authority.

(5) An AOC holder shall describe the quality system in all relevant documentation.

(6) Notwithstanding sub-regulation (1), the Authority may accept the appointment of two quality managers, one for operations and one for maintenance, provided that the AOC holder has designated one quality management unit to ensure that the quality system is applied uniformly during the entire operation.

### **17. Submission and revision of policy and procedure manuals**

(1) A person who develops and maintains a manual required by these Regulations shall ensure that the manual—

(a) includes instructions and information necessary to allow the personnel concerned to perform their duties and responsibilities safely;

(b) is in a form that is easy to revise and contains a system which allows personnel to determine the current revision status of each manual;

(c) has a date of the last revision on each revised page;

(d) is not contrary to any applicable Laws of Uganda and the air operator certificate (AOC) holder's operations specifications; and

(e) includes a reference to the appropriate civil aviation regulations.

(2) A person shall not implement any policy or procedure for flight operations or airworthiness functions prior to approval or acceptance by the Authority as appropriate.

(3) An AOC holder shall submit the proposed policy or procedure to the Authority at least 30 days prior to the date of intended implementation.

### **18. Retention and maintenance of personnel and other records**

(1) An air operator certificate (AOC) holder shall maintain current records detailing the qualifications and training of all its employees and the employees of contractors involved in the operational control, flight operations, ground operations and maintenance of the air operator.

(2) An AOC holder shall maintain records for a minimum period of 2 years for those employees performing crew member or flight dispatch duties in sufficient detail to determine whether the employee meets the experience and qualification requirements for duties in commercial air transport operations.

(3) An AOC holder shall retain the following records for the period specified—

(a) flight and duty records, 2 years;

- (b) flight crew records, 2 years;
- (c) fuel and oil records, 3 months;
- (d) completed load manifests, 6 months;
- (e) mass and balance records, 6 months;
- (f) dispatch releases, 6 months;
- (g) flight plans, 6 months;
- (h) passenger manifests, 6 months;
- (i) weather reports, 6 months;
- (j) journey logs, 2 years; and
- (k) aircraft technical logbook, 2 years.

#### **19. Inspection of personnel and other records**

(1) An air operator certificate (AOC) holder shall, whenever called upon to do so by an authorised person—

- (a) produce for the inspection of that person all records referred to in regulation 18; and
- (b) furnish to that person all information that person may require, in connection with the records and produce, for, that person's inspection all log-books, certificates, papers and other documents which that person may reasonably require to examine for the purpose of determining whether the records are complete or of verifying the accuracy of their contents.

(2) The AOC holder shall, at the request of any person in respect of whom that person is required to keep records as specified above, furnish to that person or to any operator of aircraft for the purpose of commercial air transport by whom that person may subsequently be employed, particulars of any qualifications obtained by such person while in the service of the AOC holder.

#### **20. Flight recorders records**

(1) An air operator certificate (AOC) holder shall retain—

- (a) the most recent flight data recorder calibration, including the recording medium from which this calibration is derived; and
- (b) the flight data recorder correlation for one aircraft of any group of aircraft operated by the AOC holder—
  - (i) that are of the same type;
  - (ii) on which the model flight recorder and its installation are the same; and

(iii) on which there is no difference in type design with respect to the original installation of instruments associated with the recorder.

(2) In the event of an accident or incident that requires immediate notification to the Authority, the AOC holder shall remove and keep recorded information from the cockpit voice recorder and flight data recorder for at least 60 days or if requested by the Authority, for a longer period.

## **21. Aircraft record**

(1) An air operator certificate (AOC) holder shall maintain a current list of each aircraft it operates and shall send a copy of the list to the Authority, as well as each change to the list, prior to the intended change.

(2) An aircraft of another AOC holder operated under an interchange agreement shall be incorporated in the current list of aircraft required by sub-regulation (1).

## **22. Authorised aircraft**

(1) An air operator certificate (AOC) holder shall not operate an aircraft in commercial air transport unless that aircraft—

(a) has an appropriate current airworthiness certificate;

(b) is in an airworthy condition; and

(c) meets the applicable airworthiness requirements for the operations the AOC holder intends to carry out, including those related to identification and equipment.

(2) A person shall not operate any specific type of aircraft in commercial air transport until it has completed satisfactory initial certification, which includes the issue of an AOC listing that type of aircraft.

(3) A person shall not operate additional or replacement aircraft of a type for which it is currently authorised unless that person can show that the aircraft has been approved by the Authority for inclusion in the AOC holder's fleet.

## **23. Dry leasing of foreign registered aircraft**

(1) An air operator certificate (AOC) holder may dry-lease a foreign-registered aircraft for commercial air transport as authorised by the Authority.

(2) An AOC holder shall not operate a foreign registered aircraft unless—

(a) there is in existence a current agreement between the Authority and the state of registry that, while the aircraft is operated by the Ugandan AOC holder, these Regulations governing the issue of the Ugandan AOC and its operation specification shall apply;

(b) there is in existence a current agreement between the Authority and the state of registry that—

(i) while the aircraft is operated by the AOC holder, the airworthiness regulations of the state of registry are applicable; or

- (ii) if the state of registry agrees to transfer some or all of the responsibility for airworthiness to the Authority under Article 83bis of the Chicago Convention, the Civil Aviation (Airworthiness) Regulations shall apply to the extent agreed upon by the Authority and the State of Registry;
- (iii) the agreement acknowledges that the Authority shall have unrestricted access to the aircraft at any place and any time.

(3) Pursuant to sub-regulation (2), an AOC holder may operate a foreign registered aircraft for a period not exceeding 6 consecutive months.

(4) The total number of dry leased aircraft shall be such that an AOC holder will not be predominantly dependent on foreign registered aircraft.

(5) A person who wishes to operate a dry leased aircraft shall provide the Authority with the following information—

- (a) the aircraft type and serial number;
- (b) the name and address of the registered owner;
- (c) the State of Registry and registration marks;
- (d) the certificate of airworthiness and statement from the registered owner that the aircraft fully complies with the airworthiness requirements of the State of Registry;
- (e) the name, address and signature of the lessee who shall be responsible for the operational control of the aircraft under the lease agreement, including a statement that the lessee fully understands the responsibilities under the applicable regulations;
- (f) a copy of the lease and maintenance agreement;
- (g) the duration of the lease; and
- (h) any other information as the Authority deems necessary.

(6) A Uganda AOC holder may dry lease an aircraft registered in another contracting State for the purpose of commercial air transportation provided that the following conditions are met—

- (a) the aircraft carries an appropriate airworthiness certificate issued, in accordance with Annex 8, to the Chicago Convention by the State of Registry and meets the aircraft registration and marking requirements of that state;
- (b) the aircraft is of a type design which complies with all of the requirements that would be applicable to that aircraft were it registered in Uganda, including the requirements which shall be met for issue of a certificate of airworthiness including type design

conformity, condition for safe operation, and the noise, fuel venting and engine emission requirements;

(c) the aircraft is maintained according to an approved maintenance programme; and

(d) the aircraft is operated by Uganda licensed flight crew employed by the Uganda AOC holder.

(7) An AOC holder operating a dry leased aircraft shall have operational control of that aircraft.

(8) An AOC holder shall provide satisfactory evidence that the aircraft has been deleted from the lessor's AOC before the Authority lists the aircraft on the lessee's AOC.

(9) An AOC holder engaged in the dry leasing of aircraft shall make the dry lease agreement explicit concerning the maintenance programme and minimum equipment list (MEL) to be followed during the lease period.

(10) Where the lease arrangement is determined to be a dry lease involving aircraft that possess valid certificates of registration and airworthiness issued by the state of registry, and the dry lease is acceptable to the Authority, operations specifications shall be developed by the AOC holder containing at least the following—

(a) the names of the parties to the lease agreement and the duration thereof;

(b) the nationality and registration marks of each aircraft involved in the agreement;

(c) the type of aircraft to be used;

(d) the area of operation; and

(e) the regulations applicable to the operation.

#### **24. Aircraft interchange**

(1) An air operator certificate (AOC) holder shall not interchange aircraft with another AOC holder without the approval of the Authority.

(2) Prior to operating an aircraft under an interchange agreement, the AOC holder shall show that—

(a) the procedures for the interchange operation conform with safe operating practices;

(b) the required crew members and flight operations officers meet approved training requirements for the aircraft and equipment to be used and are familiar with the communications and dispatch procedures to be used;

- (c) the maintenance personnel meet the approved training requirements for the aircraft and equipment, and are familiar with the maintenance procedures to be used;
- (d) the flight crew members and flight operations officers meet approved appropriate route and airport qualifications;
- (e) the aircraft to be operated is essentially similar to the aircraft of the AOC holder with whom the interchange is effected; and
- (f) the arrangement of flight instruments and controls that are critical to safety are essentially similar, unless the Authority determines that the AOC holder has adequate training programmes to ensure that any potentially hazardous dissimilarities are safely overcome by flight crew familiarisation.

(3) An AOC holder operating an aircraft under an interchange agreement shall include the pertinent provisions and procedures of the agreement in its manuals.

(4) An AOC holder shall—

- (a) amend its operations specifications to reflect an interchange agreement; and
- (b) comply with the applicable regulations of the state of registry of an aircraft involved in an interchange agreement while the AOC holder has operational control of that aircraft.

#### **25. Wet-leasing of aircraft**

(1) A holder of an air operator certificate (AOC) issued under these Regulations may enter into a wet-lease arrangement with another air operator subject to the approval of the Authority and any terms, conditions or limitations imposed by the Authority.

(2) Where a holder of an AOC issued under these Regulations enters into a wet lease arrangement, the AOC holder shall maintain operational control of the leased aircraft and crew; the AOC holder shall demonstrate how it will maintain operational control to the satisfaction of the Authority.

(3) The AOC holder shall apply to the Authority for approval of the wet lease.

(4) In support of its application for approval for a net lease, the AOC holder shall provide the Authority with the following information—

- (a) the aircraft type and serial number;
- (b) the name and address of the registered owner;
- (c) the details of the crew members;

- (d) the state of registry and registration marks;
- (e) the certificate of airworthiness and statement from the registered owner that the aircraft fully complies with the airworthiness requirements of the state of registry;
- (f) the name, address and signature of the AOC holder responsible for the operational control of the aircraft under the lease agreement, including a statement that the AOC holder fully understands the responsibilities under the applicable regulations;
- (g) a copy of the lease and maintenance agreement;
- (h) the duration of the lease; and
- (i) any other information as the Authority deems necessary.

(5) The operations specifications of an AOC holder engaged in a wet lease operation shall contain the following information—

- (a) the names of the parties to the agreement and the duration of the agreement;
- (b) the make, model, series, serial number, nationality and registration marks of each aircraft referred to in the agreement;
- (c) the kind of operation;
- (d) the expiration date of the lease agreement;
- (e) a statement specifying the party deemed by the Authority to have operational control; and
- (f) any other item, condition or limitation the Authority deems necessary.

## **26. Emergency evacuation demonstration**

(1) An air operator certificate (AOC) holder shall not use an aircraft type and model with total seating capacity of 44 and above in commercial air transport passenger-carrying operations unless the AOC holder has first conducted, for the Authority, an actual full capacity emergency evacuation demonstration for the configuration in 90 seconds or less.

(2) The full capacity actual demonstration referred to in sub-regulation (1) may not be required, if the AOC holder applies to the Authority for an exemption with evidence that—

- (a) a satisfactory full capacity emergency evacuation for the aircraft to be operated was demonstrated during the aircraft type certification or during the certification of another air operator; and

(b) there is an engineering analysis, which shows that an evacuation is still possible within the 90 second standard, if the AOC holder's aircraft configuration differs with regard to number of exits or exit type or number of cabin crew member or location of the cabin crew member.

(3) Where an AOC holder requests for an exemption under sub-regulation (2) and the exemption is approved, the AOC holder shall conduct a partial emergency evacuation and ditching evacuation, observed by the Authority, that demonstrates the effectiveness of the AOC holder's crew members emergency training and evacuation procedures.

(4) Where a full capacity demonstration is not required, an AOC holder shall not use an aircraft type and model in commercial air transport passenger-carrying operations unless the AOC holder has first demonstrated to the Authority that its available personnel, procedures and equipment shall provide sufficient open exits for evacuation in 15 seconds or less.

(5) An AOC holder shall not use an aircraft in extended overwater operations unless the AOC holder has first demonstrated to the Authority that it has the ability and equipment to efficiently carry out its ditching procedures.

(6) An AOC holder shall apply to the Authority for approval to conduct the emergency evaluation demonstration at least 30 days before the intended date of the emergency evacuation demonstration.

(7) A cabin crew member to be used in the emergency evacuation demonstrations shall—

(a) be selected at random by the Authority;

(b) have completed the AOC holder's Authority-approved training programme for the type and model of aircraft; and

(c) have passed the drills and competence check on the emergency equipment and procedures.

(8) To conduct a partial emergency evacuation demonstration, the AOC holder's assigned cabin crew members shall, using the AOC holder's line operating procedures—

(a) demonstrate the opening of 50 percent of the required floor-level emergency exits and 50 percent of the required non-floor-level emergency exits, whose opening by a cabin crew member is defined as an emergency evacuation duty and deployment of 50 percent of the exit slides, selected by the Authority; and

(b) prepare for use those exits and slides within fifteen seconds.

(9) To conduct the ditching evacuation demonstration, the AOC holder's assigned cabin crew members shall—

- (a) demonstrate their knowledge and use of each item of required emergency equipment;
- (b) prepare the cabin for ditching within 6 minutes after the intention to ditch is announced;
- (c) remove each life raft from storage, one of which as selected by the Authority shall be launched and properly inflated or one slide life raft properly inflated; and
- (d) enter the raft, which shall include all required emergency equipment and completely set it up for extended occupancy.

**27. Demonstration flights**

(1) An air operator certificate (AOC) holder shall not operate an aircraft type in commercial air transport unless the AOC holder first conducts demonstration flights to the satisfaction of the Authority.

(2) An AOC holder shall not operate an aircraft in a designated special area or using a specialised navigation system unless the AOC holder conducts demonstration flight to the satisfaction of the Authority.

(3) The demonstration flights required under sub-regulation (1) shall be conducted in accordance with the regulation applicable to the type of operation and aircraft type used.

(4) An AOC holder shall conduct demonstration flights for each type of aircraft, including aircraft materially altered in design, and for each kind of operation the AOC holder intends to conduct.

(5) An AOC holder shall conduct demonstration flights of at least—

- (a) 100 total hours of flight time, unless the Authority determines that a satisfactory level of proficiency has been demonstrated in fewer hours;
- (b) 5 hours of night time, if night flights are to be authorised;
- (c) 5 instrument approach procedures under simulated or actual instrument weather conditions, if IFR flights are to be authorised; and
- (d) entry into a representative number of en-route airports, as determined by the Authority.

(6) A person shall not carry passengers in an aircraft during demonstration flights, except those required to make the demonstration flight and those designated by the Authority.

(7) The Authority shall determine the necessity and extent of demonstration flights for those AOC holders operating aircraft of less than 5,700 kg.

## **28. Facilities**

(1) An air operator certificate (AOC) holder shall maintain operational and airworthiness support facilities at the AOC holders' principal base of operation, appropriate for the area and type of operation.

(2) An AOC holder shall arrange appropriate ground handling facilities necessary to ensure the safe servicing and loading of its aircraft at each airport used.

## **29. Operations schedule**

(1) In establishing flight operations schedules, an air operator certificate holder shall—

(a) allow enough time for the proper servicing of aircraft at intermediate stops; and

(b) consider the prevailing winds en route and cruising speed for the type of aircraft.

(2) The cruising speed referred to in sub-regulation (1) shall not be more than that resulting from the specified cruising output of the engines.

### **PART IV—AIR OPERATOR CERTIFICATE FLIGHT OPERATIONS MANAGEMENT**

## **30. Operations manual**

(1) An air operator certificate (AOC) holder shall issue to the crew members and persons assigned operational control functions, an operations manual as set out in the First Schedule to these Regulations.

(2) The operations manual referred to in sub-regulation (1) shall be amended or revised as is necessary to ensure that the information contained therein is kept up to date and all such amendments or revisions shall be issued to all personnel that are required to use the operations manual.

(3) An AOC holder shall submit to the Authority with a copy of the AOC holder's entire operations manual for the time being in force or of such parts thereof as the Authority may specify.

(4) An AOC holder shall make such amendments or additions to the operations manual as the Authority may require for the purpose of ensuring the safety of the aircraft or of persons or cargo carried therein, and of the safety, efficiency or regularity of air navigation.

(5) The operations manual issued under sub-regulation (1) shall contain the overall, general company policies and procedures regarding the flight operations it conducts.

(6) An AOC holder shall prepare and keep current an operations manual which contains the AOC holders procedures and policies for the use and guidance of its personnel.

(7) An AOC holder shall issue the operations manual, or pertinent portions, together with all amendments and revisions, to all personnel that are required to use it.

(8) An AOC holder shall not provide for use of its personnel in commercial air transport any operations manual or its part, which has not been reviewed and found acceptable or approved for the AOC holder by the Authority.

(9) An AOC holder shall ensure that the contents and structure of the operations manual are in accordance with these Regulations and includes at least those subjects designated by the Authority that are applicable to the AOC holder's area and type of operations.

(10) The operations manual may be published in parts, as a single document, or as a series of volumes.

(11) An AOC holder may design an operations manual to be more restrictive than the Authority's requirements.

### **31. Training programmes**

(1) An air operator certificate (AOC) holder shall ensure that all operations personnel are properly instructed in their duties and responsibilities and the relationship of such duties to the operation as a whole.

(2) An AOC holder shall have training programmes approved by the Authority containing the general training, checking, standardisation and record keeping policies as specified in the First Schedule.

(3) An AOC holder shall have a training curriculum approved by the Authority prior to using the training curriculum for the purpose of qualifying a crew member or person performing operational control functions, for duties in commercial air transport.

(4) An AOC holder shall submit to the Authority any revision to an approved training programme and shall receive approval of the revision from the Authority before that revision can be effected.

(5) The training programmes specified in sub-regulation (2) shall be described in detail either in the operations or in a training manual, which would form part of the operations manual but may be issued as a separate volume.

### **32. Aircraft operating manual**

(1) A holder or applicant for an air operator certificate (AOC) shall submit proposed aircraft operating manual for each type and variant of aircraft operated, containing the normal, abnormal and emergency procedures relating to the operation of the aircraft for approval by the Authority.

(2) An aircraft operating manual shall—

(a) be based upon the aircraft manufacturer's data for the specific aircraft type and variant operated by the AOC holder and shall include specific operating parameters, details of the aircraft systems and of

- the check lists to be used applicable to the operations of the AOC holder that are approved by the Authority;
- (b) be designed so as to observe human factors principles; and
  - (c) be issued to the flight crew members and persons assigned operational control functions to each aircraft operated by the AOC holder.

(3) A holder or applicant for an AOC shall submit and maintain an aircraft operating manual containing as a minimum the information specified in the Second Schedule to these Regulations.

### **33. AOC holder's journey log**

(1) An air operator certificate (AOC) holder shall maintain a journey log containing the following information for each flight—

- (a) aircraft nationality and registration marks;
- (b) date of the flight;
- (c) name(s) of crew members;
- (d) duty assignments of crew members;
- (e) place of departure;
- (f) place of arrival;
- (g) time of departure;
- (h) time of arrival;
- (i) duration of flight;
- (j) purpose of flight;
- (k) incidents, and observations, if any; and
- (l) signature of the pilot in command.

(2) The Authority may waive the requirement of sub-regulation (1) if the relevant information is available in the aircraft technical logbook referred to in regulation 61.

(3) An AOC holder shall ensure that all entries in the journey log are made concurrently and are permanent in nature.

### **34. Designation of PIC**

An air operator certificate holder shall, for each commercial air transport operation, designate, in writing, one pilot as the pilot in command.

### **35. Required cabin crew members**

(1) An air operator certificate (AOC) holder shall schedule, and the pilot in command shall ensure that the minimum number of required cabin crew members are on board passenger-carrying flights.

(2) The number of cabin crew members may not be less than the minimum prescribed by the Authority in the AOC holders' operations provisions or the following, whichever is greater—

- (a) in the case of an aircraft with a total seating capacity of 20 to 50 passengers, one cabin crew member;
- (b) in the case of an aircraft with a total seating capacity of not more than 200, the number of cabin crew members carried on such flight shall be not less than one cabin crew member for every 50, or a fraction of 50 passengers carried;
- (c) in the case of an aircraft with a total seating capacity of more than 200, the number of cabin crew members carried on such flights shall be not less than half the number of the main exits in the aircraft, and in addition, when more than 200 passengers are carried, one additional cabin crew member for every 25 or a fraction of 25, of such passengers above two hundred.

(3) Where the number of cabin crew members specified in sub-regulation (2), calculated in accordance with that sub-regulation exceeds the number of main exits in the aircraft, it shall be sufficient compliance with this regulation if the number of cabin crew members carried is equal to the number of main exits in the aircraft.

(4) Where passengers are on board a parked aircraft, the minimum number of cabin crew members shall be half of the number required for the flight operation, but in any case a minimum of one cabin crew member or another person qualified in the emergency evacuation procedures for the aircraft.

(5) Where one-half of the cabin crew members specified in sub-regulation (1) would result in a fractional number, the tally of requisite cabin crew members may be rounded down to the next whole number.

(6) Notwithstanding the preceding provisions of this regulation, the Authority may give a direction to an AOC holder requiring him or her to include among the crew thereof, whenever the aircraft is flying for the purpose of commercial air transport operations, at least one cabin crew notwithstanding that the aircraft may be carrying fewer than 20 passengers.

### **36. Carriage of special situation passengers**

An air operator certificate (AOC) holder shall not allow the transportation of special situation passengers, except—

- (a) as otherwise provided in the AOC holder's operations manual procedures; and
- (b) with the knowledge and concurrence of the pilot in command.

### **37. Cockpit check procedure**

(1) An air operator certificate (AOC) holder shall issue to each flight crew member and make available on each aircraft at each flight crew member position, the cockpit checklist procedures approved by the Authority appropriate for the type and variant of aircraft.

(2) An AOC holder shall ensure that approved procedures include each item necessary for flight crew members to check for safety before starting engines, taking off or landing and for engine and systems abnormalities and emergencies.

(3) An AOC holder shall ensure that the checklist procedures are designed so that a flight crew member shall not need to rely upon their memory for items to be checked.

(4) An AOC holder shall make the approved procedures readily available in the cockpit of each aircraft and the flight crew shall be required to follow them when operating the aircraft

### **38. Minimum equipment list and configuration deviation list**

(1) An air operator certificate (AOC) holder shall provide for the use of the flight crew members, maintenance personnel and persons assigned operational control functions during the performance of their duties, minimum equipment list (MEL) approved by the Authority.

(2) The MEL shall be specific to the aircraft type and variant and shall contain the circumstances, limitations and procedures for release or continuance of flight of the aircraft with inoperative components, equipment or instruments.

(3) An AOC holder may provide for the use of flight crew, maintenance personnel and persons assigned operational control functions during the performance of their duties a configuration deviation list (CDL) specific to the aircraft type if one is provided and approved by the state of design.

(4) An AOC holder's operations manual shall contain those procedures acceptable to the Authority for operations in accordance with the CDL requirements.

### **39. Performance planning manual**

(1) An air operator certificate holder shall provide for the use of the flight crew members and persons assigned operational control functions during the performance of their duties, a performance planning manual acceptable to the Authority.

(2) The performance planning manual shall be specific to the aircraft type and variant and shall contain adequate performance information to accurately calculate the performance in all normal phases of flight operation.

### **40. Performance data control system**

(1) An air operator certificate (AOC) holder shall have a system approved by the Authority, for obtaining, maintaining and distributing to appropriate personnel

current performance data for each aircraft, route and airport that the AOC holder uses.

(2) The system specified in sub-regulation (1) approved by the Authority shall provide current obstacle data for departure and arrival performance calculations.

#### **41. Aircraft loading and handling manual**

(1) An air operator certificate (AOC) holder shall provide for the use of the flight crew members, ground handling personnel and persons assigned operational control functions during the performance of their duties, an aircraft handling and loading manual acceptable to the Authority.

(2) The loading manual shall be specific to the aircraft type and variant which contains the procedures and limitations for servicing and loading of the aircraft.

#### **42. Mass and balance data control system**

An air operator certificate (AOC) holder shall have a system, approved by the Authority for obtaining, maintaining and distributing to appropriate personnel current information regarding the mass and balance of each aircraft operated by that AOC holder.

#### **43. Cabin crew member manual**

(1) An air operator certificate (AOC) holder shall issue to the cabin crew member for use during the performance of their duties, a cabin crew member manual acceptable to the Authority.

(2) The cabin crew member manual shall contain the operational policies and procedures applicable to cabin crew member and the carriage of passengers.

(3) An AOC holder shall issue to the cabin crew member a manual specific to the aircraft type and variant, containing at least the information set out in the Third Schedule to these Regulations as well as details of normal, abnormal and emergency procedures and the location and operation of emergency equipment.

(4) The manuals specified in sub-regulation (3) may be combined into one manual for use by the cabin crew member.

#### **44. Passenger briefing cards**

(1) An air operator certificate (AOC) holder shall carry on each passenger-carrying aircraft, in convenient locations for the use of each passenger, printed briefing cards supplementing the oral briefing and containing—

- (a) diagrams and methods of operating the emergency exits;
- (b) other instructions necessary for use of the emergency equipment; and
- (c) information regarding the restrictions and requirements associated with sitting in an exit seat row.

(2) An AOC holder shall ensure that each card contains information that is pertinent only to the type and variant of aircraft used for that flight.

(3) An AOC holder shall, at each exit seat, provide passenger information cards that include the following information in English and Kiswahili languages—

(a) functions required of a passenger in the event of an emergency in which a crew member is not available to assist—

- (i) locate the emergency exit;
- (ii) recognise the emergency exit opening mechanism;
- (iii) comprehend the instructions for operating the emergency exit;
- (iv) operate the emergency exits;
- (v) assess whether opening the emergency exit will increase the hazards to which passengers may be exposed;
- (vi) follow oral directions and hand signals given by a crew member;
- (vii) stow or secure the emergency exit door so that it will not impede use of the exit;
- (viii) assess the condition of an escape slide, activate the slide, and stabilise the slide after deployment to assist others in getting off the slide;
- (ix) pass expeditiously through the emergency exit; and
- (x) assess, select, and follow a safe path away from the emergency exit;

(b) a requirement that a passenger identify themselves to allow reseating if that passenger—

- (i) cannot perform the emergency functions stated in the information card;
- (ii) has a condition that will prevent that passenger from performing the functions;
- (iii) may suffer bodily harm as the result of performing one or more of those functions;
- (iv) does not wish to perform those functions; or
- (v) lacks the ability to read, speak or understand the language or the graphic form in which instructions are provided by the AOC holder;

(c) a statement that whenever a crew member identifies a passenger who does not meet the requirements specified in paragraph (b), the crew member shall reseat the passenger.

**45. Aeronautical data control system**

(1) An air operator certificate (AOC) holder shall have a system approved by the Authority for obtaining, maintaining and distributing to appropriate personnel current aeronautical data for each route and airport used.

(2) An AOC holder shall provide the following aeronautical data for each airport used—

(a) airports—

- (i) facilities;
- (ii) navigational and communications aids;
- (iii) construction affecting takeoff, landing, or ground operations; and
- (iv) air traffic service facilities;

(b) runways, clearways and stopways—

- (i) dimensions;
- (ii) surface;
- (iii) marking and lighting systems; and
- (iv) elevation and gradient;

(c) displaced thresholds—

- (i) location;
- (ii) dimensions; and
- (iii) takeoff or landing or both;

(d) obstacles—

- (i) those affecting takeoff and landing performance computations;  
and
- (ii) controlling obstacles;

(e) instrument flight procedures—

- (i) departure procedure;
- (ii) approach procedure; and
- (iii) missed approach procedure;

(f) special information—

- (i) runway visual range measurement equipment; and

(ii) prevailing winds under low visibility conditions.

**46. Route guide and aeronautical charts**

(1) An air operator certificate (AOC) holder shall provide for the use of the flight crew members and persons assigned operational control function during the performance of their duties, a route guide and aeronautical charts approved by the Authority.

(2) The route guide and aeronautical charts shall be current and appropriate for the proposed types and areas of operations to be conducted by the AOC holder.

**47. Weather reporting sources**

(1) An AOC holder shall use sources approved by the Authority for the weather reports and forecasts used for decisions regarding flight preparation, routing and terminal operations.

(2) Where an AOC holder carries out passenger carrying operations on a published schedule, the AOC holder shall have an approved system for obtaining forecasts and reports of adverse weather phenomena that may affect safety of flight on each route to be flown and airport to be used.

(3) An AOC holder may use the following sources of weather reports for flight planning or controlling flight movement—

- (a) the Meteorological Department;
- (b) a Uganda-operated automated surface observation stations, so long as the station reports all required items for a complete surface aviation weather report;
- (c) a Uganda-operated supplemental aviation weather reporting station;
- (d) observations made by aerodrome control towers;
- (e) a Uganda-contracted weather observatory;
- (f) any active meteorological office operated by a foreign state which subscribes to the standards and practices contained in the Chicago Convention and the annexes thereunder;
- (g) for flight operations which use military airports as departure, destination, alternate or diversion airports, any military weather reporting sources approved by the Authority;
- (h) near-real time reports such as pilot reports, radar reports, radar summary charts and satellite imagery reports made by commercial weather sources or other sources specifically approved by the Authority; or
- (i) an AOC holder operated and maintained weather reporting system approved by the Authority.

**48. De-icing and anti-icing programme**

(1) An air operator certificate (AOC) holder planning to operate an aircraft in conditions where frost, ice, or snow may reasonably be expected to stick on to the aircraft shall—

- (a) use only aircraft adequately equipped for such conditions;
- (b) ensure flight crew is adequately trained for such conditions; and
- (c) have an approved ground de-icing and anti-icing programme.

(2) Contents of the ground de-icing and anti-icing programme shall include a detailed description of—

- (a) the method used to determine that conditions are such that frost, ice or snow may reasonably be expected to stick on to the aircraft and that ground de-icing and anti-icing operational procedures shall be effected;
- (b) the person responsible for deciding that ground de-icing and anti-icing operational procedures shall be effected;
- (c) the procedures for implementing ground de-icing and anti-icing operational procedures; and
- (d) the specific duties and responsibilities of each operational position or group responsible for getting the aircraft safely airborne while ground de-icing and anti-icing operational procedures are in effect.

(3) The AOC holder's programme shall include procedures for flight crew members to increase or decrease the determined holdover time in changing conditions.

(4) The holdover time shall be supported by data acceptable to the Authority.

(5) Where the maximum holdover time is exceeded, takeoff shall be prohibited unless at least one of the following conditions exists—

- (a) a pre-takeoff contamination check is conducted outside the aircraft within 5 minutes prior to beginning take off to determine that the wings, control surfaces, and other critical surfaces, as defined in the certificate holder's programme, are free of frost, ice or snow;
- (b) it is otherwise determined by an alternate procedure, approved by the Authority and in accordance with the AOC holder's approved programme, that the wings, control surfaces and other critical surfaces are free of frost, ice or snow; or
- (c) the wings, control surfaces and other critical surfaces are de-iced again and a new holdover time is determined.

#### **49. Flight supervision and monitoring system**

(1) An air operator certificate (AOC) holder who conducts scheduled operations shall have an adequate system approved by the Authority for proper dispatching and monitoring of the progress of the scheduled flights.

(2) The dispatch and monitoring system shall have enough dispatch centres, adequate for the operations to be conducted, located at points necessary to ensure adequate flight preparation, dispatch and in-flight contact with the scheduled flight operations.

(3) Where an AOC holder conducts scheduled operations, the AOC holder shall provide enough qualified operations officers at each dispatch centre to ensure proper operational control of each flight.

#### **50. Flight following system for charter flights operations**

(1) An air operator certificate (AOC) holder who conducts charter flight operations shall have a system for providing flight preparation documents and determining the departure and arrival times of its flights at all airports approved by the Authority.

(2) The systems specified in sub-regulation (1) shall have a means of communication by private or available public facilities to monitor the departure and arrival at all airports, including flight diversions.

(3) An AOC holder shall have an approved flight following system established and adequate for the proper monitoring of each flight, considering the operations to be conducted.

(4) The centres established by an AOC holder for flight following shall be located at points necessary to ensure—

(a) the proper monitoring of the progress of each flight with respect to its departure at the point of origin and arrival at its destination, including intermediate stops and diversions; and

(b) that the pilot in command is provided with all information necessary for the safety of the flight.

(5) An AOC holder conducting charter operations may arrange to have flight following facilities provided by persons other than the AOC holder's employees, but in such a case the AOC holder continues to be primarily responsible for the operational control of each flight.

(6) An AOC holder conducting charter operations using a flight following system shall ensure that the system has adequate facilities and personnel to provide the information necessary for the initiation and safe conduct of each flight to—

(a) the flight crew of each aircraft; and

- (b) the persons designated by the AOC holder to perform the function of operational control of the aircraft.

(7) An AOC holder conducting charter operations shall show that the personnel required to perform the function of operational control are able to perform their duties.

#### **51. Communications facilities**

(1) An air operator certificate (AOC) holder's aircraft shall have two-way radio communications with all air traffic service facilities along the routes and alternate routes to be used.

(2) An AOC holder who conducts scheduled operations shall have rapid and reliable radio communications with all flights over the entire route structure under normal operating conditions.

#### **52. Routes and areas of operation**

(1) An air operator certificate (AOC) holder may conduct operations only along such routes and within such areas for which—

- (a) ground facilities and services, including meteorological services, provided are adequate for the planned operation;
- (b) the performance of the aircraft intended to be used is adequate to comply with minimum flight altitude requirements;
- (c) the equipment of the aircraft intended to be used meets the minimum requirements for the planned operation;
- (d) appropriate and current maps and charts are available;
- (e) where a two-engine aircraft is used, adequate airports are available with the time and distance limitations; and
- (f) where a single-engine aircraft is used, surfaces are available which permit a safe forced landing to be executed in the event of engine failure.

(2) A person shall not conduct commercial air transport operations on any route or area of operation unless the operations are in accordance with any restrictions imposed by the Authority.

#### **53. Enroute navigational facilities**

(1) An air operator certificate (AOC) holder shall not operate on a proposed route or area that does not have non visual ground aids—

- (a) available over the route for navigating aircraft within the degree of accuracy required for air traffic control; and

(b) located to allow navigation to any regular, provisional, refuelling, or alternate airport, within the degree of accuracy necessary for the operation involved.

(2) Non visual ground aids shall not be required for—

(a) visual flight rules operations; or

(b) operations on route segments where the use of celestial or other specialised means of navigation is approved by the Authority.

#### **54. Flight safety documents systems**

(1) An operator shall establish a flight safety documents system, for the use and guidance of operational personnel.

(2) Guidance on the development and organization of a flight safety documents system is provided in the Fourth schedule.

#### **55. Safety management**

(1) An air operator certificate (AOC) holder operating an aircraft registered in Uganda flying for the purpose of commercial air transport shall establish and maintain a safety management system approved by the Authority.

(2) The safety management system referred to in sub-regulation (1) shall—

(a) identify actual and potential safety hazards;

(b) ensure that remedial action necessary to maintain an acceptable level of safety is implemented; and

(c) provide for continuous monitoring and regular assessment of the safety level achieved.

(3) An AOC holder operating an aeroplane registered in Uganda with a maximum total weight authorised of more than 27,000 kg flying for the purpose of commercial air transport shall include a flight data monitoring programme as part of its safety management system.

(4) A flight data analysis programme shall be non-punitive and contain adequate safeguards to protect the source of the data.

### **PART V—AIR OPERATOR CERTIFICATE MAINTENANCE REQUIREMENTS**

#### **56. Maintenance responsibility**

(1) An air operator certificate (AOC) holder shall ensure the airworthiness of its aircraft and the serviceability of both operational and emergency equipment by—

(a) carrying out pre-flight inspections;

- (b) correcting any defect or damage affecting safe operation of the aircraft to an approved standard, taking into account the minimum equipment list and configuration deviation list if available for the aircraft type;
- (c) carrying out maintenance on the aircraft in accordance with the approved operator's aircraft maintenance programme;
- (d) analysing of the effectiveness of the AOC holder's approved aircraft maintenance programme;
- (e) effecting the provisions of any operational directive, airworthiness directive and any other continued airworthiness requirement made mandatory by the Authority; and
- (f) carrying out modifications in accordance with an approved standard and establishing an embodiment policy for non-mandatory modifications.

(2) An AOC holder shall ensure that the certificate of airworthiness for each aircraft operated remains valid in respect of—

- (a) the requirements specified in sub-regulation (1);
- (b) the expiry date of the certificate of airworthiness; and
- (c) any other maintenance condition specified in the certificate of airworthiness.

(3) An AOC holder shall ensure that the requirements specified in sub-regulation (1) are performed in accordance with procedures approved by or acceptable to the Authority.

(4) An AOC holder shall ensure that the maintenance, preventive maintenance and modification of its aircraft or aircraft component are performed in accordance with its maintenance control manual or current instructions for continued airworthiness, and applicable civil aviation regulations.

(5) An AOC holder may make an arrangement with another person for the performance of any maintenance, preventive maintenance or modifications but shall remain responsible for all work performed under the arrangement.

## **57. Approval and acceptance of AOC maintenance systems**

(1) Except for pre-flight inspections, an air operator certificate (AOC) holder shall not operate an aircraft—

- (a) registered in Uganda unless it is maintained and released to service by an air maintenance organisation (AMO) approved in accordance with the Civil Aviation (Approved Maintenance Organization) Regulations;

- (b) of foreign registry unless it is maintained and released to service
- (c) in accordance with a system approved by the state of registry and is acceptable to the Authority;

(2) The state of registry may transfer some or all its responsibility for foreign registered aircraft operating in Uganda under an agreement entered into pursuant to Article 83bis of Chicago Convention.

#### **58. Maintenance control manual**

(1) An air operator certificate (AOC) holder shall provide to the Authority, and to the state of registry of the aircraft, if different from the Authority, the AOC holder's maintenance control manual and subsequent amendments, for the use and guidance of maintenance and operational personnel concerned, containing details of the organisation's structure including—

- (a) the accountable manager and director of maintenance responsible for the maintenance system as required by regulation 13;
- (b) procedures to be followed to satisfy the maintenance responsibility required under regulation 56, except where the AOC holder is an AMO and the quality functions are specified in regulation 16, such procedures may be included in the approved maintenance organisation (AMO) procedures manual;
- (c) procedures for the reporting of failures, malfunctions, and defects in accordance with the Civil Aviation (Airworthiness) Regulations to the Authority, state of registry and the state of design within 72 hours of discovery;
- (d) items that warrant immediate notification to the Authority by telephone, telex or fax, with a written follow-on report as soon as possible but no later than within 72 hours of discovery, which are—
  - (i) primary structural failure;
  - (ii) control system failure;
  - (iii) fire in the aircraft;
  - (iv) engine structure failure; or
  - (v) any other condition considered an imminent hazard to safety.

(2) An AOC holder's maintenance control manual shall contain the following information which may be issued in separate parts—

- (a) a description of the administrative agreements between the AOC holder and an AMO;
- (b) a description of the maintenance procedures and the procedures for completing and signing the certificate of release to service;

- (c) a description of the procedures to ensure each aircraft an AOC holder operates is in an airworthy condition;
- (d) a description of the procedures to ensure the operational emergency equipment for each flight is serviceable;
- (e) the names and duties of the person or persons required to ensure that all maintenance is carried out in accordance with the maintenance control manual;
- (f) a reference to the maintenance programme required under regulation 66;
- (g) a description of the methods for completion and retention of the operator's maintenance records required by regulation 63;
- (h) a description of the procedures for monitoring, assessing and reporting maintenance and operational experience for all aircraft 5,700kg and above maximum certificated take-off mass;
- (i) a description of the procedures for obtaining and assessing continued airworthiness information and implementing any resulting actions for all aircraft 5,700kg and above maximum certificated take-off mass, from the organisation responsible for the type design, and shall implement such actions considered necessary by the state of registry;
- (j) a system of ensuring that any fault, malfunctions, defects and other occurrences that cause or might cause adverse effects on the continuing airworthiness of aeroplanes 5,700kg and above and helicopters 3,180kg and above maximum certificated take-off mass shall be transmitted to the organization responsible for the type design of that aeroplane or helicopter;
- (k) a description of the procedures for implementing mandatory continuing airworthiness information as required in regulation 56;
- (l) a description of establishing and maintaining a system of analysis and continued monitoring of the performance and efficiency of the maintenance programme in order to correct any deficiency in that programme;
- (m) a description of aircraft types and models to which the manual applies;
- (n) a description of procedures for ensuring that unserviceabilities affecting airworthiness are recorded and rectified; and
- (o) a description of the procedures for advising the state of registry and the state of the operator of significant in- service occurrences.

(3) An AOC holder shall not provide for use of its personnel in commercial air transport, a maintenance control manual or its part that has not been reviewed and approved by the Authority.

(4) An AOC holder or applicant for an AOC shall submit and maintain a maintenance control manual containing at least the information set out in the Fifth Schedule to these Regulations.

#### **59. Maintenance management**

(1) An air operator certificate (AOC) holder, approved as an approved maintenance organisation (AMO), may carry out the requirements in regulation 56.

(2) An AOC holder shall employ a person or a group of persons, acceptable to the Authority, to ensure that all maintenance is carried out on time to an approved standard such that the maintenance requirements of regulation 56 and requirements of the AOC holder's maintenance control manual are satisfied, and to ensure the functioning of the quality system.

(3) An AOC holder shall provide suitable office accommodation at appropriate locations for the personnel specified in sub-regulation (2).

(4) Where an AOC holder is not an AMO, the AOC holder shall make arrangements with an AMO to carry out the requirement of regulation 56.

(5) The arrangement made pursuant to sub-regulation (4) shall be in the form of a written maintenance contract between the AOC holder and the AMO detailing the required maintenance functions and defining the support of the quality functions approved or accepted by the Authority.

#### **60. Quality system: maintenance**

(1) For maintenance purposes, an air operator certificate (AOC) holder's quality system required under regulation 16 shall—

(a) include at least the following functions—

- (i) monitoring that the activities of regulation 56 are being performed in accordance with the accepted procedures;
- (ii) ensure that all contracted maintenance is carried out in accordance with the contract;
- (iii) monitoring the continued compliance with the requirements of these Regulations; and
- (iv) monitoring compliance with and adequacy of, procedures required to ensure safe maintenance practices, airworthy aircraft and aircraft components;

(b) shall include a quality assurance programme that contains procedures designed to verify that all maintenance operations are being conducted in accordance with all applicable requirements, standards and procedures.

(2) Compliance monitoring as referred to in sub-regulation (1) shall include a feed-back system to the accountable manager to ensure corrective action as necessary.

(3) Where an AOC holder is also an approved maintenance organisation (AMO), the AOC holder's quality management system may be combined with the requirements of an AMO and submitted for approval and acceptance to the Authority, and state of registry for aircraft not registered in Uganda.

(4) An AOC holder shall establish a plan acceptable to the Authority indicating when and how often the activities as required in regulation 56 may be monitored.

(5) Reports shall be made upon completion of monitoring of activities including details of discrepancies of non-compliance with procedures or requirements.

(6) The feedback part of the system shall specify the person responsible for rectifying discrepancies and non-compliance in each particular case, the procedure to be followed if rectification is not completed within appropriate time scales and a system of reporting to the accountable manager.

(7) To ensure effective compliance with this regulation, an AOC holder or an applicant for an AOC shall carry out—

- (a) product sampling—the part inspection of a representative sample of the aircraft fleet;
- (b) defect sampling—the monitoring of defect rectification performance;
- (c) concession sampling—the monitoring of any concession not to carry out maintenance on time;
- (d) on time maintenance sampling—the monitoring of when flying hours, calendar time and flight cycles, of the aircraft and the components are brought in for maintenance; and
- (e) sample reports of unairworthy conditions and maintenance errors on aircraft and components.

## **61. Technical logbook**

(1) An air operator certificate (AOC) holder shall ensure that every aircraft registered in Uganda used for commercial air transport or aerial work maintains a technical logbook.

(2) The following particulars shall be entered in the technical logbook—

- (a) a title page with the name and address of the operator, the aircraft type and registration marks;
  - (b) details relating to the current certificate of release to service;
  - (c) details relating to the next inspection on the approved maintenance schedule;
  - (d) a section containing sector record pages, each page being serially numbered with the operator's name printed thereon and having a provision for recording the following—
    - (i) aircraft type, serial number and registration marks;
    - (ii) date, place and time of take-off and landing;
    - (iii) particulars of any defect experienced on the aircraft;
    - (iv) the fuel and oil quantities on arrival and quantities uplifted in each tank;
    - (v) a certificate of release to service in respect of any work performed for the purpose of rectifying defects;
    - (vi) the running total of flying hours, such that the hours to the next scheduled inspection can be easily determined;
    - (vii) provision for pre-flight and daily inspection signatures;
  - (e) a readily identifiable section containing a record of deferred defects with serially numbered pages and the operator's name printed thereon including a provision for recording the following—
    - (i) a cross-reference for each deferred defect such that the original defect together with brief related details can be clearly identified in the sector record section;
    - (ii) the original date of occurrence of the deferred defect, together with brief related details;
    - (iii) a cross-reference for each deferred defect such that the action in respect of such deferred defect can be clearly identified in the sector record section;
  - (f) the number of landings, flight pressure cycles or engine cycles as specified for that aircraft; and
  - (g) any other details as the Authority may require.
- (3) The technical log and any subsequent amendment shall be approved by the Authority.

## **62. Technical logbook entries**

(1) At the end of every flight, the pilot in command (PIC) shall enter, sign and date the following information in a technical logbook—

- (a) the times when the aircraft took off and landed; and
- (b) particulars of any defect which is known to him or her and which affects the airworthiness or safe operation of the aircraft or if no such defect is known to the PIC, an entry to that effect.

(2) Notwithstanding sub-regulation (1), in the case of a number of consecutive flights each of which begins and ends—

- (a) within the same period of 24 hours;
- (b) at the same aerodrome except where each such flight is for the purpose of dropping or projecting any material for agricultural, public health or similar purposes; and
- (c) with the same person as the PIC, the PIC may, except where he or she becomes aware of a defect during an earlier flight, make the entries in a technical logbook at the end of the last of such consecutive flights.

(3) Upon the rectification of any defect which has been entered in a technical logbook a person signing a maintenance release in respect of that defect shall enter the release in the technical logbook in such a position as to be readily identifiable with the defect to which it relates.

(4) An AOC holder shall have in the approved operations manual a procedure for keeping adequate copies of technical logbook to be carried on board the aircraft in a place readily accessible to each flight crew member.

### **63. Maintenance records**

(1) An air operator certificate (AOC) holder shall ensure that a system has been established to keep the following records, in a form acceptable to the Authority—

- (a) the total time in service in hours, calendar time and cycles, as appropriate, of the aircraft and all its life-limited components;
- (b) the current status of compliance with all mandatory continuing airworthiness information;
- (c) appropriate details of modifications and repairs to the aircraft and its major components;
- (d) the time in service in hours, calendar time and cycles, as appropriate, since last overhaul of the aircraft or its components subject to mandatory overhaul life;
- (e) the current aircraft status of compliance with the maintenance programme; and

- (f)* the detailed maintenance records to show that all requirements for signing of a certificate of release to service have been met; and
  - (g)* technical logbook records.
- (2) An AOC holder shall ensure that—
- (a)* the records specified in sub-regulation (1)*(a)* to *(e)* are kept for a minimum period of 90 days after the unit to which they refer has been permanently withdrawn from service;
  - (b)* the records referred to in sub-regulation (1)*(f)* are kept for a minimum of 2 years after the signing of the certificate of release to service;
  - (c)* the records referred to in sub-regulation (1)*(g)* are retained for 24 months after the date of the last entry;
  - (d)* in the event of temporary change of operator, the records specified in sub-regulation (1) are made available to the new operator; and
  - (e)* when an aircraft is permanently transferred from one operator to another operator, the records specified in sub-regulation (1) are also transferred.

#### **64. Release to service or maintenance section records of the technical logbook**

(1) An air operator certificate (AOC) holder shall not operate an aircraft unless it is maintained and released to service by an organisation approved in accordance with the Civil Aviation (Approved Maintenance Organisation) Regulations acceptable to the State of Registry.

(2) The certificate of release to service shall be issued in accordance with the AOC maintenance control manual procedures.

(3) An AOC holder shall not operate an aircraft after release under sub-regulation (1) unless an appropriate entry is made in accordance with the AOC maintenance control manual procedures acceptable to the Authority.

(4) An AOC holder shall give a copy of the certificate of release to service for the aircraft to the pilot in command or ensure that an entry noting the release is made in the technical logbook.

#### **65. Modification or repairs to aircraft**

(1) A modification or repair to an aircraft shall be made in compliance with the airworthiness requirements acceptable to the state of registry.

(2) An air operator certificate (AOC) holder shall—

- (a)* establish the procedures to ensure that records supporting compliance with the airworthiness requirements are retained;

- (b) ensure that major repair or major modification is carried out in accordance with technical data approved by the Authority;
- (c) promptly, upon completion of a major modification or major repair, prepare a report of each major modification or major repair of an airframe, aircraft engine, propeller or appliance of an aircraft operated by the AOC holder; and
- (d) submit a copy of each report of a major modification to the Authority and keep a copy of each report of a major repair available for inspection.

#### **66. Aircraft maintenance programme**

(1) An air operator certificate (AOC) holder's aircraft maintenance programme and any subsequent amendment shall be submitted to the Authority for approval.

(2) In the case of the foreign registered aircraft the maintenance programme shall be approved by the state of registry and may be subsequently accepted by the Authority.

(3) In addition to the requirement of a maintenance programme for aircraft operated by an AOC holder, an aircraft with maximum takeoff mass above 13,310 kg shall include a reliability programme in the maintenance programme.

(4) Where a determination is made by the Authority under sub-regulation (3), an AOC holder shall provide the procedures and information in the maintenance control manual.

(5) An AOC holder shall ensure that each aircraft is maintained in accordance with the approved maintenance programme which shall include—

- (a) maintenance tasks and the intervals in which these are to be performed, taking into account the anticipated utilisation of the aircraft;
- (b) where applicable, a continuing structural integrity programme;
- (c) procedures for changing or deviating from paragraphs (a) and (b); and
- (d) where applicable, condition monitoring and reliability programme, descriptions for aircraft systems, components and engines.

(6) The Authority may amend any operation specifications (ops specs) issued to an AOC holder to permit deviation from those provisions of this Part that would prevent the return to service and use of airframe components, engines, appliances and spare parts because the airframe components, engines, appliances and spare parts have been maintained, altered or inspected by persons employed outside Uganda who do not hold a Uganda maintenance engineer's licence.

(7) An AOC holder who is granted authority under this deviation shall provide for surveillance of facilities and practices to assure that all work performed

on the airframe components, engines, appliances and spare parts specified in sub-regulation (6) is accomplished in accordance with an AOC holder's maintenance control manual.

(8) Repetitive maintenance tasks that are specified in mandatory intervals as a condition of approval of the type design shall be identified as such.

(9) The maintenance programme shall be based on maintenance programme information made available by the state of design or by the organisation responsible for the type design and any additional applicable information, documentation or experience.

(10) A person shall not provide for use of its personnel in commercial air transport a maintenance programme or portion thereof which has not been reviewed and approved for the AOC holder by the Authority.

(11) Approval of an AOC holder's maintenance programme and any subsequent amendments shall be noted in the operations specifications.

(12) An AOC holder shall have an inspection programme and a programme covering other maintenance, preventive maintenance and modifications to ensure that—

(a) maintenance, preventive maintenance and modifications are performed in accordance with an AOC holder's maintenance control manual;

(b) each aircraft released to service is airworthy and has been properly maintained for operation.

#### **67. Maintenance, preventive maintenance and modifications**

An air operator certificate holder may make arrangements with an appropriately rated approved maintenance organisation for the performance of maintenance, preventive maintenance or modifications of any aircraft, airframe, aircraft engine, propeller, appliance or component or part thereof as provided in its maintenance programme and maintenance control manual.

### **PART VI—AIR OPERATOR CERTIFICATE SECURITY MANAGEMENT**

#### **68. Security requirements**

An air operator certificate holder shall ensure that all appropriate personnel are familiar and comply with the relevant requirements of the national security programmes of Uganda, for the protection of aircraft, facilities and personnel from unlawful interference.

## **69. Security training programmes**

(1) An air operator certificate (AOC) holder shall establish and maintain an approved security training programme which ensures crew members act in the most appropriate manner to minimize the consequences of acts of unlawful interference.

(2) The security training programme specified in sub-regulation (1) shall, as a minimum include—

- (a) determination of the seriousness of any occurrence;
- (b) crew communication and coordination;
- (c) appropriate self-defence responses;
- (d) use of non-lethal protective devices assigned to crew members whose use is authorized by the Authority;
- (e) understanding of behaviour of terrorists so as to facilitate the ability of crew members to cope with hijacker behaviour and passenger responses;
- (f) live situational training exercises regarding various threat conditions;
- (g) flight procedures to protect the aircraft; and
- (h) aircraft search procedures and guidance on least-risk bomb locations where practicable.

(3) An AOC holder shall establish and maintain a training programme to acquaint appropriate employees with preventive measures and techniques in relation to passengers, baggage, cargo, mail, equipment, stores and supplies intended for carriage on an aeroplane so that they contribute to the prevention of acts of sabotage or other forms of unlawful interference.

## **70. Reporting acts of unlawful interference**

Following an act of unlawful interference on board an aircraft the pilot in command (PIC) or in the PIC's absence, the air operator certificate (AOC) holder shall submit, without delay, a report of such an act to the designated local authority and the Authority.

## **71. Aircraft search procedure checklist**

(1) An air operator certificate (AOC) holder shall ensure that there is on board the AOC holder's aircraft, a checklist of the procedures to be followed in searching for a bomb in case of suspected sabotage and for inspecting aircraft for concealed weapons, explosives or other dangerous devices when a well-founded suspicion exists that the aircraft may be the object of an act of unlawful interference.

(2) The checklist referred to in sub-regulation (1) shall be supported by guidance on the appropriate course of action to be taken should a bomb or suspicious object be found and information on the least-risk bomb location specific to the aircraft.

## **72. Security of the flight crew compartment**

(1) Where an aircraft is equipped with a flight crew compartment door, this door shall be capable of being locked and means shall be provided by which cabin crew members can discreetly notify the flight crew in the event of suspicious activity or security breaches in the cabin.

(2) An air operator certificate holder shall ensure that passenger carrying aircraft of a maximum certificated take-off mass in excess of 45 500 Kg or with a passenger seating capacity greater than 60 shall be equipped with an approved flight crew compartment door that is designed to resist penetration by small arms fire and grenade shrapnel, to resist forcible intrusions by unauthorized persons, and be capable of being locked and unlocked from either pilot's station.

(3) Where an aircraft is equipped with a flight crew compartment door in accordance with sub-regulation (2)—

(a) the door shall be closed and locked from the time all external doors are closed following embarkation until any such door is opened for disembarkation, except when necessary to permit access and egress by authorized persons; and

(b) means shall be provided for monitoring from the cockpit the entire door area outside the flight crew compartment to identify persons requesting entry and to detect suspicious behaviour or potential threat.

## **PART VII—AIR OPERATOR CERTIFICATE DANGEROUS GOODS MANAGEMENT**

### **73. Approval to transport dangerous goods**

An air operator certificate holder shall not transport dangerous goods unless approved to do so by the Authority and in compliance with the requirements of regulation 74.

### **74. Compliance with Technical Instructions**

(1) An air operator certificate (AOC) holder shall comply with the provisions contained in the International Civil Aviation Organisation Technical Instructions on all occasions when dangerous goods are carried, irrespective of whether the flight is wholly or partly within or wholly outside Uganda.

(2) Where dangerous goods are to be transported outside Uganda, the AOC holder shall review and comply with the appropriate variations notified by Contracting States contained in Attachment 3 to the Technical Instructions.

(3) Articles and substances which would otherwise be classified as dangerous goods are excluded from the provisions of this Part, to the extent specified in the Technical Instructions, provided they are—

(a) required to be on board the aircraft for operating reasons;

- (b) carried as catering or cabin service supplies;
- (c) carried for use in flight as veterinary aid or as a humane killer for an animal; or
- (d) carried for use in flight for medical aid for a patient, provided that—
  - (i) gas cylinders have been manufactured specifically for the purpose of containing and transporting that particular gas;
  - (ii) drugs, medicines and other medical matter are under the control of trained personnel during the time when they are in use in the aircraft;
  - (iii) equipment containing wet cell batteries is kept and, when necessary, secured in an upright position to prevent spillage of the electrolyte; and
  - (iv) proper provision is made to stow and secure all the equipment during take-off and landing and at all other times when deemed necessary by the pilot in command in the interests of safety; or
  - (v) they are carried by passengers or crew members.

(4) Articles and substances intended as replacements for those specified in sub-regulation (3)(a) may be transported on an aircraft as specified in the Technical Instructions.

#### **75. Limitations on the transport of dangerous goods**

(1) An air operator certificate (AOC) holder shall take reasonable measures to ensure that articles and substances that are specifically identified by name or generic description in the Technical Instructions as being forbidden for transport under any circumstances are not carried on any aircraft.

(2) An AOC holder shall take reasonable measures to ensure that articles and substances or other goods that are identified in the Technical Instructions as being forbidden for transport in normal circumstances are transported only when—

- (a) they are exempted by the Contracting States concerned under the provisions of the Technical Instructions; or
- (b) the Technical Instructions indicate they may be transported under an approval issued by the state of origin of the goods.

#### **76. Classification of dangerous goods**

An air operator certificate holder shall take all reasonable measures to ensure that articles and substances are classified as dangerous goods as specified in the Technical Instructions.

#### **77. Packing**

An air operator certificate holder shall take all reasonable measures to ensure that dangerous goods are packed as specified in the Technical Instructions.

#### **78. Labelling and marking**

(1) An air operator certificate (AOC) holder shall take reasonable measures to ensure that packages, overpacks and freight containers are labelled and marked as specified in the Technical Instructions.

(2) Where dangerous goods are carried on a flight which takes place wholly or partly outside Uganda, the AOC holder shall ensure that labelling and marking are in the English and Kiswahili languages.

#### **79. Dangerous goods transport document**

(1) Except where otherwise specified in the Technical Instructions, an air operator certificate (AOC) holder shall ensure that, dangerous goods are accompanied by a dangerous goods transport document.

(2) Where dangerous goods are carried on a flight which takes place wholly or partly outside Uganda, an AOC holder shall ensure that the English and Kiswahili languages are used for the dangerous goods transport document.

#### **80. Acceptance of dangerous goods**

(1) An air operator certificate (AOC) holder shall not accept dangerous goods for transport unless the package, overpack or freight container has been inspected in accordance with the acceptance procedures as stipulated in the Technical Instructions.

(2) An AOC holder or the handling agent of the AOC holder shall use an acceptance check list which shall—

(a) allow for all relevant details to be checked; and

(b) be in such form as may allow for the recording of the results of the acceptance check by manual, mechanical or computerised means.

#### **81. Inspection for damage, leakage or contamination**

An air operator certificate holder shall ensure that—

(a) packages, overpacks and freight containers are inspected for evidence of leakage or damage immediately prior to loading on an aircraft or into a unit load device, as specified in the Technical Instructions;

(b) a unit load device is not loaded on an aircraft unless the device has been inspected as required by the Technical Instructions and found free from any evidence of leakage from or damage to, the dangerous goods contained therein;

- (c) leaking or damaged packages, overpacks or freight containers are not loaded on an aircraft;
- (d) any package of dangerous goods found on an aircraft and which appears to be damaged or leaking is removed or arrangements made for its removal by an appropriate authority or organisation;
- (e) after removal of any leaking or damaged goods, the remainder of the consignment is inspected to ensure it is in a proper condition for transport and that no damage or contamination has occurred to the aircraft or its load; and
- (f) packages, overpacks and freight containers are inspected for signs of damage or leakage upon unloading from an aircraft or from a unit load device and, if there is evidence of damage or leakage, the area where the dangerous goods were stowed shall be inspected for damage or contamination.

## **82. Removal of contamination**

An air operator certificate (AOC) holder shall ensure that—

- (a) any contamination found as a result of the leakage or damage of dangerous goods is removed without delay; and
- (b) an aircraft which has been contaminated by radioactive materials is immediately taken out of service and not returned until the radiation level at any accessible surface and the non-fixed contamination are not more than the values specified in the Technical Instructions.

## **83. Loading restrictions**

An air operator certificate holder shall ensure that—

- (a) dangerous goods are not carried in an aircraft cabin occupied by passengers or in the cockpit, unless otherwise specified in the Technical Instructions;
- (b) dangerous goods are loaded, segregated, stowed and secured on an aircraft as specified in the Technical Instructions; and
- (c) packages of dangerous goods bearing the “Cargo Aircraft Only” label are carried on cargo aircraft and loaded as specified in the Technical Instructions.

## **84. Provision of information**

(1) An air operator certificate (AOC) holder shall ensure that—

- (a) information is provided to enable ground staff to carry out their duties with regard to the transport of dangerous goods, including the actions to be taken in the event of incidents and accidents involving dangerous goods; and

(b) where applicable, the information referred to in paragraph (a) is also provided to the handling agent.

(2) An AOC holder shall ensure that information is promulgated as required by the Technical Instructions so that passengers are warned as to the types of goods which they are forbidden from transporting on board an aircraft and, where applicable, the handling agent shall ensure that notices are provided at acceptance points for cargo giving information about the transport of dangerous goods.

(3) An AOC holder shall ensure that information is provided in the operations manual to enable crew members to carry out their responsibilities in regard to the transport of dangerous goods, including the actions to be taken in the event of emergencies involving dangerous goods.

(4) An AOC holder shall ensure that the pilot in command is provided with written information on dangerous goods carried on board the aircraft in the manner and form specified in the Technical Instructions.

(5) An AOC holder that is involved in an aircraft incident or accident shall—

(a) as soon as possible, inform the Authority and the appropriate authority of the State in which the aircraft incident or accident occurred of any dangerous goods carried; and

(b) on request by the Authority, provide any information required to minimise the hazards created by any dangerous goods carried.

## **85. Training programmes**

(1) An air operator certificate (AOC) holder shall establish, maintain and have approved by the Authority, staff training programmes, as required by the Technical Instructions.

(2) An AOC holder not holding a permanent approval to carry dangerous goods shall ensure that—

(a) staff who are engaged in general cargo handling have received training to carry out their duties in respect of dangerous goods which covers as a minimum, the areas identified in Column 1 of Table 1 to a depth sufficient to ensure that an awareness is gained of the hazards associated with dangerous goods, how to identify such goods and what requests apply to the carriage of such goods by passengers; and

(b) crew members, passenger handling staff and security staff used by an AOC holder to deal with the screening of passengers and their baggage, have received training which covers as a minimum, the areas identified in Column 2 of Table 1 to a depth sufficient to ensure that an awareness is gained of the hazards associated with

dangerous goods, how to identify them and what requirements apply to the carriage of such goods by passengers.

TABLE 1

Areas of Training	Column 1	Column 2
General philosophy	X	X
Limitations on dangerous goods in air transport		X
Package marking and labelling	X	X
Dangerous goods in passengers baggage	X	X
Emergency procedures	X	X

Note: 'X' indicates an area to be covered.

(3) An air operator certificate (AOC) holder holding a permanent approval to carry dangerous goods shall ensure that—

- (a) staff who are engaged in the acceptance of dangerous goods have received training and are qualified to carry out their duties which covers as a minimum, the areas identified in Column 1 of Table 2 to a depth sufficient to ensure the staff can take decisions on the acceptance or refusal of dangerous goods offered for carriage by air;
- (b) staff who are engaged in ground handling, storage and loading of dangerous goods have received training to enable them to carry out their duties in respect of dangerous goods which covers as a minimum, the areas identified in Column 2 of Table 2 to a depth sufficient to ensure that an awareness is gained of the hazards associated with dangerous goods, how to identify such goods and how to handle and load them;
- (c) staff who are engaged in general cargo handling have received training to enable them to carry out their duties in respect of dangerous goods which covers as a minimum, the areas identified in Column 3 of Table 2 to a depth sufficient to ensure that an awareness is gained of the hazards associated with dangerous goods, how to identify such goods and how to handle and load them;
- (d) flight crew members have received training which covers as a minimum, the areas identified in Column 4 of Table 2 to a depth sufficient to ensure that an awareness is gained of the hazards associated with dangerous goods and how they should be carried on an aircraft;
- (e) passenger handling staff and security staff used by the operator who deal with the screening of passengers and their baggage and crew members, other than flight crew members, have received training which covers as a minimum, the areas identified in Column 5 of Table 2 to a depth sufficient to ensure that an awareness is gained of the hazards associated with dangerous goods and the requirements

that apply to the carriage of such goods by passengers or more generally, their carriage on an aircraft.

(4) An AOC holder shall ensure that—

- (a) all staff who require dangerous goods training receive recurrent training at intervals of not longer than 2 years;
- (b) the records of dangerous goods training are maintained for all staff trained in accordance with the provisions of this regulation; and
- (c) the handling agent’s staff are trained in accordance with the applicable column of Table 1 or Table 2.

TABLE 2

Areas Of Training	Column 1	Column 2	Column 3	Column 4	Column 5
General philosophy	X	X	X	X	X
Limitations on dangerous goods in the air transport				X	X
Classification and list of dangerous goods			X	X	X
General packing requirements and packing instructions			X		
Packaging specifications marking		X			
Package marking and labelling		X	X	X	X
Documentation from the shipper		X			
Acceptance of dangerous goods, including the use of a checklist				X	
Loading, restrictions on loading and segregation		X	X	X	X
Inspections for damage or leakage and decontamination procedures				X	X
Provision of information to the PIC		X	X	X	
Dangerous goods in passengers’ baggage			X		X
Emergency procedures	X	X	X	X	X

Note: “X” indicates an area to be covered

**86. Dangerous goods incident and accident reports**

An air operator certificate holder shall report to the Authority—

- (a) dangerous goods incidents and accidents; and
- (b) undeclared or misdeclared dangerous goods discovered in the cargo or passenger baggage within 72 hours of the incident, accident or discovery unless exceptional circumstances prevent such reporting within the time stipulated.

PART VIII—GENERAL

**87. Possession of the licence**

(1) A holder of a licence, certificate or authorisation issued by the Authority shall have it in his or her physical possession or at the work site when exercising the privileges of that licence, certificate or authorisation.

(2) A flight crew of a foreign registered aircraft shall hold a valid licence, certificate or authorisation and have it in his or her physical possession or at the work site when exercising the privileges of that licence, certificate or authorisation.

#### **88. Drug and alcohol testing and reporting**

(1) A person who performs any function requiring a licence, rating, qualification or authorisation prescribed by these Regulations directly or by contract under the provisions of these Regulations may be tested for drug or alcohol usage.

(2) Where the Authority or any person authorised by the Authority wishes to test a person referred to in sub regulation (1) for the percentage by weight of alcohol in the blood or for the presence of narcotic drugs, marijuana or depressant or stimulant drugs or substances in the body and that person—

(a) refuses to submit to the test; or

(b) having submitted to the test, refuses to authorise the release of the test results,

the Authority may suspend or revoke the certificate of the air operator certificate (AOC) holder that employs that person.

(3) In determining whether to suspend or revoke the certificate of the AOC holder, the Authority shall consider all relevant factors, including—

(a) whether the AOC holder had knowledge of the drug or alcohol use;

(b) whether the AOC holder encouraged the person to refuse the drug or alcohol test;

(c) whether the AOC holder dismissed the person who failed or refused the drug tests; or

(d) the position that person held with the AOC holder.

(4) The Authority shall require the AOC holder to show cause why that person should not be dismissed from the employment of the AOC holder.

(5) A person who is convicted, whether in or outside Uganda, for any offence relating to the growing, processing, manufacture, sale, disposition, possession, transportation or importation of narcotic drugs, marijuana or depressant or stimulant drugs or substances, shall be dismissed from the employment of the AOC holder.

(6) The Authority may suspend or revoke the certificate of an AOC holder that refuses to dismiss from its employment a person convicted under sub regulation (5).

#### **89. Inspection of licences and certificates**

A person who holds a licence, certificate or authorisation required by these Regulations shall present it for inspection upon a request from the Authority or any other person authorised by the Authority.

#### **90. Change of name**

(1) A holder of a licence, certificate or authorisation issued under these Regulations may apply to change the name on a license or certificate.

(2) The holder shall include with any such request—

(a) the current license or certificate; and

(b) a court order or other legal document verifying the name change.

(3) The Authority may change the licence, certificate or authorisation and issue a replacement thereof.

(4) The Authority shall return to the holder the original documents specified in sub-regulation 2(b) and retain copies thereof and return the replaced licence, certificate or authorisation with the appropriate endorsement.

#### **91. Change of address**

(1) A holder of a certificate or authorisation issued under these Regulations shall notify the Authority of the change in the physical and mailing address and shall do so in the case of—

(a) physical address, at least 14 days in advance; and

(b) mailing address, upon the change.

(2) A person who fails to notify the Authority of the change in the physical address within the time frame specified in sub-regulation (1) shall not exercise the privileges of the certificate or authorisation.

#### **92. Replacement of documents**

A person may apply to the Authority in the prescribed form for replacement of documents issued under these Regulations if such documents are lost or destroyed.

#### **93. Certificate suspension and revocation**

(1) The Authority may, where it considers it to be in the public interest, suspend provisionally, pending further investigation, any certificate, approval, permission, exemption, authorisation or other document issued, granted or having effect under these Regulations.

(2) The Authority may, upon the completion of an investigation which has shown sufficient ground to its satisfaction and where it considers it to be in the

public interest, revoke, suspend or vary any certificate, approval, permission, exemption or other document issued or granted under these Regulations.

(3) The Authority may, where it considers it to be in the public interest, prevent any person or aircraft from flying.

(4) A holder or any person having the possession or custody of any certificate, approval, permission, exemption or other documents which has been revoked, suspended or varied under these Regulations shall surrender it to the Authority within 14 days from the date of revocation, suspension or variation.

(5) The breach of any condition subject to which any certificate, approval, permission, exemption or any other document has been granted or issued under these Regulations shall render the document invalid during the continuance of the breach.

#### **94. Use and retention of documents and records**

(1) A person shall not—

(a) use any certificate, approval, permission, exemption or other document issued or required by or under these Regulations which has been forged, altered, revoked or suspended or to which he or she is not entitled;

(b) forge or alter any certificate, approval, permission, exemption or other document issued or required by or under these Regulations;

(c) lend any certificate, approval, permission, exemption or other document issued or required by or under these Regulations to any other person;  
or

(d) make any false representation for the purpose of procuring for himself or herself or any other person the grant, issue, renewal or variation of any such certificate, approval, permission or exemption or other document.

(2) During the period for which a record is required under these Regulations to be preserved, a person shall not mutilate, alter, render illegible or destroy any records or any entry made therein, required by or under these Regulations to be maintained or knowingly make or procure or assist in the making of, any false entry in any such record or wilfully omit to make a material entry in such record.

(3) A record required to be maintained by or under these Regulations shall be recorded in a permanent and indelible material.

(4) A person shall not issue any certificate, document or exemption under these Regulations unless he or she is authorised to do so by the Authority.

(5) A person shall not issue any certificate of the kind referred to in sub-regulation (4) unless that person is satisfied that all statements in the certificate are correct and that the applicant is qualified to hold that certificate.

#### **95. Reports of violation**

(1) A person who knows of a violation of the Civil Aviation Authority Act, or any regulation or order issued under the Act, shall report it to the Authority.

(2) The Authority will determine the nature and type of any additional investigation or enforcement action that need be taken.

#### **96. Enforcement of directions**

A person who fails to comply with any direction given to him or her by the Authority or by any authorised person under any provision of these Regulations shall be deemed for the purposes of these Regulations to have contravened that provision.

#### **97. Aeronautical user fees**

(1) The Authority may notify the fees to be charged in connection with the issue, validation, renewal, extension or variation of any certificate, licence or other document, including the issue of a copy thereof or the undergoing of any examination, test, inspection or investigation or the grant of any permission or approval, required by or for the purpose of these Regulations or any orders, notices or proclamations made thereunder.

(2) Upon an application being made in connection with which any fee is chargeable in accordance with the provisions of sub-regulation (1), the applicant shall be required, before the application is accepted, to pay the fee so chargeable.

(3) If, after that payment has been made, the application is withdrawn by the applicant or otherwise ceases to have effect or is refused, the Authority shall not refund the payment made.

#### **98. Application of Regulations to Government and visiting forces, etc**

(1) These Regulations shall apply to aircraft, not being military aircraft, belonging to or exclusively employed in the service of the Government and for the purposes of such application, the department or other authority for the time being responsible for management of the aircraft shall be deemed to be the operator of the aircraft and in the case of an aircraft belonging to the Government, to be the owner of the interest of the Government in the aircraft.

(2) Except as otherwise expressly provided, the naval, military and air force authorities and member of any visiting force and property held or used for the purpose of such a force shall be exempt from the provision of these Regulations to the same extent as if the visiting force formed part of the military force of Uganda.

#### **99. Extra-territorial application of Regulations**

Except where the context otherwise requires, the provisions of these Regulations—

- (a) in so far as they apply, whether by express reference or otherwise, to aircraft registered in Uganda, shall apply to such aircraft wherever they may be;

- (b) in so far as they apply, whether by express reference or otherwise, to other aircraft, shall apply to such aircraft when they are within Uganda;
- (c) in so far as they prohibit, require or regulate, whether by express reference or otherwise, the doing of anything by any person in or by any of the crew of, any aircraft registered in Uganda, shall apply to such persons and crew, wherever they may be; and
- (d) in so far as they prohibit, require or regulate, whether by express reference or otherwise, the doing of anything in relation to any aircraft registered in Uganda by other persons shall, where such persons are citizens of Uganda, apply to them wherever they may be.

## PART IX—OFFENCES AND PENALTIES

### **100. Contravention of Regulations**

A person who contravenes any provision of these Regulations may have his or her licence, certificate, approval, authorisation, exemption or other document revoked or suspended.

### **101. Offences and penalties**

(1) If any provision of these Regulations, orders, notices or proclamations made thereunder is contravened in relation to an aircraft, the operator of that aircraft and the pilot in command, if the operator or the PIC is not the person who contravened that provision shall, without prejudice to the liability of any other person under these Regulations for that contravention, be deemed to have contravened that provision unless he or she proves that the contravention occurred without his or her consent or connivance and that all due diligence was exercised to prevent the contravention.

(2) A person who contravenes any provision specified as an “A” provision in the Sixth Schedule to these Regulations commits an offence and is liable on conviction to a fine not exceeding one million shillings for each offence or to imprisonment for a term not exceeding one year or to both.

(3) A person who contravenes any provision specified as a “B” provision in the Sixth Schedule to these Regulations commits an offence and is liable on conviction to a fine not exceeding two million shillings for each offence or to imprisonment for a term not exceeding three years or to both.

(4) A person who contravenes any provision of these Regulations not being a provision referred to in the Sixth Schedule to these Regulations, commits an offence and is liable on conviction to a fine not exceeding two million shillings, and in the case of a second or subsequent conviction for the like offence to a fine not exceeding four million shillings.

## PART X—EXEMPTIONS

### **102. Requirements for application**

(1) A person may apply to the Authority for an exemption from any of these Regulations.

(2) An application for an exemption shall be submitted at least 60 days in advance of the proposed effective date, to obtain timely review.

(3) A request for an exemption must contain the applicant's—

- (a) name;
- (b) physical address and mailing address;
- (c) telephone number;
- (d) fax number if available; and
- (e) email address if available.

(4) The application shall be accompanied by a fee specified by the Authority.

### **103. Substance of the request for exemption**

(1) An application for an exemption shall contain the following—

- (a) a citation of the specific requirement from which the applicant seeks exemption;
- (b) an explanation of why the exemption is needed;
- (c) a description of the type of operations to be conducted under the proposed exemption;
- (d) the proposed duration of the exemption;
- (e) an explanation of how the exemption would be in the public interest, that is, benefit the public as a whole;
- (f) a detailed description of the alternative means by which the applicant will ensure a level of safety equivalent to that established by the regulation in question;
- (g) a review and discussion of any known safety concerns with the requirement, including information about any relevant accidents or incidents of which the applicant is aware; and

(2) Where the applicant seeks emergency processing, the application shall contain supporting facts and reasons that the application was not timely filed, and the reasons it is an emergency.

(3) The Authority may deny an application if the Authority finds that the applicant has not justified the failure to apply for an exemption in a timely fashion.

*Review, Publication and Issue or Denial of Exemptions*

**104. Initial review by the Authority**

(1) The Authority shall review the application for accuracy and compliance with the requirements of regulations 102 and 103.

(2) If the application appears on its face to satisfy the provisions of this regulation and the Authority determines that a review of its merits is justified, the Authority will publish a detailed summary of the application in either the *Uganda Gazette*, aeronautical information circular or at least one local daily newspaper for comment and specify the date by which comments must be received by the Authority for consideration.

(3) Where the filing requirements of regulations 102 and 103 have not been met, the Authority will notify the applicant and take no further action until and unless the applicant corrects the application and re-files it in accordance with these Regulations.

(4) If the request is for emergency relief, the Authority shall publish the application or the Authority's decision as soon as possible after processing the application.

**105. Evaluation of the request**

(1) After initial review, if the filing requirements have been satisfied, the Authority shall conduct an evaluation of the request to include—

- (a) determination of whether an exemption would be in the public interest;
- (b) a determination, after a technical evaluation of whether the applicant's proposal would provide a level of safety equivalent to that established by the regulation, although where the Authority decides that a technical evaluation of the request would impose a significant burden on the Authority's technical resources, the Authority may deny the exemption on that basis;
- (c) a determination of whether a grant of the exemption would contravene the applicable ICAO Standards and Recommended Practices; and
- (d) a recommendation based on the preceding elements, of whether the request should be granted or denied and of any conditions or limitations that should be part of the exemption.

(2) The Authority shall notify the applicant by letter and publish a detailed summary of its evaluation and decision to grant or deny the request.

(3) The summary referred to in sub-regulation (2) shall specify the duration of the exemption and any conditions or limitations of the exemption.

(4) If the exemption affects a significant population of the aviation community of Uganda the Authority shall publish the summary in aeronautical information circular.

## PART XI—TRANSITION AND SAVINGS

### **106. Transition and savings**

A valid licence, certificate, permit or authorisation issued or granted by the Authority before the commencement of these Regulations shall remain operational until it expires or is revoked, annulled or replaced.

## FIRST SCHEDULE

REG 30 (1) AND 31 (2)

### OPERATIONS MANUAL

An operations manual shall include each item set forth below which is applicable to the specific operation, unless otherwise approved by the Authority.

### OPERATIONS MANUAL

#### (A) GENERAL

##### 1.0 INTRODUCTION

1.1 Purpose and scope of manuals

1.2 A statement that the manual complies with all applicable Authority regulations and requirements and with the terms and conditions of the applicable air operator certificate.

1.3 A statement that the manual contains operational instructions that are to be complied with by the relevant personnel in the performance of their duties.

1.4 List of manuals comprising operations manual

1.5 A list and brief description of the various operations manual parts, their contents, applicability and use.

1.6 Manuals to be carried on aircraft

1.7 Responsibility for manual content

1.9 Responsibility for manual amendment

1.10 List of effective pages

1.11 Distribution of manuals and amendments

## 2.0 MANAGEMENT ORGANIZATION

2.1 A description of the organisational structure including the general company organisation and operations department organisation. The relationship between the operations department and the other departments of the company. In particular, the subordination and reporting lines of all divisions, departments etc., which pertain to the safety of flight operations, shall be shown.

2.2 Director of Operations-duties and responsibility;

2.3 Chief Pilot-duties and responsibility;

2.4 Director of Maintenance-duties and responsibility;

2.5 Quality Manager-duties and responsibility; and

2.6 Director of Safety-duties and responsibility.

2.7 Flying hours for management personnel

2.8 A description of the system for supervision of the operation by the AOC holder shall be listed. This description shall show how the safety of flight operations and the qualifications of personnel involved in all such operations are supervised and monitored. In particular, the procedures related to the following items shall be described:

(a) Competence of operations personnel; and

(b) Control, analysis and storage of records, flight documents, additional information, and safety related data.

2.9 A description of any system for promulgating information which may be of an operational nature but is supplementary to that in the operations manual. The applicability of this information and the responsibilities for its promulgation shall be included

2.10 A description of the main aspects of the flight safety programme including:

(a) Programmes to achieve and maintain risk awareness by all persons involved in flight operations; and

(b) Evaluation of accidents and incidents and the promulgation of related information.

2.11 A description of the objectives, procedures and responsibilities necessary to exercise operational control with respect to flight safety.

2.12 A description of the quality system adopted.

## (B) AIRCRAFT OPERATING INFORMATION

### 1.0 CREW TO BE CARRIED

1.1 Composition of crew

1.2 Minimum flight crew

1.3 Minimum number of cabin crew

1.4 Carriage of navigator

- 1.5 Carriage of flight engineer
- 1.6 Crew licenses
- 1.7 For the flight crew, operation on more than one type rating or variant.
  
- 2.0 DUTIES OF FLIGHT CREW AND OTHER CREW MEMBER STAFF
- 2.1 Designation of pilot-in-command
- 2.2 Authority of pilot-in-command
- 2.3 Duties of crew members
- 2.4 Briefing of passengers
- 2.5 Necessity of pilots to remain at controls
- 2.6 Co-pilot handling of the aircraft
- 2.7 Refuelling duties/responsibilities
- 2.8 Loading by flight crew
  
- 3.0 DUTIES AND RESPONSIBILITIES OF FLIGHT OPERATIONS OFFICER AND OTHER PERSONNEL
- 3.1 The general principles of mass and centre of gravity including:
  - (a) the policy for using either standard and/or actual masses;
  - (b) the method for determining the applicable passenger, baggage and cargo mass;
  - (c) the applicable passenger and baggage masses for various types of operations and aircraft type;
  - (d) general instruction and information necessary for verification of the various types of mass and balance documentation in use;
  - (e) last minute changes procedures; and
  - (g) seating policy/procedures.
- 3.2 A description of the handling procedures to be used when allocating seats and embarking and disembarking passengers and when loading and unloading the aircraft. Further procedures, aimed at achieving safety whilst the aircraft is on the ramp, shall also be given. Handling procedures shall include:
  - (a) sick passengers and persons with reduced mobility;
  - (b) permissible size and weight of hand baggage;
  - (c) loading and securing of items in the aircraft;
  - (d) special loads and classification of load compartments (i.e., dangerous goods, live animals, etc.);
  - (e) positioning of ground equipment;
  - (f) operation of aircraft doors;
  - (g) safety on the ramp, including fire prevention, blast and suction areas;
  - (h) start-up, ramp departure and arrival procedures;
  - (i) servicing of aircraft;

- (j) documents and forms;
  - (k) multiple occupancy of aircraft seats.
- 3.3 Procedures to ensure that persons who appear to be intoxicated or who demonstrate by manner or physical indications that they are under the influence of alcohol or drugs, except medical patients under proper care, are refused embarkation.
- 3.4 A description of the de-icing and anti-icing policy and procedures for aircraft on the ground. These shall include descriptions of the types and effects of icing and other contaminants on aircraft while stationary, during ground movements and during take-off. In addition, a description of the fluid types used shall be given including:
- (a) proprietary or commercial names;
  - (b) characteristics;
  - (c) effects on aircraft performance;
  - (d) precautions during usage.
- 3.5 Specifications for the operational flight plan
- 4.0 COCKPIT MANAGEMENT
- 4.1 Pre-flight action by pilot-in-command
- 4.2 Departure and approach briefing
- 4.3 Instructions on the clarification and acceptance of ATC clearances, particularly where terrain clearance is involved
- 4.4 Procedures covering:
- (a) cabin preparation for flight, inflight requirements and preparation for landing including procedures for securing cabin and galleys.
  - (b) procedures to ensure that passengers are seated where, in the event that an emergency evacuation is required, they may best assist and not hinder evacuation from the aircraft;
  - (c) procedures to be followed during passenger embarkation and disembarkation; and
  - (d) procedures for fuelling with passengers on board, embarking, or disembarking.
  - (e) smoking on board.
  - (f) use of portable electronic equipment and cellular telephones
- 4.5 The contents, means and timing of passenger briefing.
- 4.6 Succession to command.
- 4.7 Normal duties.
- 4.8 Flight crew - division of duties and procedures during night and IMC instrument approaches and landing operations.
- 4.9 Flight crew - procedures to be followed in event of incapacitation. Examples of the types of incapacitation and the means for recognising them shall be included.
- 4.10 Flight crew - acknowledgement of calls during take-off and landing;
- 4.11 Flight crew - querying of deviations from flight plan;
- 4.12 Flight crew - consumption of alcohol, narcotics and drugs;

- 4.13 Flight crew - wearing of harness for take-off and landing;
- 4.14 Flight crew - simulation of emergencies not permitted when carrying passengers;
- 4.15 Crew members - physiological factors;
- 4.16 Operation of radio in aircraft;
- 4.17 Radio checking procedure;
- 4.18 Altimeter checking procedure;
- 4.19 Operation of flight data recorder.
- 4.20 Procedures for the use of cosmic or solar radiation detection equipment and for recording its readings including actions to be taken in the event that limit values specified in the operations manual are exceeded. In addition, the procedures, including ATC procedures, to be followed in the event that a decision to descend or re-route is taken.
- 4.21 All Weather Operations
- 4.22 Use of the Minimum Equipment List and Configuration Deviation List
- 4.23 Procedures and limitations for:
  - (a) training flights;
  - (b) test flights;
  - (c) delivery flights,
  - (d) ferry flights;
  - (e) demonstration flights; and
  - (f) positioning flights, including the kind of persons who may be carried on such flights.
- 4.24 Rules of the air including the ground/air visual codes for use by survivors, description and use of signal aids;
- 4.25 Emergency evacuation procedures;
- 4.26 Procedures in event of pressurization failure.
- 4.27 Procedure for use of ground-air visual signal code by survivors

## 5.0 FLIGHT TIME LIMITATIONS

- 5.1 Definitions of:
  - (a) flight time;
  - (b) duty period;
  - (c) flying duty period;
  - (d) split duty;
  - (e) positioning;
  - (f) standby duty;

- (g) rest period;
  - (h) time-off;
  - (i) day;
  - (j) local daylight;
  - (k) local time;
- 5.2 Requirement of scheme to regulate flight times;
- 5.3 Maximum duty period - two pilot crew- aeroplane;
- 5.4 Maximum duty period - single pilot crew- aeroplane;
- 5.5 Maximum duty period - two pilot crew- helicopter;
- 5.6 Maximum duty period - single pilot crew- helicopter;
- 5.7 Particular cases:
- (a) extension of duty period by in-flight relief;
  - (b) split duty;
  - (c) positioning (dead-heading);
  - (d) standby duty;
  - (e) travelling time;
  - (f) pilot-in-command's discretion to extend flying duty period.
- 5.8 Minimum rest periods;
- 5.9 Pilot-in-command's discretion to reduce rest period;
- 5.10 Cumulative duty and flying hours;
- (a) maximum weekly duty hours;
  - (b) maximum monthly duty hours;
  - (c) maximum monthly flying hours;
  - (d) maximum monthly annual flying hours.
- 5.11 Duty cycles and time-off duty:
- (a) normal duty cycles;
  - (b) short breaks away from base;
  - (c) time off at base.
- 5.12 Records to be maintained for each crew member.
- 5.13 Scheme for regulation of flight times for cabin crew.
- 5.14 Responsibilities of all crew members.
- 6.0 ADMINISTRATION
- 6.1 General requirements for AOC;

- 6.2 Application for AOC;
- 6.3 Requirement for air transport licence;
- 6.4 Form of certificate;
- 6.5 Renewal of certificate;
- 6.6 Variation of certificate;
- 6.7 Revocation of certificate;
- 6.8 Exits and break-in markings;
- 6.9 Drunkenness in aircraft;
- 6.10 Smoking in aircraft;
- 6.11 Imperilling safety of aircraft;
- 6.12 Stowaways;
- 6.13 Carriage of livestock;
- 6.14 Carriage of dangerous goods;
- 6.15 Carriage of weapons of war;
- 6.16 Carriage of unauthorized persons;
- 6.17 A description of security policies and procedures for handling and reporting crime on board such as unlawful interference, sabotage, bomb threats, and hijacking.
- 6.18 Security instructions and guidance of a non-confidential nature which shall include the authority and responsibilities of operations personnel.
- 6.19 A description of preventative security measures and training. (Note: Parts of the security instructions and guidance may be kept confidential.)
- 6.20 Vehicle ferry operations;
- 6.21 Provision of navigation flight plan forms;
- 6.22 Provision of pilot-in-command's brief;
- 6.23 Provision of operations library;
- 6.24 Filing airmiss reports;
- 6.25 Procedures for the handling, notifying and reporting of accidents and occurrences. This section shall include—
  - (a) definitions of accidents and occurrences and the relevant responsibilities of all persons involved;
  - (b) the descriptions of which company departments, Authorities or other institutions have to be notified by which means and in which sequence in case of an accident;

- (c) special notification requirements in the event of an accident or occurrence when dangerous goods are being carried;
- (d) a description of the requirements to report specific occurrences and accidents;
- (e) the forms used for reporting and the procedure for submitting them to the Authority shall also be included; and
- (f) if the AOC holder develops additional safety related reporting procedures for its own internal use, a description of the applicability and related forms to be used.

6.26 Allowable deficiencies;

6.27 Use of flight plans;

6.28 Use of technical log;

6.29 Method of deferring defects approved by the Authority;

6.30 Carriage of Authority Inspectors.

## 7.0 STANDARD AND EMERGENCY CHECKLISTS

7.1 Drills and checks to be listed in full in the operative manual;

7.2 Checks required prior to take-off;

7.3 Checks required prior to landing;

7.4 Checking/setting Vref;

7.5 Check of safety altitude before descent;

7.6 Emergency drill-items to be covered;

7.7 Checklists for two pilot crews;

7.8 Checklist for flight engineers

7.9 Checklist for single pilot crews;

7.10 Instruction that checklist must be used;

7.11 Requirement for cabin crew to be issued with individual copies of emergency evacuation duties.

7.12 Instructions on the use of autopilot and auto throttle in IMC

## 8.0 FUEL FLIGHT PLANNING AND RECORDS

8.1 Flight planning formula;

8.2 Island reserve;

8.3 Rules for replanning in flight;

8.4 Effect on fuel consumption of use of ancillary equipment;

8.5 Effect on fuel consumption of engine or system failures;

- 8.6 Fuel consumption records in flight (every hour);
- 8.7 Records of uplift and fuel states;
- 8.8 Retention of fuel records:
  - (a) technical logs; and
  - (b) in-flight records.
- 8.9 Retention of fuel records and navigation logs;
- 8.10 Refuelling with passengers on board - special instructions;
- 8.11 Fumes in aircraft;
- 8.12 Jettisoning fuel - special precaution

## (C) AREAS, ROUTES AND AERODROMES

### 1.0 ROUTE OPERATING INFORMATION

- 1.1 Company policy on:
  - (a) flights on and off airways;
  - (b) nomination of alternate aerodromes (heliports):
  - (c) operation of VFR flights; and
  - (d) cancellation of IFR flight plans.
- 1.2 Details of AOC area of operations;
- 1.3 Details of navigation area restrictions;
- 1.4 Procedure or visual signals on intercept
- 1.5 Details of radio area restrictions;
- 1.6 Definition of public transport;
- 1.7 Flight plan/navigation forms - items to be provided for:
  - (a) to be retained for six months; and
  - (b) Exceptions to the above requirement.
- 1.8 Use of prepared navigational flight plans;
- 1.9 Where relevant Long range and ETOPS procedures
- 1.10 Navigation log forms for use by navigators;
- 1.11 Radio equipment required to be carried;
- 1.12 Operation of radio in aircraft;
- 1.13 Procedure for pilot-in-command observing an accident
- 1.14 Radio failure procedures;

- 1.15 Minimum safe altitudes and methods of determining the MSA;
- 1.16 Procedures for operating above 15000 m (49000ft);
- 1.17 Terrain clearance following loss of engine(s);
- 1.18 Minimum aerodrome facilities for approach and landing
- 1.19 Methods for determining aerodrome operating minima;
- 1.20 Documents to be carried on commercial air transport aircraft;
- 1.21 Details of aircraft library and navigation bag;
- 1.22 Flying staff instructions or notices:
  - (a) operational;
  - (b) technical;
  - (c) administration; and
  - (d) time limit after issue.
- 1.23 Requirement to carry life rafts;
- 1.24 Provision and use of oxygen;
- 1.25 Briefing of passengers in use of oxygen;
- 1.26 Noise abatement procedures;
- 1.27 Allowable deficiencies-guidance to pilots-in-command.
- 1.28 Procedures for operating in, and/or avoiding, and reporting potentially hazardous atmospheric conditions including:
  - (a) thunderstorms;
  - (b) icing conditions;
  - (c) turbulence,
  - (d) windshear;
  - (e) jet stream;
  - (f) volcanic ash clouds;
  - (g) heavy precipitation;
  - (h) sand storms;
  - (i) mountain waves; and
  - (j) significant temperature inversions.
- 1.29 Procedure for familiarization with areas, routes and aerodromes
- 1.30 The following operating restrictions:
  - (a) cold weather operations
  - (b) take-off and landing in turbulence
  - (c) low-level wind shear operations

- (d) cross-wind operations (including tail wind components)
- (e) high temperature operations
- (f) high altitude operations.

## 2.0 AERODROME OPERATING MINIMA

- 2.1 Operating minima to be included for every airfield used regularly in respect of take-off, landing and visual manoeuvring;
- 2.2 Runways NOT to be used to be clearly indicated;
- 2.3 Conditions for commencing a flight and departure contingency procedures;
- 2.4 Conditions for commencing or continuing an approach;
- 2.5 Stabilized approach procedures and limitations on high rates of descend near the surface
- 2.6 Definitions of:
  - (a) decision height;
  - (b) approach to landing;
  - (c) circling approach procedures; and
  - (d) RVR, etc.
  - (e) stabilized approach
- 2.7 Minima for pilots-in-command with limited experience on type;
- 2.8 Take-off and landing when an RVR is reported;
- 2.9 Take-off and landing when RVR is reported from more than one position on the runway;
- 2.10 Instructions concerning landing in shallow fog;
- 2.11 Alternate for each intended destination to be specified;
- 2.12 General guidance concerning selection of alternate aerodrome;
- 2.13 Guidance concerning selection of 'return' alternate;
- 2.14 Instructions concerning the use of return alternate-weather below landing minima;
- 2.15 Minima for aerodromes without approach aids;
- 2.16 Special minima for non-public transport flights;
- 2.17 Special rules for aircraft with performance category C, D or E;
- 2.18 Calculation of in-flight visibility for manoeuvring;
- 2.19 Relationship between RVR and DH;
- 2.20 Conversion of reported MET visibility to RVR; and
- 2.21 Explanatory material on the decoding of MET forecasts and MET reports relevant to the area of operations, including the interpretation of conditional expressions.

### 3.0 PERFORMANCE DATA

- 3.1 Simplified Regulated Take Off Mass (RTOM) or landing mass data;
- 3.2 Calculation of VNO, VNe, etc.;
- 3.3 Calculation of V1, V2 and Vref;
- 3.4 En-route performance, limitations;
- 3.5 Flights over water;
- 3.6 Effect on performance of take-off procedures at particular aerodromes
- 3.7 Effect of noise abatement requirements;
- 3.8 Abnormal pressurization affecting performance;
- 3.9 Definitions of:
  - (a) landing distance;
  - (b) take-off distance; and
  - (c) emergency distance, etc.
- 3.10 Factors arising from runway surface conditions;
  - (a) water;
  - (b) snow and slush;
  - (c) ice; and
  - (d) grass.
- 3.11 Minimum strip width after snow clearance;
- 3.12 Cross-wind limitations;
- 3.13 Maximum wind velocity - light aircraft;
- 3.14 Airworthiness or flight manual approval for above;
- 3.15 Flight manual performance figures;
- 3.16 Compliance with any special handling instructions NOT specified in Certificate of Airworthiness or Flight Manual;
- 3.17 Ferry flights with one engine inoperative;
- 3.18 Handling techniques - one engine inoperative;
- 3.19 Weather and route limitations; and
- 3.20 Fuel consumption.

### 4.0 TECHNICAL INFORMATION

- 4.1 Airframe loading particulars;
- 4.2 Simplified description of systems;
- 4.3 System pressures;
- 4.4 Fuel system;

- 4.5 Flying controls, etc.;
- 4.6 Airframe limitations:
  - (a) VNO;
  - (b) VNE; and
  - (c) VMO/MMO, etc.;
- 4.7 Engine - basic details;
- 4.8 Engine limitations;
- 4.9 Engine handling procedures;
- 4.10 Approved types of:
  - (a) fuel;
  - (b) oil;
  - (c) coolant;
  - (d) hydraulic fluid;
  - (e) water/methanol;
  - (f) anti-icing fluid, etc.;
- 4.11 Replenishment of all systems;
- 4.12 Refuelling or de-fuelling;
- 4.13 Operating instructions - all systems;
- 4.14 Electrical;
- 4.15 Hydraulic;
- 4.16 Brakes;
- 4.17 Anti-icing;
- 4.18 Oxygen, etc.;
- 4.19 Radio equipment - general description;
- 4.20 Radio equipment - operating instructions;
- 4.21 Operating instructions for:
  - (a) auto-pilot;
  - (b) flight director system;
  - (c) flight recorder; and
  - (d) special navigation equipment, etc.
- 4.22 Pre-flight inspections by crew;

- 4.23 Abnormal drills;
  - (a) inverter failure;
  - (b) flight systems failures, etc.;
- 4.24 Aircraft handling techniques:
  - (a) following loss of engine;
  - (b) in turbulence; and
  - (c) on slippery surfaces, etc.;
- 4.2 Safety precautions (no smoking);
- 4.26 Operation with defective fuel tank;
- 4.27 Method of use of oxygen.

(D) TRAINING

1.0 Training Syllabi And Checking Programmes

1.1 General Requirements.

Training syllabi and checking programmes for all operations personnel assigned to operational duties in connection with the preparation and/or conduct of a flight shall be developed to meet the respective requirements of the Authority. An AOC holder may not use, nor may any person serve in a required crew member capacity or operational capacity unless that person meets the training and currency requirements established by the Authority for that respective position.

1.2 Flight Crew.

The training syllabi and checking programmes for flight crew members shall include:

- (a) a written training programme acceptable to the Authority that provides for initial, transition, difference, and recurrent training, as appropriate, for cockpit crew members for each type of aircraft flown by that crew member. This written training programme shall include both normal and emergency procedures training applicable for each type of aircraft flown by the crew member.
- (b) adequate ground and flight training facilities and properly qualified instructors required to meet training objectives and needs.
- (c) a current list of approved training materials, equipment, training devices, simulators, and other required training items needed to meet the training needs for each type and variation of aircraft flown by the AOC holder.
- (d) adequate numbers of ground, flight, and check pilots to ensure adequate training and flight testing of flight crew members.
- (e) a record system acceptable to the Authority to show compliance with appropriate training and currency requirements.

1.3 Cabin Crew.

The training syllabi and checking programmes for cabin crew members shall include:

- (a) basic initial ground training covering duties and responsibilities.

- (b) appropriate Authority rules and regulations.
- (c) appropriate portions of the AOC holder's operating manual.
- (d) appropriate emergency training as required by the Authority and the AOC holder's operating manual.
- (e) appropriate flight training.
- (f) appropriate recurrent, upgrade, or difference training, as required, to maintain currency in both type and any variance the crew member may be required to work in.
- (g) maintain a training record system acceptable to the Authority to show compliance with all required training.

#### 1.4 All Aircraft Crew.

A written training programme shall be developed for all aircraft crew members in the emergency procedures appropriate to each make and model of aircraft flown in by the crew member. Areas shall include:

- (a) instruction in emergency procedures, assignments, and crew co-ordination.
- (b) individual instruction in the use of onboard emergency equipment such as fire extinguishers, emergency breathing equipment, first aid equipment and its proper use, emergency exits and evacuation slides, and the aircraft's oxygen system including the use of portable emergency oxygen bottles. Cockpit crew members shall also practice using their emergency equipment designed to protect them in case of a cockpit fire or smoke.
- (c) training shall also include instruction in potential emergencies such as rapid decompression, ditching, fire fighting, aircraft evacuation, medical emergencies, hijacking, and disruptive passengers.
- (d) scheduled recurrent training to meet Authority requirements.

#### 1.5 All Operations Personnel.

The training syllabi and checking programmes for all operations personnel shall include:

- (a) training in the safe transportation and recognition of all dangerous goods permitted by the Authority to be shipped by air. Training shall include the proper packaging, marking, labelling, and documentation of dangerous articles and magnetised materials.
- (b) all appropriate security training required by the Authority.
- (c) a method of providing any required notification of an accident or incident involving dangerous good.

#### 1.6 Operations Personnel Other Than Aircraft Crew.

Operations personnel other than aircraft crew (e.g., flight operations officer, handling personnel etc.), a written training programme shall be developed that pertains to their respective duties. The training programme shall provide for initial, recurrent, and any required upgrade training.

### 2.0 Procedures for Training and Checking

#### 2.1 Proficiency Checking Procedure

Procedures to be applied in the event that personnel do not achieve or maintain the required standards.

- 2.2 Procedures Involving the Simulation of Abnormal or Emergency Situations.  
Procedures to ensure that abnormal or emergency situations requiring the application of part or all of abnormal or emergency procedures, and simulation of IMC by artificial means, are not simulated during commercial air transportation flights.
- 3.0 Document Retention
- 3.1 Documentation To Be Stored And Storage Periods  
An AOC holder shall retain all documentation required by appropriate Authority or the Authority of a foreign country in which the AOC holder is operating for the time specified by the respective Authority or for the time period needed to show compliance with appropriate regulations or this operations manual, whichever is longer.

## SECOND SCHEDULE

*Regulation 36(3)*

### AIRCRAFT OPERATING MANUAL

- 1.0 General Information and Units of Measurement
- 1.1 General Information (e.g. aircraft dimensions), including a description of the units of measurement used for the operation of the aircraft type concerned and conversion tables.
- 2.0 Limitations
- 2.1 Certification and Operational Limitations  
A description of the certified limitations and the applicable operational limitations including:
  - (a) certification status;

- (b) an approved-passenger seating configuration for each aircraft type including a pictorial presentation;
- (c) types of operation that are approved (e.g. IFR/VFR, CAT II/III, flights in known icing conditions etc.);
- (d) crew composition;
- (e) operating within mass and centre of gravity limitations;
- (f) speed limitations;
- (g) flight envelopes;
- (h) wind limits including operations on contaminated runways;
- (i) performance limitations for applicable configurations;
- (j) runway slope;
- (k) limitations on wet or contaminated runways;
- (l) airframe contamination; and
- (m) post landing

### 3.0 Operating Procedures

#### 3.1 Normal Procedures

The normal procedures and duties assigned to the crew, the appropriate checklists, the system for use of the checklists and a statement covering the necessary co-ordination procedures between flight and cabin crew. The following normal procedures and duties shall be included:

- (a) pre-flight;
- (b) pre-departure and loading;
- (c) altimeter setting and checking;
- (d) taxi, Take-Off and Climb;
- (e) noise abatement;
- (f) cruise and descent;
- (g) approach, landing preparation and briefing;
- (h) VFR approach;
- (i) instrument approach;
- (j) visual approach and circling;
- (k) missed approach;
- (l) normal landing;
- (m) post landing; and
- (n) operation on wet and contaminated runways.

#### 3.2 Specific Cockpit Procedures

- (a) determining airworthiness of aircraft
- (b) obtaining flight release
- (c) initial cockpit preparation
- (d) standard operating procedures
- (e) cockpit discipline
- (f) standard call-outs
- (g) communications
- (h) flight safety
- (i) push-back and towing procedures
- (j) taxi guidelines and ramp signals
- (k) take-off and climb out procedures
- (l) choice of runway
- (m) take-off in limited visibility
- (n) take-off in adverse weather
- (o) use and limitations of weather radar
- (p) use of landing lights
- (q) monitoring of flight instruments
- (r) power settings for take-off
- (s) malfunctions during take-off
- (t) rejected take-off decision
- (u) climb, best angle, best rate
- (v) sterile cockpit procedures
- (w) en route and holding procedures
- (x) cruise control
- (y) navigation log book
- (z) descent, approach and landing procedures
- (aa) standard call-outs
- (bb) reporting maintenance problems
- (cc) how to obtain maintenance and service en route

### 3.3 Abnormal and Emergency Procedures

The manual shall contain a listing of abnormal and emergency procedures assigned to crew members with appropriate check-lists that include a system for use of the check-lists and a statement covering the necessary co-ordination procedures between flight and cabin crew. The following abnormal and emergency procedures and duties shall be included:

- (a) crew incapacitation;

- (b) fire and smoke drills;
- (c) unpressurised and partially pressurised flight;
- (d) exceeding structural limits such as overweight landing;
- (e) exceeding cosmic radiation limits;
- (f) lightning strikes
- (g) distress communications and alerting ATC to emergencies;
- (h) engine failure;
- (i) system failures;
- (j) guidance for diversion in case of serious technical failure;
- (k) ground proximity warning;
- (l) TCAS warning;
- (m) windshear; and
- (n) emergency landing/ditching.
- (o) aircraft evacuation
- (p) fuel Jettisoning and Overweight Landing:
  - \* General considerations and policy
  - \* Fuel jettisoning procedures and precautions
- (q) emergency Procedures:
  - \* Emergency descent
  - \* Low fuel
  - \* Dangerous goods incident or accident
- (r) interception procedures
- (s) emergency signal for cabin attendants
- (t) communication Procedures
- (u) radio listening watch

#### 4.0 Performance Data

4.1 Performance data shall be provided in a form in which it can be used without difficulty.

4.2 Performance material which provides the necessary data to allow the flight crew to comply with the approved aircraft flight manual performance requirements shall be included to allow the determination of—

- (a) take-off climb limits - Mass, Altitude, Temperature;
- (b) take-off field length (dry, wet, contaminated);
- (c) net flight path data for obstacle clearance calculation or, where applicable, take-off flight path;

- (d) the gradient losses for banked climb outs;
- (e) en route climb limits;
- (f) approach climb limits;
- (g) landing climb limits;
- (h) landing field length (dry, wet, contaminated) including the effects of an inflight failure of a system or device, if it affects the landing distance;
- (i) brake energy limits; and
- (j) speeds applicable for the various flight stages (also considering wet or contaminated runways).

#### 4.3 Supplementary Performance Data

Supplementary data covering flights in icing conditions. Any certified performance related to an allowable configuration, or configuration deviation, such as anti-skid inoperative, shall be included.

#### 4.4 Other Acceptable Performance Data

If performance data, as required for the appropriate performance class, is not available in the approved AFM, then other data acceptable to the Authority shall be included. Alternatively, the operations manual may contain cross-reference to the approved data contained in the AFM where such data is not likely to be used often or in an emergency.

#### 4.5 Additional Performance Data.

Additional performance data where applicable including:

- (a) all engine climb gradients;
- (b) drift-down data;
- (c) effect of de-icing/anti-icing fluids;
- (d) flight with landing gear down;
- (e) for aircraft with three or more engines, one engine inoperative ferry flights; and
- (f) flights conducted under the provisions of a configuration deviation list (CDL).

#### 5.0 Flight Planning

##### 5.1 Flight Planning Data

Data and instructions necessary for pre-flight and inflight planning including factors such as speed schedules and power settings. Where applicable, procedures for engine(s) out operations, ETOPS and flights to isolated airports shall be included.

##### 5.2 Fuel Calculations

The method for calculating fuel needed for the various stages of flight.

#### 6.0 Mass And Balance.

##### 6.1 Calculating Mass and Balance

Instructions and data for the calculation of mass and balance including:

- (a) calculation system (e.g. Index system);

- (b) information and instructions for completion of mass and balance documentation, including manual and computer generated types;
  - (c) limiting mass and centre of gravity of the various versions;
  - (d) dry operating mass and corresponding centre of gravity or index.
- 7.0 Loading.
- 7.1 Loading Procedures  
Procedures and provisions for loading and securing the load in the aircraft.
- 7.2 Loading Dangerous Goods  
The operations manual shall contain a method to notify the PIC when dangerous goods is loaded in the aircraft.
- 8.0 Survival And Emergency Equipment Including Oxygen
- 8.1 List of Survival Equipment to be Carried  
A list of the survival equipment to be carried for the routes to be flown and the procedures for checking the serviceability of this equipment prior to take-off. Instructions regarding the location, accessibility and use of survival and emergency equipment and its associated check list(s) shall also be included.
- 8.2 Oxygen Usage  
The procedure for determining the amount of oxygen required and the quantity that is available. The flight profile, number of occupants and possible cabin decompression shall be considered. The information provided shall be in a form in which it can be used without difficulty.
- 8.3 Emergency Equipment Usage  
A description of the proper use of the following emergency equipment:
- (a) life jackets
  - (b) life rafts
  - (c) medical kits/first aid kits
  - (d) survival kits
  - (e) emergency locator transmitter (ELT)
  - (f) visual signalling devices
  - (g) evacuation slides
  - (h) emergency lighting
- 9.0 Emergency Evacuation Procedures
- 9.1 Instructions for Emergency Evacuation  
Instructions for preparation for emergency evacuation including, crew co-ordination and emergency station assignment.

## 9.2 Emergency Evacuation Procedures

A description of the duties of all members of the crew for the rapid evacuation of an aircraft and the handling of the passengers in the event of a forced landing, ditching or other emergency.

## 10.0 Aircraft Systems.

### 10. Aircraft Systems

A description of the aircraft systems, related controls and indications and operating instructions.

## 11.0 Route and Airport Instructions and Information (optional for this manual)

### 11.1 Instructions and Information

Instructions and information relating to communications, navigation and airports including minimum flight levels and altitudes for each route to be flown and operating minima for each airport planned to be used, including:

- (a) minimum flight level/altitude;
- (b) operating minima for departure, destination and alternate airports;
- (c) communication facilities and navigation aids;
- (d) runway data and airport facilities;
- (e) approach, missed approach and departure procedures including noise abatement procedures;
- (f) communications-failure procedures;
- (g) search and rescue facilities in the area over which the aircraft is to be flown;
- (h) a description of the aeronautical charts that shall be carried on board in relation to the type of flight and the route to be flown, including the method to check their validity;
- (i) availability of aeronautical information and MET services;
- (j) en route COM/NAV procedures, including holding;
- (k) airport categorisation for flight crew competence qualification.

## THIRD SCHEDULE

*Regulation 43(3)*

### CABIN CREW MEMBER MANUAL

- 1.0 General
  - 1.1 Manual record of revision sheet and effective list of pages
  - 1.2 How to use the manual
  - 1.3 Where to obtain revisions
  - 1.4 How to revise the manual
  - 1.5 Cabin crew members' responsibilities regarding the manual
- 2.0 Organization
  - 2.1 Duties and responsibilities of each airline employee
  - 2.2 Focal points for all company procedural and training manuals
- 3.0 Government Regulations and Requirements and Related Company Policies
  - 3.1 Routine/normal operating procedures
- 4.0 Passenger Handling
  - 4.1 Handicapped and disabled passengers
  - 4.2 Interference
  - 4.3 Current security procedures
  - 4.4 Carriage of assist animals versus carriage of pets (company policy)
- 5.0 General Emergency Procedures
  - 5.1 Decompression
  - 5.2 Procedures for planned and unplanned evacuation on land and in water
    - (a) cabin preparation
    - (b) securing of cabin and galley
    - (c) review of passenger safety procedures and survival equipment
    - (d) brace positions
    - (e) able-bodies passenger briefing and procedures
  - 5.3 Brace Positions for Passengers and Crew

- (a) forward and aft seats
  - (b) high and low density seating
- 5.4 Abnormal Procedures
- (a) engine torching
  - (b) passenger initiation of evacuation
  - (c) passenger reporting of unsafe conditions of aircraft or other passengers
- 5.5 Turbulence
- 6.0 First Aid
- 6.1 Illness and Injuries
- 6.2 Symptoms
- 6.3 Immediate Treatment
- 6.4 Universal Precautions
- 6.5 Bloodborne Pathogens
- 6.6 Use of Medical Equipment and First Aid Equipment
- 7.0 Aircraft Specific Sections  
(This should include one section for each type of aircraft to include differences within the same type of aircraft).
- 7.1 Description of Particular Aircraft from Nose to Tail
- (a) description
  - (b) operation
  - (c) pre-flight of all equipment, including passenger convenience item through emergency equipment, stowage areas and placarding.
- 7.2 Reporting Procedures of Inoperative Equipment and Emergencies Procedures Specific to Each Aircraft Type
- 8.0 International Rules/Regulations/Paperwork

#### FOURTH SCHEDULE

*Regulation 54(2)*

### FLIGHT SAFETY DOCUMENTS SYSTEM

#### 1. INTRODUCTION

- 1.1 The guidelines in this Schedule address the major aspects of an operator's flight safety documents system development process, with the aim of ensuring compliance with these Regulations.
- 1.2 The guidelines are based not only upon scientific research, but also upon current best industry practices, with an emphasis on a high degree of operational relevance.

## 2. Organization

- 2.1 A flight safety documents system shall be organized according to criteria, which ensure easy access to information, required for flight and ground operations contained in the various operational documents comprising the system and which facilitate management of the distribution and revision of operational documents.
- 2.2 Information contained in a flight safety documents system shall be grouped according to the importance and use of the information, as follows:
  - (a) time critical information, e.g., information that can jeopardize the safety of the operation if not immediately available;
  - (b) time sensitive information, e.g., information that can affect the level of safety or delay the operation if not available in a short time period;
  - (c) frequently used information;
  - (d) reference information, e.g., information that is required for the operation but does not fall under b) or c) above; and
  - (e) information that can be grouped based on the phase of operation in which it is used.
- 2.3 Time critical information shall be placed early and prominently in the flight safety documents system.
- 2.4 Time critical information, time sensitive information, and frequently used information shall be placed in cards and quick-reference guides.

## 3. Validation

A flight safety documents system shall be validated before deployment, under realistic conditions. Validation shall involve the critical aspects of the information use, in order to verify its effectiveness. Interactions among all groups that can occur during operations shall also be included in the validation process.

## 4. Design

- 4.1 A flight safety documents system shall maintain consistency in terminology and in the use of standard terms for common items and actions.
- 4.2 Operational documents shall include a glossary of terms, acronyms and their standard definition, updated on a regular basis to ensure access to the most recent terminology. All significant terms, acronyms and abbreviations included in the flight documents system shall be defined.
- 4.3 A flight safety documents system shall ensure standardization across document types, including writing style, terminology, use of graphics and symbols, and formatting across documents. This includes a consistent location of specific types of information, consistent use of units of measurement and consistent use of codes.
- 4.4 A flight safety documents system shall include a master index to locate, in a timely manner, information included in more than one operational document.

Note.-The master index must be placed in the front of each document and consist of no more than three levels of indexing. Pages containing abnormal and emergency information must be tabbed for direct access.

4.5 A flight safety documents system shall comply with the requirements of the operator's quality system, if applicable.

5. Deployment

Operators shall monitor deployment of the flight safety documents system, to ensure appropriate and realistic use of the documents, based on the characteristics of the operational environment and in a way which is both operationally relevant and beneficial to operational personnel. This monitoring shall include a formal feedback system for obtaining input from operational personnel.

6. Amendment

6.1 Operators shall develop an information gathering, review, distribution and revision control system to process information and data obtained from all sources relevant to the type of operation conducted, including, but not limited to, the State of the Operator, State of design, State of Registry, manufacturers and equipment vendors.

Note.-Manufacturers provide information for the operation of specific aircraft that emphasizes the aircraft systems and procedures under conditions that may not fully match the requirements of operators. Operators shall ensure that such information meets their specific needs and those of the local authority.

6.2 Operators shall develop an information gathering, review and distribution system to process information resulting from changes that originate within the operator, including:

- (a) changes resulting from the installation of new equipment;
- (b) changes in response to operating experience;
- (c) changes in an operator's policies and procedures;
- (d) changes in an operator certificate; and
- (e) changes for purposes of maintaining cross fleet standardization.

Note.-Operators shall ensure that crew coordination philosophy, policies and procedures are specific to their operation.

6.3 A flight safety documents system shall be reviewed:

- (a) on a regular basis (at least once a year);
- (b) after major events (mergers, acquisitions, rapid growth, downsizing, etc.);
- (c) after technology changes (introduction of new equipment); and
- (d) after changes in safety regulations.

- 6.4 Operators shall develop methods of communicating new information. The specific methods shall be responsive to the degree of communication urgency.

Note:-As frequent changes diminish the importance of new or modified procedures, it is desirable to minimize changes to the flight safety documents system.

- 6.5 New information shall be reviewed and validated considering its effects on the entire flight safety documents system.
- 6.6 The method of communicating new information shall be complemented by a tracking system to ensure currency by operational personnel. The tracking system shall include a procedure to verify that operational personnel have the most recent updates.

## FIFTH SCHEDULE

*Regulation 58 (4)*

### MAINTENANCE CONTROL MANUAL

1. Each AOC applicant and AOC holder shall submit and maintain a maintenance control manual containing at least the information set forth below.
2. The manual may be put together in any subject order and subjects combined so long as all applicable subjects are covered.

#### 1.0 Administration and Control of the Maintenance Control Manual

##### 1.1 Introduction

- (a) a statement that the manual complies with all applicable Authority regulations and requirements and with the terms and conditions of the applicable Air Operator Certificate.
- (b) a statement that the manual contains maintenance and operational instructions that are to be complied with by the relevant personnel in the performance of their duties.
- (c) a list and brief description of the various Maintenance Control Manual parts, their contents, applicability and use.
- (d) explanations and definitions of terms and words used in the manual.

##### 1.2 System of Amendment and Revision

- (a) a Maintenance Control Manual shall describe who is responsible for the issuance and insertion of amendments and revisions.
- (b) a record of amendments and revisions with insertion dates and effective dates is required.

- (c) a statement that hand-written amendments and revisions are not permitted except in situations requiring immediate amendment or revision in the interest of safety.
- (d) a description of the system for the annotation of pages and their effective dates.
- (e) a list of effective pages and their effective dates.
- (f) annotation of changes (on text pages and as practicable, on charts and diagrams).
- (g) a system for recording temporary revisions.
- (h) a description of the distribution system for the manuals, amendments and revisions.
- (i) a statement of who is responsible for notifying the Authority of proposed changes and working with the Authority on changes requiring Authority approval.

## 2.0 General Organisation

### 2.1 Corporate commitment by the AOC

### 2.2 General information:

- (a) brief description of organization
- (b) relationship with other organizations
- (c) fleet composition - Type of operation
- (d) line station locations

### 2.3 Maintenance management personnel:

- (a) accountable Manager
- (b) nominated Post holder
- (c) maintenance co-ordination
- (d) duties and responsibilities
- (e) organization chart(s)
- (f) manpower resources and training policy

### 2.4 Notification procedure to the Authority regarding changes to the maintenance arrangements locations, personnel, activities, or approval.

## 3.0 Maintenance Procedures

### 3.1 Aircraft logbook utilization and MEL application

### 3.2 Aircraft maintenance programme-development and amendment.

### 3.3 Time and maintenance records, responsibilities, retention

### 3.4 Accomplishment and control of mandatory continued airworthiness information (Airworthiness Directives)

- 3.5 Analysis of the effectiveness of the maintenance programme
- 3.6 Non-mandatory modification embodiment policy
- 3.7 Major modification standards
- 3.8 Defect reports
  - (a) analysis
  - (b) liaison with manufacturers and Regulatory Authorities
  - (c) deferred defect policy
- 3.9 Engineering activity
- 3.10 Reliability programmes
  - (a) airframe
  - (b) propulsion
  - (c) components
- 3.11 Pre-flight inspection
  - (a) preparation of aircraft for flight
  - (b) sub-contracted Ground Handling functions
  - (c) security of Cargo and Baggage loading
  - (d) control of refuelling, Quantity/Quality
  - (e) control of snow, ice, dust and sand contamination to an approved aviation standard.
- 3.12 Aircraft weighing
- 3.13 Flight test procedures
- 3.14 Sample of documents, tags and forms used
- 3.15 Appropriate portions of the AOC holder's operations manual

SIXTH SCHEDULE

*Regulation 101*

PENALTIES

	<i>Reg. No.</i>	<i>Title</i>	<i>Part</i>	
	4	Compliance with an air operator certificate.	B	
	9	Amendment of an air operator certificate.	A	
	10	Access for inspection.	A	
	11	Conducting tests and inspections.	A	
17		Submission and revision of policy and procedure manuals		A
18		Retention and maintenance of personnel and other records.		A
	19	Inspection of personnel and other records.	A	
	20	Flight recorders records.	A	
	22	Authorised aircraft.	B	
	23	Dry leasing of foreign registered aircraft.	A	
	35	Required cabin crew members	A	
	36	Carriage of special situation passengers.	A	
	52	Routes and areas of operation	A	
	53	En-route navigational facilities.	A	
	56	Maintenance responsibility	A	
	57	Approval and acceptance of AOC maintenance systems.	A	
64		Release to service or maintenance section records of the technical log.		A
	66	Aircraft maintenance programme.	A	
	73	Approval to transport dangerous goods.	B	
	74	Compliance with Technical Instructions.	A	
	75	Limitations on the transport of dangerous goods.	A	
	76	Classification of dangerous goods	A	
	77	Packing.	A	
	78	Labelling and marking.	A	
	79	Dangerous goods transport document.	A	
	80	Acceptance of dangerous goods.	A	
81		Inspection for damage, leakage or contamination.		A
	82	Removal of contamination.	A	
	83	Loading restrictions.	A	
	84	Provision of information.	A	
86		Dangerous goods incident and accident reports		A

87	Possession of the licence.	A
88	Drug and alcohol testing and reporting.	A
89	Inspection of licences and certificates.	A
94	Use and retention of certificates and records.	B
