2007 No. 50.

THE CIVIL AVIATION (AERODROMES) REGULATIONS, 2007.

—————
ARRANGEMENT OF REGULATIONS.

PART I—PRELIMINARY

Regulation

1. Citation and commencement
2. Application of Regulations
3. Interpretation
4. Use of common reference systems
5. Categories of aerodromes

PART II—CONSTRUCTION OF AERODROMES

6. Application of Part
7. Requirements for application for aerodrome construction permit
8. Issuance of aerodrome construction permit
9. Design and construction of aerodrome
10. Requirement for aerodrome design
11. Aerodrome reference code

PART III—LICENSING OF AERODROMES

12. Application of Part
13. Application for licence
14. Conditions for issuance of licence
15. Breach of conditions of licence
16. Issuance of licence
17. Aerodrome licence

Regulation

18. Validity of licence
19. Renewal of licence
20. Amendment of licence
21. Suspension and cancellation of licence
22. Charges at licensed aerodrome
23. Licences register
24. Operator to notify and furnish information

PART IV—AERODROME CERTIFICATION

25. Application of Part
26. Application for certificate
27. Conditions for issuance of certificate
28. Breach of conditions of certificate
29. Issuance of certificate
30. Aerodrome not to be operated without certificate
31. Validity of certificate
32. Amendment of certificate
33. Suspension and cancellation of certificate
34. Surrender of certificate
35. Charges at certificated aerodrome

PART V—OBLIGATIONS OF AERODROME OPERATOR

36. Application of Part
37. Compliance with conditions
38. Competence of operational and maintenance personnel
39. Aerodrome operations and maintenance
40. Safety management system
41. Storage of inflammable and other dangerous goods
42. Safety measures against fire
43. Access to and operations within restricted area of aerodrome
44. Entry into or exit from restricted area of aerodrome
45. Test-running of aircraft engine
46. Certain acts prohibited on aerodrome
47. Removal of obstructions from aerodrome
48. Maintenance of environment management programme
49. Protection of navigation aids
50. Responsibilities of operator

Regulation

51. Staff of Authority to access aerodrome
52. Notifying and reporting
53. Special inspections
54. Warning notices

PART VI—AERODROME MANUAL

55. Application of Part
56. Requirements for aerodrome manual
57. Information to be included in aerodrome manual
58. Amendment of aerodrome manual

PART VII—WILDLIFE HAZARD MANAGEMENT

59. Application of Part
60. Animals not allowed in restricted area of aerodrome
61. Wildlife hazard management
62. Bird hazard reduction at aerodrome

PART VIII—OBSTACLE RESTRICTIONS AND REMOVAL

63. Application of Part
64. Requirements for obstacle limitation
65. Establishment of obstacle limitation surfaces
66. Authorisation to construct within the vicinity of an aerodrome
67. Removal of obstacle
68. Marking and lighting of obstacle

PART IX—AERONAUTICAL GROUND LIGHTING

69. Application of Part
70. Establishment and maintenance of aeronautical ground lights
71. Secondary power supply
72. Aeronautical beacons

PART X—AERODROME VISUAL AIDS

73. Application of Part
74. Wind direction indicators
75. Signalling lamp
76. Signal panel and signalling area
77. Markings

Regulation

78. VOR aerodrome checkpoint marking
79. Aircraft stand markings
80. Apron safety lines
81. Road-holding positions
82. Mandatory instruction markings and signs
83. Information marking
84. Visual aids for denoting obstacles
85. Obstacles to be marked or lighted
86. Visual aids for denoting restricted areas

PART XI—AERODROME OPERATIONAL SERVICES, EQUIPMENT, INSTALLATIONS AND FACILITIES

87. Application of Part
88. Immigration, customs and health functions at aerodromes
89. Supply of aviation fuel to aircraft
90. Aerodrome emergency planning
91. Emergency planning committee
92. Aerodrome emergency exercise
93. Emergency operation centre and command post
94. Emergencies in difficult environment
95. Aerodrome rescue and fire fighting services
96. Removal of disabled aircraft
97. Apron management service
98. Ground servicing of aircraft
99. Aerodrome vehicle operation
100. Location, construction and installation of equipment on operational areas
101. Fencing of aerodromes and installations
102. Maintenance of safety inspection programme
103. Maintenance of fire prevention programme
104. Access of ground vehicles to aerodrome movement area

PART XII—AERODROME MAINTENANCE

105. Application of Part
106. Maintenance programme
107. Maintenance of pavements
108. Preventive maintenance of visual aids

Regulation

- 109. Construction or maintenance activity during periods of low visibility operations
- 110. Works on aerodrome

PART XIII—ELECTRICAL SYSTEMS

- 111. Application of Part
- 112. Electrical power supply systems for air navigation facilities

PART XIV—AERONAUTICAL INFORMATION TO BE REPORTED TO AERONAUTICAL INFORMATION SERVICES

- 113. Application of Part
- 114. Information to be availed to users of aerodromes
- 115. Action required for occurrences of operational significance other than those involving electronic aids and communication facilities
- 116. Action required for occurrences that affect electronic aids and communication facilities
- 117. Aeronautical data reporting

PART XV—EXEMPTIONS

- 118. Application of Part
- 119. Application for exemption
- 120. Initial review by the Authority
- 121. Evaluation of application for exemption

PART XVI—MISCELLANEOUS

- 122. Application of Part
- 123. Change of name
- 124. Change of address
- 125. Use and retention of licences, certificates and records
- 126. Replacement of documents
- 127. Aeronautical user charges
- 128. Conditions for operating aerodrome
- 129. Standards for physical characteristics

Regulation

130. Dangerous light
131. Lighting of en-route obstacles
132. Land use in vicinity of aerodrome
133. Aeronautical studies
134. Deviations from standards
135. Safety inspections and audits
136. Obligation to insure aerodrome
137. General penalty
138. Savings and transition

SCHEDULES

- First schedule — Aerodromes owned or operated by the authority
- Second schedule — Currency point
- Third schedule — safety management systems
- Fourth schedule — particulars to be included in the Aerodrome manual for aerodromes in categories a and b
- Fifth schedule — Particulars to be included in the aerodrome manual for aerodromes in categories C and D
- Sixth schedule — Aerodrome data

STATUTORY INSTRUMENTS

2007 No. 50.

The Civil Aviation (Aerodromes) Regulations, 2007.

(Under sections 45 and 61 of the Civil Aviation Authority Act, Cap. 354)

IN EXERCISE of the powers conferred upon the Minister by sections 45 and 61 of the Civil Aviation Authority Act, and on the recommendation of the Civil Aviation Authority, these Regulations are made this 4th day of July, 2007.

PART I—PRELIMINARY

1. Citation and commencement

(1) These Regulations may be cited as the Civil Aviation (Aerodromes) Regulations, 2007.

(2) These Regulations shall come into force on the 1st day of January 2008.

2. Application of Regulations

(1) These Regulations apply to aerodromes owned or operated by the Authority and to public and private aerodromes.

(2) The aerodromes owned or operated by the Authority are specified in Part I of the First Schedule to these Regulations.

(3) The aerodromes mentioned in Part II of the First Schedule have the areas set out, respectively, in that Schedule.

(4) These Regulations do not apply to aerodromes owned or operated by the military and police forces.

3. Interpretation

(1) In these regulations, unless the context otherwise requires—

“Act” means the Civil Aviation Authority Act, Cap. 354;

- “aerodrome” means a defined area on land, including any buildings, installations, and equipment, used for the arrival, departure and surface movement of aircraft, licensed or certificated under these Regulations;
- “aerodrome beacon” means an aeronautical beacon used to indicate the location of an aerodrome from the air;
- “aerodrome elevation” means the elevation of the highest point of the landing area;
- “aerodrome facilities and equipment” means facilities and equipment, inside or outside the boundaries of an aerodrome that are constructed or installed and maintained for the arrival, departure and surface movement of aircraft;
- “aerodrome manual” means the manual that forms part of the application for a licence or a certificate under these Regulations, including any amendments to the manual, approved by the Authority;
- “aerodrome reference code” means a code used for planning purposes to classify an aerodrome with respect to the critical aircraft characteristics for which the aerodrome is intended;
- “aerodrome reference point” means the designated geographical location of an aerodrome;
- “aerodrome traffic zone” means the airspace extending from aerodrome level to a height of two thousand feet over the area comprising the aerodrome and the surrounding land or water within a distance of two thousand yards of its boundaries;
- “aeronautical beacon” means an aeronautical ground light visible at all azimuths, either continuously or intermittently, to designate a particular point on the surface of the earth;
- “aeronautical ground light” means any light provided as an aid to air navigation, other than a light displayed on an aircraft;

“Aeronautical Information Circular (AIC)” means a notice containing information that does not qualify for the origination of a Notice to Airmen (NOTAM) or for inclusion in the Aeronautical Information Publication (AIP), but which relates to flight safety, air navigation, technical, administrative or legislative matters;

“Aeronautical Information Publication (AIP)” means an aeronautical information publication of a lasting character essential to air navigation, issued by the Authority;

“air traffic service” means a flight information service, alerting service, air traffic advisory service, or air traffic control service;

“air traffic service unit” is a generic term meaning variously, air traffic control unit, flight information centre or air traffic services reporting office;

“Aircraft Classification Number (ACN)” means a number expressing the relative effect of an aircraft on a pavement for a specified standard sub grade category;

“aircraft stand” means a designated area on an apron intended to be used for parking an aircraft;

“apron” means a defined area, on an aerodrome, intended to accommodate aircraft for purposes of loading or unloading of passengers, mail or cargo, fuelling, parking or maintenance;

“apron management service” means a service provided to regulate the activities and the movement of aircraft and vehicles on an apron;

“Authority” means the Civil Aviation Authority established by section 3 of the Act;

“authorized person” means any person authorized by the Authority either generally or in relation to a particular case or class of cases and reference to an authorized person includes references to the holder for the time being of an office designated by the Authority;

“certificate” means the certificate to operate an aerodrome issued by the Authority under Part IV of these Regulations;

“clearway” means a defined rectangular area under the control of the appropriate authority selected or prepared as a suitable area over which an aircraft may make a portion of its initial climb to a specified height;

“critical aircraft” means the most demanding aircraft with regard to the aircraft performance and dimensions for a range of aircraft, for which the aerodrome facilities is intended.

“currency point” has the meaning assigned to it in the Second Schedule to these Regulations;

“declared distance” means—

(a) “accelerate-stop distance available” which is the length of the take-off run available plus the length of the stopway, if provided;

(b) “landing distance available” which is the length of the runway which is declared available and suitable for the ground run of an aircraft landing;

(c) “take-off distance available” which is the length of the take-off run available plus the length of the clearway, if provided;

(d) “take-off run available” which is the length of runway declared available and suitable for the ground run of an aircraft taking off;

“displaced threshold” means a threshold not located at the extremity of a runway;

“facility” includes a pavement, a visual aid, fencing, drainage system and a building;

“geoid” means the equipotential surface in the gravity field of the earth which coincides with the undisturbed Mean Sea Level extended continuously through the continents;

“hazard beacon” means an aeronautical beacon used to designate a danger to air navigation;

“holding bay” means a defined area where aircraft can be held, or bypassed, to facilitate efficient surface movement of aircraft;

“human factor principles” means principles which apply to aeronautical design, certification, training, operations and maintenance and which seek safe interface between the human and other system components by proper consideration to human performance;

“human performance” means human capabilities and limitations, which have an impact on the safety and efficiency of aeronautical operations;

“identification beacon” means an aeronautical beacon emitting a coded signal by means of which a particular point of reference can be identified;

“incident” means an occurrence other than an accident associated with the operation of an aircraft, which affect or may affect the safety of operation of aircraft;

“instrument runway” means any of the following types of runways intended for the operation of aircraft using instrument approach procedures—

(a) “non- precision approach runway” which means an instrument runway served by visual aids and a non-visual aid providing at least directional guidance adequate for a straight-in approach;

(b) “precision approach runway, category I”, which means an instrument runway served by instrument landing system and microwave landing system and visual aids intended for operation with a decision height not lower than 60m (200 ft) and either a visibility not less than 800 m or a runway visual range not less than 550m;

(c) “precision approach runway, category II”, which means an instrument runway served by Instrument Landing System and Microwave Landing System and visual aids intended for operation with a decision height lower than 60m (200 ft) but not lower than 30 m (100 ft) and a runway visual range not less than 350 m;

“intermediate holding position” means a designated position intended for traffic control at which taxiing aircraft and vehicles stop and hold until they are cleared to proceed, when so instructed by the aerodrome control tower;

“landing area” means that part of a movement area intended for the landing or take-off of aircraft;

“licence” means a licence to operate an aerodrome issued by the Authority under Part III of these Regulations;

“lighting system reliability” means the probability that the complete installation operates within the specified tolerances and that the system is operationally usable;

“manoeuvring area” means that part of an aerodrome to be used for the take-off, landing and taxiing of aircraft, excluding aprons;

“Manual of Aerodrome Standards” means a manual developed by the Authority, on aerodrome standards;

“marker” means an object displayed above ground level in order to indicate an obstacle or delineate a boundary;

“marking” means a symbol or group of symbols displayed on the surface of the movement area in order to convey aeronautical information;

“Minister” means the Minister responsible for civil aviation;

“movement area” means that part of the aerodrome to be used for take-off, landing and taxiing of aircraft, consisting of the

- manoeuvring area and apron;
- “notify” means shown in Aeronautical Information Publications (AIP), Aeronautical Information Circulars (AIC), Notice to Airmen (NOTAM), civil aviation publications or any other official publication issued for the purpose of enabling any of the provisions of these Regulations to be complied with;
- “non-instrument runway” means a runway intended for the operation of aircraft using visual approach procedures;
- “obstacle” means a fixed (whether temporary or permanent) or mobile object, or part of an object, located on an area intended for the surface movement of aircraft or that extend above a defined surface intended to protect aircraft in flight;
- “obstacle free zone” means the airspace above the inner approach surface, inner transitional surfaces, the balked landing surface and that portion of the strip bounded by these surfaces, which is not penetrated by any fixed obstacle other than a low-mass and frangibly mounted one required for air navigation purposes;
- “obstacle limitation surfaces” means a series of surfaces that define the volume of airspace at and around an aerodrome to be kept free of obstacles in order to permit the intended aircraft operations to be conducted safely and to prevent the aerodrome from becoming unusable by the growth of obstacles around the aerodrome;
- “operator” means a person operating an aerodrome licensed or certificated under these Regulations;
- “Pavement Classification Number (PCN)” means a number expressing the bearing strength of a pavement for unrestricted operations;
- “precision approach runway” means—
- (a) “precision approach runway, category I” which an instrument runway served by Instrument Landing System and visual aids intended for operations with a decision height not

lower than 60 m (200 ft) and either a visibility not less than 800 m or a runway visual range not less than 550 m;

- (b) “precision approach runway, category II”. which is an instrument runway served by Instrument Landing System and visual aids intended for operations with a decision height lower than 60 m (200 ft) but not lower than 30 m (100 ft) and a runway visual range not less than 350 m;

“prescribed” means prescribed by the Authority in the Manual of Aerodrome Standards;

“primary runway” means a runway used in preference to others whenever conditions permit;

“recommended practice” means any specification for the physical characteristics configuration, material, performance or procedure, the uniform application of which is recognised as desirable in the interest of safety, regularity or efficiency of international air navigation;

“relevant authority” means any authority other than the Civil Aviation Authority whose action may be necessary or complimentary for the implementation of these Regulations;

“road” means an established surface route on the movement area meant for the exclusive use of vehicles;

“road holding position” means a designated position at which vehicles may be required to hold;

“runway” means a defined rectangular area on a land aerodrome prepared for the landing and take-off of aircraft;

“runway end safety area” means an area symmetrical about the extended runway centreline and adjacent to the end of the strip primarily intended to reduce the risk of damage to an aircraft undershooting or overrunning the runway;

“runway-holding position” means a designated position intended to protect a runway, an obstacle limitation surface, or an Instrument Landing System/Microwave Landing System critical or sensitive

area at which taxiing aircraft and vehicles shall stop and hold, unless otherwise authorized by the aerodrome control tower;

“runway strip” means a defined area including the runway and stopway, if provided, intended—

(a) to reduce the risk of damage to aircraft running off a runway; and

(b) to protect aircraft flying over it during take-off or landing operations;

“runway visual range” means the range over which a pilot of an aircraft on the centre line of a runway can see the runway surface markings or the lights delineating the runway or identifying its centre line;

“safety” means a state in which the risk of harm to persons or of property damage is reduced to, and maintained at or below unacceptable level through a continuing process or hazard identification and risk management;

“safety management system” means a system for the management of safety at an aerodrome, including the organizational structure, responsibilities, procedures, processes and provisions for the implementation of aerodrome safety policies by an operator, which provides for the control of safety at an aerodrome and its safe use;

“shoulder” means an area adjacent to the edge of a pavement, prepared to provide a transition between the pavement and the adjacent surface;

“standard” means any specification for physical characteristics, configuration, material, performance, personnel or procedure, the uniform application of which is recognised as necessary for the safety of air navigation;

“stopway” means a defined rectangular area on the ground at the end of the take-off run available, prepared as a suitable area

in which an aircraft can be stopped in the case of an abandoned take-off;

“taxiway” means a defined path on a land aerodrome established for the taxiing of aircraft and intended to provide a link between one part of the aerodrome and another, including—

(a) an aircraft stand taxi lane, which is a portion of an apron designated as a taxiway and intended to provide access to aircraft stands only;

(b) an apron taxiway, which is a portion of a taxiway system located on an apron and intended to provide a through taxi route across the apron;

(c) a rapid exit taxiway, which is a taxiway connected to a runway at an acute angle and designed to allow landing aircrafts to turn off at higher speeds than are achieved on other exit taxiways thereby minimizing runway occupancy times;

“taxiway strip” means an area including a taxiway intended to protect aircraft operating on a taxiway and to reduce the risk of damage to an aircraft accidentally running off the taxiway;

“threshold” means the beginning of that portion of the runway usable for landing;

“touchdown zone” means the portion of a runway beyond the threshold, intended for landing aircraft on first contact with the runway;

“unserviceable area” means a part of the movement area that is unfit and unavailable for use by aircraft;

“vicinity” means a defined airspace around an aerodrome for control of obstacles that may infringe the obstacle limitation surfaces around the aerodrome, contained within a radius of twelve and half kilometres from the aerodrome reference

point and at a height of one thousand five hundred feet above ground level;

“visual traffic pattern” means the aerodrome traffic zone of the aerodrome;

“wildlife” means feral birds and animals, and includes domestic animals out of the control of their owners;

“wildlife hazard” means a potential for a damaging aircraft collision with wildlife on or near an airport.

4. Use of common reference systems.

(1) The World Geodetic System – 1984 (WGS-84) shall be used as the horizontal reference system to express aeronautical geographical coordinates for aerodromes.

(2) The Mean Sea Level datum shall be used as the vertical reference system (elevation) at aerodromes.

(3) Except where notified in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC) of Uganda, the Gregorian calendar and Coordinated Universal Time shall be used as the temporal reference system.

5. Categories of aerodromes.

(1) In these Regulations aerodromes shall be categorized as follows—

(a) category A comprising the primary international aerodromes, appropriate for use by aircraft of maximum certificated take off mass of sixty thousand kilograms or more and available for use by both domestic and international air traffic and where air traffic services are available on a twenty four hour basis;

(b) category B comprising secondary international aerodromes, appropriate for use by aircraft of maximum certificated take off mass of five thousand seven hundred kilograms but below sixty thousand kilograms and available for use by both international and domestic air traffic and where the

- formalities of immigration, customs, health and similar procedures are made available with prior notice;
- (c) category C comprising public and private aerodromes, appropriate for use by aircraft of maximum certificated take off mass of twenty thousand kilograms or less, available for use by domestic air traffic;
 - (d) category D comprising public and private aerodromes available only for domestic air traffic including Government and privately owned aerodromes, used by aircraft of maximum take-off mass of less than five thousand seven hundred kilograms;
 - (e) category E comprising public and private aerodromes available for use by helicopters only.
- (2) Helicopters may use aerodromes in categories A, B, C and D.

PART II—CONSTRUCTION OF AERODROMES.

6. Application of Part.

This Part applies to all categories of aerodromes except where otherwise specified.

7. Requirements for application for aerodrome construction permit.

(1) A person shall not construct an aerodrome unless that person has a valid aerodrome construction permit issued under regulation 8.

(2) An application for an aerodrome construction permit shall be considered for approval, where—

- (a) the applicant holds a valid authorization from a relevant authority for use of the place as an aerodrome;
- (b) the application is approved by the authority responsible for national environment management.

(3) The Authority shall prior to issuance of a construction permit,

assess the suitability of the place proposed for construction taking into consideration—

- (a) the proximity of the place to other aerodromes and landing areas including military aerodromes;
- (b) obstacles, terrain and existing airspace restrictions; and
- (c) that it is not against public interest that the place where the aerodrome is to be constructed should be used as such.

(4) An applicant for an aerodrome construction permit shall submit to the Authority for approval an application in the prescribed form accompanied by—

- (a) a detailed design of the proposed construction including related architectural requirements;
- (b) aerodrome data in accordance with the characteristics of the critical aircraft for which the aerodrome is intended; and
- (c) a topographical map of the proposed aerodrome site as specified by the Authority.

(5) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment not exceeding twenty four months, or both.

(6) Subregulations (2) (b), (4) (a) and (4) (c) shall not apply to aerodromes in categories C, D and E.

8. Issuance of aerodrome construction permit.

The Authority shall issue an aerodrome construction permit to an applicant where the application meets the requirements in regulation 7 and any other requirements as may be specified by any relevant authority.

9. Design and construction of aerodrome.

(1) An applicant for a construction permit shall ensure that the design of the aerodrome is undertaken by a person registered by the relevant professional body.

(2) An applicant for a construction permit shall ensure that the

construction of the aerodrome is undertaken by a person registered by the relevant professional body.

(3) The Authority shall inspect the site of an aerodrome during construction to ascertain compliance with the standards prescribed and the terms of the aerodrome construction permit.

(4) A person who contravenes subregulation (1) or (2) commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment not exceeding twenty four months, or both.

(5) Subregulations (1) and (2) shall not apply to aerodromes in categories C, D and E.

10. Requirement for aerodrome design.

(1) An aerodrome design shall—

- (a) indicate the physical characteristics of the aerodrome, as prescribed by the Authority;
- (b) indicate the obstacle limitation surfaces;
- (c) have integrated, security measures in accordance with the Civil Aviation (Security) Regulations;
- (d) indicate visual aids for navigation obstacles and restricted areas;
- (e) indicate the appropriate equipment and installations; and
- (f) indicate the airspace classification.

(2) The physical characteristics, obstacle limitation surfaces, visual aids and equipment and installations, required under subregulation (1) shall—

- (a) be appropriate to the characteristics of the critical aircraft which the aerodrome intends to serve;
- (b) be at the lowest meteorological minima for each runway;

- (c) provide ambient light conditions during the operations of aircraft;
- (d) comply with the appropriate aerodrome design standards as prescribed by the Authority.

(3) This regulation shall not apply to aerodromes in categories C, D and E.

11. Aerodrome reference code.

(1) An aerodrome reference code comprising a code number and a code letter shall be used for aerodrome planning purposes.

(2) The Authority shall determine the aerodrome reference code in accordance with the critical aircraft characteristics for which the aerodrome facility is intended.

(3) The aerodrome reference code numbers and code letters required under subregulation (1) shall be determined in accordance with

Code Element 1		Code Element 2		
Code number (1)	Aerodrome reference field length (2)	Code letter (3)	Wing span (4)	Outer main gear wheel span (5)
1	Less than 800 m	A	Up to but not including 15 m	Up to but not including 4.5 m
2	800 m up to but not including 1 200 m	B	15 m up to but not including 24 m	4.5 m up to but not including 6 m
3	1 200 m up to but not including 1 800 m	C	24 m up to but not including 36 m	6 m up to but not including 9 m
4	1 800 m and over	D	36 m up to but not including 52m	9 m up to but not including 14 m
		E	52 m up to but not including 65 m	9 m up to but not including 14 m
		F	65 m up to but not including 80 m	14m up to but not including 16 m

specifications in Table 1.

Table 1: Aerodrome reference code

PART III—LICENSING OF AERODROMES

12. Application of Part.

This Part applies to aerodromes in categories B, C, D and E except where otherwise specified.

13. Application for licence.

An application for a licence shall be made in the prescribed form accompanied by—

- (a) an aerodrome manual;
- (b) a plan for the aerodrome;
- (c) an environmental impact assessment report;
- (d) approval from the relevant authority;
- (e) proof of financial capability, in case of aerodromes in Category B;
- (f) particulars of any non-compliance or deviations from the appropriate aerodrome design, operation or equipment standards;
- (g) particulars of the airspace classification requirements; and
- (h) charges as prescribed in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC).

14. Conditions for issuance of licence.

(1) A licence may be issued subject to any conditions that may be prescribed by the Authority.

(2) The Authority shall endorse on a licence the conditions for use of an aerodrome and any other details as may be deemed necessary by the Authority.

(3) Subject to subregulation (4), where an applicant requests or where the Authority considers that an aerodrome should be available for

public use, a licence may be granted subject to a condition that the aerodrome shall at all times be available to all persons on equal terms and conditions.

(4) An aerodrome operator may refuse an aircraft from using the aerodrome except in an emergency situation.

15. Breach of conditions of licence.

The breach of any condition subject to which a licence is issued including any approval, permission or exemption shall render the licence invalid.

16. Issuance of licence.

(1) The Authority shall issue a licence in the prescribed form and manner where—

- (a) an applicant is found to be competent to operate an aerodrome on consideration of the previous conduct and experience of the applicant and the equipment, organisation, staffing, maintenance and other arrangements of the applicant;
- (b) the physical characteristics of the aerodrome and its surroundings are safe for use by aircraft; and
- (c) an applicant for a licence, for an aerodrome in category B or C complies with the Civil Aviation (Security) Regulations.

(2) The issuance of a licence shall be subject to compliance with these Regulations and standards prescribed and any other condition as may be specified or notified by the Authority in accordance with the requirements for safety audit and inspection.

(3) The Authority may refuse to grant a licence to an applicant and where the Authority refuses, it shall notify the applicant in writing, of the reasons for the refusal, not later than fourteen days after making that decision.

(4) A person shall not operate an aerodrome as an aerodrome in category B, C, D or E without a licence issued by the Authority.

17. Aerodrome licence.

(1) A licence shall specify—

- (a) the reference code for which the aerodrome is licensed;
- (b) the restrictions, if any, relating to non-compliance with or deviations from—
 - (i) the appropriate aerodrome design, operation or equipment standards;
 - (ii) the appropriate airspace classification requirements; and
- (c) the period of validity of the licence.

(2) A licence issued under these Regulations is not transferable.

18. Validity of licence.

(1) A licence issued under these Regulations shall be valid for a period of two years and shall remain in force until it expires or is suspended or cancelled by the Authority, in accordance with regulation 21.

(2) A holder of an aerodrome licence which is suspended or cancelled shall within thirty days of the suspension or cancellation, surrender the licence to the Authority.

(3) Notwithstanding subregulation (2), where an aerodrome licence is suspended for a period of less than thirty days, the holder of the licence shall surrender the licence immediately.

19. Renewal of licence.

(1) An application for the renewal of a licence shall be made to the Authority in the prescribed form and shall be accompanied by—

- (a) the aerodrome manual;
- (b) particulars of deviations, if any, from the appropriate design, operation or equipment standards;
- (c) particulars of the appropriate airspace classification requirements; and

(d) the appropriate charges as prescribed in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC).

(2) An application for renewal of a licence shall be submitted sixty days before the expiry of the licence.

(3) The renewal of a licence shall be subject to compliance with these Regulations, standards prescribed by the Authority and any other conditions specified or notified by the Authority as determined by safety inspections and audit procedures.

20. Amendment of licence

(1) An application for amendment of a licence shall be submitted in a form prescribed by the Authority.

(2) The Authority may request that the application be accompanied by any or all of the following—

(a) an aerodrome manual;

(b) a plan for the aerodrome;

(c) an environmental impact assessment report;

(d) approval from any relevant authority;

(e) proof of financial capability;

(f) particulars of any non-compliance or deviations from the appropriate aerodrome design, operation or equipment standards;

(g) particulars of the airspace classification requirements; and

(h) charges as prescribed in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC).

(3) The Authority may where necessary, provided the requirements of regulations 16, are met, amend the licence—

- (a) in respect of a change in the use or operation of the aerodrome;
- (b) in respect of a change in the boundaries of the aerodrome;
- (c) where the holder of the licence requests for an amendment; or
- (d) where the Authority deems it necessary.

21. Suspension and cancellation of licence.

(1) The Authority may suspend an aerodrome licence where—

- (a) following a safety inspection or audit, it is evident that the holder of the licence has not complied with the requirements prescribed in these Regulations and failed to remedy the non-compliance within a period of thirty days after the inspection;
- (b) the holder of the licence prevents the Authority from carrying out a safety inspection or audit in accordance with these Regulations;
- (c) the holder of the licence is under receivership, liquidation or bankruptcy proceedings;
- (d) it is deemed necessary by the Authority, in the interest of aviation safety.

(2) The Authority may, on giving reasons to the holder of a licence, suspend the licence for a period not exceeding sixty days.

(3) A holder of a licence who is notified of a suspension in subregulation (2) may submit a response in writing, within fourteen days.

(4) Notwithstanding subregulation (3), the Authority may suspend any or all of the operations at an aerodrome pending receipt of a response from the holder.

(5) A holder of a licence who is aggrieved by the suspension of a licence may appeal to the Minister against the suspension, within thirty days of the suspension.

(6) Where an appeal is made under subregulation (5), the holder of

a licence shall state in writing the reasons why in his or her opinion, the suspension should be varied or set aside.

(7) The Minister may vary or set aside the suspension made under subregulation (2) on the basis of the reasons given under subregulation (6).

(8) Where a holder of a licence does not appeal against the suspension in accordance with subregulation (5), the Authority may cancel the licence, on giving reasons to the holder of the licence.

22. Charges at licensed aerodrome.

(1) A holder of a licence shall prescribe charges for the use of the aerodrome or of any facilities provided at the aerodrome for the safety, security, efficiency or regularity of air navigation.

(2) Where required by the Authority, a holder of a licence shall, furnish particulars of the charges levied for the use of an aerodrome or the performance of services at the aerodrome.

(3) Notwithstanding subregulation (1), the Authority may where necessary, prescribe the maximum charges which may be levied for the use of an aerodrome or the performance of services at the aerodrome, for a specified period.

(4) A holder of a licence of the aerodrome for which the Authority prescribes charges under subregulation (3) shall not cause or permit any charges to be made in contravention of that subregulation.

(5) A holder of a licence of an aerodrome for which the Authority prescribes charges shall cause the prescribed charges to be posted in a conspicuous place at the aerodrome.

(6) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment not exceeding twenty four months, or both.

23. Licences register.

(1) The Authority shall maintain a register of all licences issued in accordance with these Regulations.

- (2) The register shall contain—
- (a) the full name of the holder of a licence;
 - (b) the nationality of the holder of the licence;
 - (c) the postal, telephone, facsimile and e-mail addresses of the holder of a licence;
 - (d) the name and location of the aerodrome for which a licence is issued;
 - (e) the number of the licence;
 - (f) the date on which the licence was issued; and
 - (g) any other relevant information.

24. Operator to notify and furnish information

An aerodrome operator shall—

- (a) in the case of a licence for public use, cause to be notified the times during which the aerodrome is to be available for take-off and landing of aircraft for public transport or instruction in flying; and
- (b) upon request, furnish to an authorised person, information concerning the terms of the licence.

PART IV—AERODROME CERTIFICATION.

25. Application of Part

(1) This Part applies to aerodromes in category A.

(2) The Authority shall, by notice in the *Gazette*, determine the aerodromes in category B to which this Part may apply.

26. Application for certificate

An application for a certificate shall be submitted in a form prescribed by the Authority and shall be accompanied by—

- (a) two copies of the aerodrome manual;
- (b) a plan for the aerodrome;
- (c) an environmental impact assessment report;
- (d) approval from any relevant authority;
- (e) proof of financial capability;
- (f) particulars of any non-compliance or deviations from the appropriate aerodrome design, operation or equipment standards;
- (g) particulars of the airspace classification requirements; and
- (h) charges as prescribed by the Authority in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC).

27. Conditions for issuance of certificate.

(1) A certificate may be issued subject to any conditions that may be prescribed by the Authority.

(2) The Authority shall endorse on a certificate the conditions for use of an aerodrome and any other details as may be deemed necessary by the Authority.

28. Breach of conditions of certificate.

The breach of any condition subject to which a certificate is issued, including any approval, permission or exemption, shall render the certificate invalid.

29. Issuance of certificate.

(1) The Authority shall issue a licence in the prescribed form and manner where the Authority is satisfied that—

- (a) the applicant has the necessary competency and experience to operate and maintain an aerodrome;
- (b) the personnel of the applicant are adequate in number and have

the necessary competency and experience to operate and maintain an aerodrome;

- (c) the aerodrome manual prepared for the aerodrome and submitted with the application contains all the relevant information;
- (d) the aerodrome facilities, services and equipment are established in accordance with approved standards and recommended practices;
- (e) the aerodrome operating procedures make satisfactory provision for the safety of aircraft;
- (f) an approved safety management system is in place;
- (g) the applicant has an approved aviation security programme in accordance with the Civil Aviation (Security) Regulations.

(2) The issuance of a certificate shall be subject to compliance with these Regulations and standards prescribed by the Authority and any other condition as may be specified or notified by the Authority in accordance with the requirements for safety audit and inspection.

(3) The Authority may refuse to grant a certificate to an applicant and where the Authority refuses, it shall notify the applicant in writing, of the reasons for the refusal, not later than fourteen days after making that decision.

30. Aerodrome not to be operated without certificate.

(1) A person shall not operate an aerodrome as a category A aerodrome, without a certificate issued by the Authority in accordance with this Part.

(2) An aerodrome certificate issued under these Regulations is not transferable.

(3) A person who contravenes this regulation commits an offence

and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment not exceeding twenty four months, or both.

31. Validity of certificate.

A certificate shall be valid for a period of one year, unless the certificate is suspended, cancelled or revoked in accordance with these Regulations.

32. Amendment of certificate.

(1) An application for amendment of a certificate shall be submitted in a form prescribed by the Authority.

(2) The Authority may request that the application be accompanied by any or all of the following—

- (a) two copies of the aerodrome manual;
- (b) a plan for the aerodrome;
- (c) an environmental impact assessment report;
- (d) approval from the relevant authority;
- (e) proof of financial capability;
- (f) particulars of any non-compliance or deviations from the appropriate aerodrome design, operation or equipment standards;
- (g) particulars of the airspace classification requirements; and
- (h) charges as prescribed in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC).

(3) The Authority may, where necessary, provided the requirements of regulations 29, are met, amend an aerodrome certificate—

- (a) in respect of a change in the use or operation of the aerodrome;
- (b) in respect of a change in the boundaries of the aerodrome;

- (c) where the holder of the aerodrome certificate requests for an amendment; or
- (d) where the Authority deems it necessary.

33. Suspension and cancellation of certificate.

(1) The Authority may suspend a certificate where—

- (a) following a safety inspection or audit, it is evident that the holder of the certificate has not complied with the requirements prescribed in these Regulations and failed to remedy the non-compliance within a period of thirty days after the inspection;
- (b) the holder of the certificate prevents the Authority from carrying out a safety inspection or audit in accordance with these Regulations;
- (c) the holder of the certificate is under receivership, liquidation or bankruptcy proceedings;
- (d) it is deemed necessary by the Authority, in the interest of aviation safety.

(2) The Authority may, on giving reasons to the holder of a certificate, suspend the certificate for a period not exceeding sixty days.

(3) A holder of a certificate who is notified of a suspension in subregulation (2) may submit a response in writing within fourteen days.

(4) Notwithstanding subregulation (3), the Authority may suspend any or all of the operations at an aerodrome pending receipt of a response from the holder.

(5) A holder of a certificate who is aggrieved by the suspension of a certificate may appeal to the Minister against the suspension, within thirty days of the suspension.

(6) Where an appeal is made under subregulation (5), the holder of

a certificate shall state in writing the reasons why in his or her opinion, the suspension should be varied or set aside.

(7) The Minister may vary or set aside the suspension made under subregulation (2) on the basis of the reasons given under subregulation (6).

(8) Where a holder of a certificate does not appeal against the suspension in accordance with subregulation (5), the Authority may cancel the certificate, on giving reasons to the holder of the certificate.

34. Surrender of certificate.

(1) Subject to subregulation (2), a holder of a certificate may surrender the certificate to the Authority at any time.

(2) A holder of a certificate who wishes to surrender the certificate shall give the Authority not less than sixty days notice in writing, of the intention to surrender the certificate.

(3) The Authority shall cancel the certificate upon the expiry of the period of notice in subregulation (2).

(4) Where, after the expiry of the period provided in subregulation (2), the aerodrome whose certificate is surrendered, is abandoned or is not maintained in accordance with the conditions of the certificate, the holder of the certificate shall remove, obliterate or modify the prescribed markings referred to in regulation 50 (f).

35. Charges at certificated aerodrome.

(1) A holder of a certificate shall prescribe charges for the use of the aerodrome or of any facilities provided at the aerodrome for the safety, security, efficiency and regularity of air navigation.

(2) Where required by the Authority, a holder of a certificate shall, furnish particulars of the charges levied for the use of an aerodrome or the performance of services at the aerodrome.

(3) Notwithstanding subregulation (1), the Authority may where necessary, prescribe the maximum charges which may be levied for the

use of an aerodrome or the performance of services at the aerodrome, for a specified period.

(4) A holder of a certificate of an aerodrome for which the Authority prescribes charges under subregulation (3) shall not cause or permit any charges to be made in contravention of that subregulation.

(5) A holder of a certificate of an aerodrome for which the Authority prescribes charges shall cause the prescribed charges to be posted in a conspicuous place at the aerodrome.

(6) A holder of a certificate who contravenes this regulation commits an offence and is liable on conviction to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

PART V—OBLIGATIONS OF AERODROME OPERATOR

36. Application of Part.

This Part applies to all categories of aerodromes except where otherwise specified.

37. Compliance with conditions.

(1) An operator shall comply with any conditions that may endorsed on a licence or certificate.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

38. Competence of operational and maintenance personnel.

(1) An operator shall ensure that there is an adequate number of qualified and skilled personnel to perform activities relevant for aerodrome operation and maintenance.

(2) Where the Authority or any relevant authority requires competence certification for the personnel of an aerodrome, the operator shall employ only those persons with the required certification.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

39. Aerodrome operations and maintenance.

(1) Subject to any directives the Authority may issue, an operator shall operate and maintain an aerodrome in accordance with the procedures set out in the aerodrome manual.

(2) The Authority may give written directives to an operator to alter the procedures set out in an aerodrome manual.

(3) An operator shall ensure proper and efficient maintenance of the facilities of the aerodrome.

(4) Where air traffic services are provided at an aerodrome, the operator shall co-ordinate with the air traffic services, to ensure the safety of aircraft associated with the aerodrome, operating in the airspace.

(5) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

40. Safety management system.

(1) An operator of an aerodrome shall have a safety management system that complies with the standards specified in the aerodrome manual and the requirements specified in the Third Schedule to these Regulations.

(2) An operator who contravenes subregulation (1) commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(3) This regulation shall not apply to aerodromes in categories B, C, D and E.

41. Storage of inflammable and other dangerous goods.

(1) A person shall not store fuel, pyrotechnic stores and other highly inflammable goods or other dangerous goods, at an aerodrome except with the permission of the Authority and in accordance with the prescribed standards.

(2) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

42. Safety measures against fire.

(1) A person shall not—

- (a) smoke within any place, or bring an open flame into any place, where that act is prohibited by a displayed notice;
- (b) where there is no notice prohibiting smoking in a place, smoke within that place, or bring an open flame into that place, within a distance of an aircraft or, of any vehicle used for the supply of fuel to an aircraft, or a store, dump, liquid fuel or explosives, as may be prescribed;
- (c) wilfully give a false fire alarm;
- (d) tamper or interfere with any fire hose reel, hydrant or any other item of equipment provided for fire fighting purposes;
- (e) keep, store, discard or discharge any flammable liquid, gas, signal flares or other like material in an aircraft, except in the receptacle appropriate for the purpose or in a place on the aerodrome specifically approved by the aerodrome operator for the purpose;
- (f) store or stack any material or equipment in a manner which constitutes or is likely to constitute a fire hazard.

(2) An operator shall display in conspicuous places at the aerodrome, appropriate signage in respect of the acts prohibited under subregulation (1).

(3) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

43. Access to and operations within restricted area of aerodrome.

(1) A person shall not access a restricted area of an aerodrome unless authorised by the operator and subject to such conditions as the operator may impose.

(2) A person authorised to access a restricted area under subregulation (1) shall—

- (a) not move an aircraft or a vehicle in the restricted area except with the permission and directions issued by the air traffic services personnel;
- (b) not move an aircraft or vehicle in the restricted area in a manner that endangers the safety of persons and property;
- (c) use only the area of the aerodrome designated for landing or taking off, for these purposes.

(3) A person who contravenes this regulation commits an offence and is liable on conviction to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

44. Entry into or exit from restricted area of aerodrome.

(1) A person, aircraft or vehicle shall not enter or leave a restricted area of an aerodrome except through points established by the operator for the purpose.

(2) Except in an emergency or at an appropriate point of entry or exit established by an operator for that purpose, a person—

- (a) other than a person carried in an aircraft or in a vehicle, shall not

enter or leave a restricted areas of an aerodrome;

- (b) shall not move an aircraft on the surface of an aerodrome or a vehicle into or from the restricted area;
- (c) shall not move a vehicle into or from the restricted area of an aerodrome.

(3) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

45. Test-running of aircraft engine.

(1) A person shall not test-run an aircraft engine at an aerodrome except at the approved aircraft maintenance facility of the aerodrome or a place designated for that purpose, by the operator.

(2) A person who contravenes this regulation commits an offence and is liable on conviction to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

46. Certain acts prohibited on aerodrome.

(1) A person shall not, on an aerodrome—

- (a) obstruct or interfere with the proper use of the aerodrome ;
- (b) obstruct any person executing his or her duties at the aerodrome;
- (c) remove or deface any notice, writing, document or marking erected or displayed at the aerodrome;
- (d) throw, leave or drop anything capable of causing injury to any person or damage to any property;
- (e) dump any waste matter except at a place approved for the purpose by the aerodrome operator;
- (f) dump or spill any substance capable of causing water pollution, whether solid, liquid, vapour or gas or a combination of these, except at a place approved for that purpose by the

aerodrome operator.

(2) Except with the permission of the operator, a person shall not—

- (a) interfere or tamper with any part of the aerodrome or any equipment associated with the operation of the aerodrome;
- (b) climb any wall, fence, barrier, ceiling, gate or post on an aerodrome;
- (c) handle any baggage or carry baggage for a passenger at an aerodrome;
- (d) bring a vehicle into or drive into an aerodrome;
- (e) obstruct an entrance to or a passage at an aerodrome in a manner that inconvenience other users of the entrance or passage.

(3) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

47. Removal of obstructions from aerodrome.

(1) An operator shall remove from the aerodrome any vehicle or other obstruction that is likely to be hazardous to aircraft operations.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

48. Maintenance of environment management programme.

(1) An operator shall establish and maintain an aerodrome environment management programme for the area within the authority of the operator and for the area where any wildlife presents or is likely to present a hazard to aircraft operations.

(2) An operator shall ensure that the environment management programme established under subregulation (1) minimises the effects of any hazards or potential hazards taking into account the provisions of the laws on environmental management.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(4) This regulation shall not apply to aerodromes in categories C, D and E.

49. Protection of navigation aids.

(1) An operator shall in consultation with the Authority—

- (a) prevent construction of any facilities on the aerodrome, which may adversely affect the operation of any electronic or visual navigation or air traffic service facility on the aerodrome;
- (b) as far as it is within the authority of the operator, prevent any interruption of visual or electronic signal of navigation aids.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

50. Responsibilities of operator.

(1) An operator shall—

- (a) maintain the aerodrome in a serviceable condition;
- (b) keep the aerodrome free of unauthorized persons, vehicles and animals which are not under proper control and free of any other obstructions;
- (c) mark all obstructions in accordance with the prescribed guidelines;
- (d) inform the Authority of any alterations to obstruction or works on the aerodrome;
- (e) install approved wind direction indicators to show the surface direction of the wind and ensure that the wind direction indicators function satisfactorily;

- (f) maintain the prescribed markings in a conspicuous condition and ensure that they are readily visible to aircraft in the air or manoeuvring on the ground;
- (g) avail facilities and ensure that they are in serviceable condition and that all apparatus installed function efficiently;
- (h) appropriately mark the areas on the landing terrain which are unserviceable;
- (i) inform the Authority, where the aerodrome becomes unserviceable through any cause or where any portion of the surface of the landing area deteriorates to such an extent that the safe operation of aircraft may be endangered;
- (j) submit to the Authority reports on the condition of the aerodrome as may be required by the Authority; and
- (k) report all incidents and accidents on an aerodrome to the Authority.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

51. Staff of Authority to access aerodrome.

(1) Before an aerodrome licence or certificate is issued or renewed and, subsequently, at any other time, for the purpose of ensuring that safety at an aerodrome is maintained, the Authority shall inspect and carry out tests on the aerodrome facilities, services and equipment, inspect the documents and records of the aerodrome and verify the safety management system of the aerodrome.

(2) To facilitate the functions specified in subregulation (1), an operator shall allow the Authority unhindered access to any part of the aerodrome or any aerodrome facility, including equipment, records, documents and personnel.

(3) An operator who contravenes this regulation commits an offence and is liable on conviction to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

52. Notifying and reporting.

(1) An operator shall notify and report to the Authority, the air traffic control unit and pilots who may be affected, within the specified time limits, information on—

- (a) any inaccuracies in the Aeronautical Information Publication (AIP);
- (b) any changes to the aerodrome facilities, equipment and level of service planned, in advance;
- (c) issues that may require immediate notification including obstacles, obstructions and hazards, levels of service, movement areas, and any other condition that affects aviation safety at the aerodrome and against which precautions are warranted.

(2) Where it is not feasible for an operator to arrange for the air traffic control unit and the flight operations unit to receive notice of the circumstances referred to in subregulation (1) (c), the operator shall give immediate notice, directly to the pilots who may be affected by that circumstance.

(3) An operator person who contravenes this regulation commits an offence, and is liable, on conviction to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

53. Special inspections

(1) An operator shall inspect an aerodrome—

- (a) as soon as practicable after any accident or incident;

(b) during any period of construction or repair of the aerodrome facilities or equipment that is critical to the safety of aircraft operation; and

(c) at any other time when there are conditions at the aerodrome that may affect aviation safety.

(2) An operator shall notify and report to the Authority, within the specified time limits, information on any special inspection carried out under subregulation (1).

(3) A person who contravenes this regulation commits an offence and is liable on conviction to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

54. Warning notices.

(1) Where a low flying aircraft, at or near an aerodrome, or where a taxiing aircraft, is likely to be hazardous to people or vehicles, an operator shall—

(a) post hazard warning notices to that effect, on any public way that is adjacent to the manoeuvring area; or

(b) where the public way is not controlled by the operator, inform the relevant authority of the hazard.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

PART VI—AERODROME MANUAL

55. Application of Part.

This Part applies to all categories of aerodromes except where otherwise specified.

56. Requirements for aerodrome manual.

(1) Upon making an application for a licence or a certificate the

applicant shall submit to the Authority an aerodrome manual for approval.

(2) An aerodrome manual shall—

(a) be typewritten or printed;

(b) be signed by the intending operator;

(c) be in a format that is easy to revise;

(d) have a system for recording the current pages and any amendments, including a page for logging revisions; and

(e) be organized in a manner that facilitates the preparation, review and approval processes.

(3) An operator shall keep at least one approved copy of the aerodrome manual at the aerodrome and one copy at the principal place of business of the operator, where this is different from the aerodrome.

(4) Where an operator of an aerodrome in category D or E is unable to keep a copy of the aerodrome manual at the aerodrome, the operator shall keep the aerodrome manual at a place authorised by the Authority.

57. Information to be included in aerodrome manual.

(1) An aerodrome manual shall contain all information and instructions necessary to enable the personnel of an aerodrome perform their duties.

(2) Notwithstanding subregulation (1), and to the extent that the particulars are applicable, a manual for aerodromes in categories A and B shall include the particulars provided in the Fourth Schedule to these Regulations and a manual for aerodromes in category C, D and E, shall include the particulars provided in the Fifth Schedule to these Regulations.

(3) Where a person is given an exemption in accordance with Part XV, the aerodrome manual shall show the exemption notice number given for the exemption by the Authority, the date the exemption came

into effect and any conditions or procedures subject to which the exemption was granted.

58. Amendment of aerodrome manual.

(1) To maintain the accuracy of the information in an aerodrome manual—

- (a) an operator shall whenever necessary, amend the aerodrome manual;
- (b) the Authority may issue a written directive requiring an operator to alter or amend an aerodrome manual.

(2) Notwithstanding subregulation (1), an operator shall submit the proposed amendment to the Authority for approval, before an aerodrome manual is amended.

(3) The Authority shall approve an amendment made to an aerodrome manual where an amendment meets the requirements of these Regulations.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

PART VII—WILDLIFE HAZARD MANAGEMENT

59. Application of Part.

In this Part, regulation 60 applies to all categories of aerodromes and regulations 61 and 62 apply to aerodromes in categories A, B and C.

60. Animals not allowed in restricted area of aerodrome.

(1) A person shall not bring, permit or graze an animal in a restricted area of an aerodrome or cause an animal to graze or feed in a restricted area of an aerodrome.

(2) Subject to subregulation (1), a person who brings, permits or grazes an animal in a restricted area of an aerodrome or who causes an

animal to graze or feed in a restricted area of an aerodrome or who receives an animal in a restricted area of the aerodrome, shall ensure that the animal is at all times under proper control while in the restricted area.

(3) In this regulation, “animal” means a domesticated animal and a bird.

(4) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

61. Wildlife hazard management.

(1) An operator shall, in consultation with the authority responsible for wildlife, take necessary action to control wildlife hazards at an aerodrome.

(2) An operator shall ensure that procedures to deal with the danger posed to aircraft operations by the presence of birds and animals in the aerodrome flight pattern or movement area are in place.

(3) The wildlife management plan of an aerodrome shall be approved by the Authority and shall form part of the aerodrome manual.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

62. Bird hazard reduction at aerodrome.

(1) An operator shall, in consultation with the authority responsible for wildlife, take all reasonable steps to minimize the risks associated with bird strike hazards.

(2) An operator shall take practical measures to control the bird habitat at or around the aerodrome and to disperse birds, which are a potential hazard to aircraft operations.

(3) A bird strike hazard on, or in the vicinity of, an aerodrome shall be assessed through—

- (a) procedure established for recording and reporting bird strikes to aircraft; and
- (b) the collection of information from aircraft operators and aerodrome personnel, or any other person, on the presence of birds, on or around the aerodrome, which constitute a potential hazard to aircraft operations.

(4) An operator shall prepare a bird strike report in respect of the bird strike hazard at an aerodrome using the information gathered under subregulation (3).

(5) An operator shall send the bird strike hazard report to the Authority and the Authority shall then forward the report to the International Civil Aviation Organisation (ICAO) for inclusion in the International Civil Aviation Organisation (ICAO) Bird Strike Information System database.

(6) Where a bird hazard is identified at an aerodrome, the operator shall take action to decrease the number of birds constituting the potential hazard to aircraft operations by adopting measures for discouraging their presence on, or in the vicinity of the aerodrome.

(7) An operator shall take measures to eliminate or to prevent the establishment of garbage disposal dumps or any other source of garbage that may attract bird activity on, or in the vicinity of an aerodrome unless an appropriate aeronautical study indicates that the dumps are not likely to create conditions conducive to a bird hazard.

(8) An operator shall establish a bird hazard control unit to control and manage the bird hazard.

(9) An operator shall cause records of all aspects of bird hazard control to be kept and shall report all bird strikes to the Authority.

(10) An operator shall monitor the local environment including any activities that may attract birds and in designing the bird hazard management programme, shall consider the local environment and the activities that may attract birds.

63. Application of Part.

This Part applies to all categories of aerodromes.

64. Requirements for obstacle limitation.

(1) A person shall not cause or permit the erection or growth of an obstacle at or in the vicinity of an aerodrome, where the obstacle may prevent an aircraft operation from being conducted safely or the aerodrome from being usable.

(2) A person shall not cause or permit any object, to penetrate the obstacle limitation surface, without the written permission of the Authority, where the object may cause an increase in an obstacle clearance altitude or in the height for an instrument approach procedure or of any associated visual circling procedure.

(3) The object referred to in subregulation (2) includes a new object or an extension of an existing object above the obstacle limitation surface.

(4) The obstacle clearance altitude and height applicable to obstacle limitation surface, and the obstacle limitation requirements shall comply with the specifications prescribed by the Authority.

(5) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

65. Establishment of obstacle limitation surfaces.

Notwithstanding regulation 10, an operator shall ensure that obstacle limitation surfaces are established for the aerodrome, in accordance with the standards prescribed by the Authority.

66. Authorisation to construct within the vicinity of an aerodrome.

(1) A person shall not construct a building or a structure within the vicinity of an aerodrome except where that person is authorised by the Authority.

(2) Before authorisation by the Authority in accordance with subregulation (1), the Authority shall cause an aeronautical study of the effect of the construction on operation of aircraft, to be carried out.

67. Removal of obstacle.

(1) An owner of an obstacle shall remove the obstacle in the vicinity of an aerodrome, except where, after an aeronautical study, the Authority determines that the obstacle does not adversely affect the safety of operations of aircraft or significantly affect the regularity of their operations.

(2) The Authority may direct the removal of any obstacle in the vicinity of an aerodrome which, in the opinion of the Authority, constitutes a hazard to aircraft operations.

(3) Where an owner of an obstacle fails to remove the obstacle within the time directed by the Authority, the Authority shall remove the obstacle at the cost of the owner of the obstacle.

(4) An owner of an obstacle who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

68. Marking and lighting of obstacle.

(1) An operator shall ensure that an obstacle is marked and where a runway is used at night and is associated with the obstacle, that the obstacle is lighted.

(2) The markings and lights referred to in subregulation (1) shall be in accordance with guidelines prescribed by the Authority.

(3) An operator shall, where practicable, ensure that all fixed obstacles to be marked in accordance with subregulation (1) are coloured as prescribed by the Authority.

(4) Where the requirements specified in subregulation (3) are impracticable, markers or flags shall be displayed on or above the fixed obstacles, except the obstacles that are sufficiently conspicuous by their shape, size or colour, which may not be marked.

(5) An operator shall ensure that a mobile obstacle is coloured as prescribed by the Authority or has displayed on it or above it, a flag.

(6) An obstacle lighted in accordance with subregulation (1) shall be indicated as low-intensity, medium-intensity or high-intensity light obstacle or a combination of these lights and shall be displayed in accordance with guidelines prescribed by the Authority.

(7) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

PART IX—AERONAUTICAL GROUND LIGHTING

69. Application of Part.

This Part applies to aerodromes in categories A and B.

70. Establishment and maintenance of aeronautical ground lights.

(1) An operator shall establish and maintain aeronautical ground lights and any other lights as may be appropriate for the safe operation of aircraft and for runways, taxiways, aprons, thresholds and stopways.

(2) Where an aerodrome is used at night or during conditions of poor visibility, an operator shall ensure that aeronautical ground lights and any other lights are installed on the aerodrome.

(3) Without prejudice to the generality of subregulation (1), the location, characteristics, intensity control and settings of aeronautical ground lights shall be in accordance with specifications prescribed by the Authority.

(4) A non-aeronautical ground light, which, by reason of its intensity, configuration or colour, may prevent or cause confusion in the clear interpretation of aeronautical ground lights, shall be extinguished, screened or modified to eliminate such a possibility.

(5) Except with the permission of the Authority, a person shall not establish, maintain or alter the character of—

(a) an aeronautical beacon within Uganda, except an aeronautical

beacon which is or may be visible from the waters;

(b) any aeronautical ground light, other than an aeronautical beacon, at an aerodrome, or any aeronautical ground light which forms part of the lighting system for use by aircraft taking off from or landing at the aerodrome.

(6) A person shall not—

(a) intentionally or negligently damage an aeronautical ground light; or

(b) interfere with an aeronautical ground light without the permission of the operator.

(7) The Authority shall not grant permission under subregulation (5) except with the consent of the lighthouse authority of the area where the aerodrome is situated.

71. Secondary power supply.

(1) An operator shall not operate or maintain an aerodrome provided with runway lighting, without a secondary power supply.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

72. Aeronautical beacons.

(1) An operator shall, where necessary, provide an aerodrome beacon at an aerodrome intended for use at night, where—

(a) aircraft navigate predominantly by visual means;

(b) reduced visibility is frequent; or

(c) it is difficult to locate the aerodrome from the air due to a surrounding light or terrain.

(2) An identification beacon shall be provided at an aerodrome, which is intended for use at night and which is not easily identifiable from the air by other means.

(3) The location and characteristics of an aerodrome and an identification beacon described in subregulations (1) and (2) shall be in accordance with specifications prescribed by the Authority.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

PART X—AERODROME VISUAL AIDS.

73. Application of Part.

This Part applies to all categories of aerodromes.

74. Wind direction indicators.

(1) An operator shall provide and maintain at least one wind direction indicator for an aerodrome.

(2) A wind direction indicator shall be located so as to be visible to an aircraft in-flight or on the movement area and in such a way as to be free from the effects of air disturbances caused by nearby objects.

(3) The characteristics of a wind direction indicator and the methods and procedures for installation and maintenance shall be in accordance with the methods and procedures prescribed by the Authority.

(4) An operator who contravenes this regulation commits an offence and liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

75. Signalling lamp.

(1) An operator shall provide a signalling lamp at a controlled aerodrome.

(2) The characteristics and operating procedure of a signalling lamp shall be in accordance with specifications prescribed by the Authority.

(3) For the purpose of this regulation, “controlled aerodrome” means an aerodrome where air traffic control services are provided.

76. Signal panel and signalling area.

(1) The Authority may where it deems necessary, require a signalling panel and a signaling area to be provided at an aerodrome for safe operation of aircraft.

(2) Where provided, the location and the characteristics of the signal area shall be in accordance with specifications prescribed by the Authority.

77. Markings.

(1) An operator shall provide markings for a paved runway centreline, paved runway edge, paved runway threshold, paved runway touchdown zone, paved runway holding position, aiming point, paved runway side stripe, paved runway turn pad, and for an intermediate holding position at an aerodrome, in accordance with specifications prescribed by the Authority.

(2) A runway marking shall be white in colour.

(3) Taxiway markings, runway turn pad markings and aircraft stand markings shall be yellow in colour.

(4) Apron safety-lines shall be of a conspicuous colour, which shall contrast with that used for aircraft stand markings.

(5) The application, location and characteristics of markers for unpaved runway edge markers, stopway edge markers, taxiway edge markers, taxiway centreline markers and boundary markers shall be in accordance with the specifications prescribed by the Authority.

78. VOR aerodrome checkpoint marking.

(1) An operator shall ensure that where a VOR aerodrome checkpoint is established at an aerodrome, it is indicated by a VOR aerodrome checkpoint sign.

(2) The VOR aerodrome checkpoint location and characteristics

shall be in accordance with specifications prescribed by the Authority.

79. Aircraft stand markings.

79. An operator shall provide aircraft stand markings for designated parking positions on a paved apron in accordance with specifications prescribed by the Authority.

80. Apron safety lines.

An operator shall provide apron safety lines on a paved apron as required by the parking configuration and ground facilities and in accordance with specifications prescribed by the Authority.

81. Road-holding positions.

(1) An operator shall provide road-holding position markings at all road entrances to a runway.

(2) The road-holding position markings provided under subregulation (1) shall be located across the road at all the holding positions.

(3) The road-holding position marking shall be as prescribed by the Authority.

82. Mandatory instruction markings and signs.

(1) An operator shall provide a mandatory instruction marking and a sign to identify a location beyond which a taxiing aircraft or vehicle shall not proceed, except where it is authorized by the aerodrome control tower.

(2) Where it is impracticable to install a mandatory instruction marking or a sign in accordance with subregulation (1), the mandatory instruction marking or sign shall be provided on the surface of the pavement.

(3) The locations and characteristics of the mandatory instruction marking and sign shall be in accordance with specifications prescribed by the Authority.

(4) An operator shall provide signs to convey mandatory instructions and information on a specific location or destination on a movement area, or to provide surface movement guidance and control.

(5) The location and characteristics of the signs referred to in subregulation (4) shall be in accordance with the specifications prescribed by the Authority.

83. Information marking.

Where an information sign is required but is physically impossible to install, an operator shall install an information marking, in accordance with specifications prescribed by the Authority.

84. Visual aids for denoting obstacles.

(1) An operator shall ensure that the visual aids for denoting obstacles are frangible and that those located near a runway or taxiway are sufficiently low to preserve clearance for propellers and for engine pods of jet aircraft.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

85. Obstacles to be marked or lighted.

An operator shall ensure that all fixed obstacles that extend above take-off climb surfaces are marked and that where the runway is used at night, the obstacles are lighted in accordance with the specifications prescribed by the Authority.

86. Visual aids for denoting restricted areas.

(1) An operator shall ensure that restricted areas are marked in a manner that is visible to aircraft operating on the ground and in the air.

(2) Without prejudice to the generality of subregulation (1), markings denoting restricted areas such as closed runways and taxiways, non-load-bearing surfaces, pre-threshold areas and unserviceable areas shall be done in accordance with the specifications prescribed by the Authority.

87. Application of Part.

This Part applies to all categories of aerodromes except where otherwise specified.

88. Immigration, customs and health functions at aerodromes.

The Authority may, in consultation with the authorities responsible for immigration, customs and health, notify of any aerodrome which is introduced as, or ceases to be a place for landing or departure of aircraft in accordance with the laws relating to immigration, customs and health.

89. Supply of aviation fuel to aircraft.

(1) An operator of an aviation fuel installation at an aerodrome shall not cause or permit aviation fuel to be delivered to that installation or from it, to an aircraft unless—

- (a) when the aviation fuel is delivered to the installation, the operator of the aviation fuel installation is satisfied that—
 - (i) the installation is capable of storing and dispensing the fuel so as not to render it unfit for use in an aircraft;
 - (ii) the installation is marked in an appropriate manner to the grade of the fuel stored or where different grades are stored in different parts, that each part is so marked;
 - (iii) in the case of delivery into the installation or part of the installation from a vehicle or vessel, the fuel has been sampled and is of the grade appropriate to that installation or part of the installation as the case may be and is fit for use in an aircraft;
- (b) when aviation fuel is dispensed from the installation, the operator of the aviation fuel installation is satisfied after sampling, that the fuel is fit for use in an aircraft.

(2) A person shall not cause or permit aviation fuel to be dispensed for use in an aircraft where that person knows or has reason to believe that the aviation fuel is not fit for use in the aircraft.

(3) An operator of an aviation fuel installation shall not on an aerodrome, supply fuel to an aircraft except at a place and in a manner approved by the operator.

(4) Approval granted by an operator under subregulation (3), may be subject to any conditions the operator may impose, in order to safeguard persons or property on the ground.

(5) An operator of an aviation fuel installation shall keep a written record for the installation.

(6) The record in subregulation (5) shall include—

(a) particulars of the grade and quantity of aviation fuel delivered and the date of delivery;

(b) particulars of all samples taken of the aviation fuel and of the results of the tests of those samples; and

(c) particulars of the maintenance and cleaning of the installation.

(7) An operator of an aviation fuel installation shall preserve the written record for a period of twelve months or such longer period as the Authority may in a particular case direct and shall, within a reasonable time after being requested to do so by an authorised person, produce the record to that authorised person.

(8) Where it appears to the Authority or to an authorised person that aviation fuel is intended or likely to be delivered in contravention of this regulation, the Authority or that authorised person may direct the operator of an aviation fuel installation not to permit aviation fuel to be dispensed from that installation until the direction is revoked by the Authority or that authorised person.

(9) For the purpose of this regulation—

(a) "aviation fuel" means fuel intended for use in an aircraft; and

(b) "aviation fuel installation" means any apparatus or container, including a vehicle designed, manufactured or adapted for the storage of aviation fuel or for the delivery of fuel to an aircraft.

(10) A person who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

90. Aerodrome emergency planning

(1) An operator shall establish an aerodrome emergency plan at the aerodrome.

(2) An aerodrome emergency plan shall—

(a) be commensurate with the aircraft operations and activities conducted at the aerodrome; and

(b) provide for the coordination of the actions to be taken in the event of an emergency occurring at the aerodrome or in its vicinity.

(3) An emergency referred to in subregulation (2) (b) includes an aircraft emergency, natural disasters and sabotage including bomb threats, unlawful seizure of aircraft, the effect of improper handling, transportation and storage of dangerous goods and occurrences of building fires.

(4) The emergency plan shall provide for the coordination with the rescue coordination centre and for the response and participation of all agencies whose assistance is required in the event of an emergency, including—

(a) at an aerodrome—

(i) the air traffic control unit;

(ii) rescue and fire fighting services;

(iii) the aerodrome administration;

- (iv) medical and ambulance services;
 - (v) aircraft operators;
 - (vi) security services;
 - (vii) the airport police unit;
- (b) outside the aerodromes—
- (i) the fire department;
 - (ii) the police;
 - (iii) medical and ambulance services;
 - (iv) hospitals;
 - (v) military forces;
 - (vi) harbour patrol or coast guard.
- (5) The emergency plan shall include—
- (a) the types of emergencies planned for;
 - (b) agencies to be involved in the plan;
 - (c) the responsibility and role of each agency, the emergency operation centre and the command post for each type of emergency;
 - (d) names and contacts of offices or people to be contacted for each type of emergency; and
 - (e) a grid map of the aerodrome and its immediate vicinity.

(6) In developing an aerodrome emergency plan, the operator shall take into consideration the human factor principles to ensure optimum response by all existing agencies participating in the emergency operations.

(7) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(8) This regulation applies to aerodromes in categories A and B and category C, where required by the Authority.

91. Emergency planning committee.

(1) An operator shall form an emergency planning committee to discuss, determine and implement emergency planning arrangements.

(2) The emergency planning arrangements shall be commensurate with the size and type of aircraft that use the aerodrome.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(4) This regulation applies to aerodromes in categories A and B and category C, where required by the Authority.

92. Aerodrome emergency exercise.

(1) An emergency plan established under regulation 90 shall contain procedures for periodic testing of the adequacy of the plan and for reviewing of the results in order to improve its effectiveness.

(2) Without prejudice to the generality of subregulation (1), the plan shall be tested by conducting—

- (a) full scale emergency exercises every two years;
- (b) partial emergency exercises every year, to ensure that any deficiencies found during the full scale aerodrome emergency exercise are corrected and reviewed, or after an actual emergency, to correct any deficiency found;
- (c) table top emergency exercises every six months; and
- (d) contingency plan exercises in accordance with the Civil Aviation (Security) Regulations.

(3) This regulation applies to aerodromes in categories A, B and category C, where required by the Authority.

93. Emergency operation centre and command post.

(1) An operator shall ensure that a fixed emergency operations centre and a mobile command post are available for use during an emergency.

(2) An operator who contravenes subregulation (1) commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(3) This regulation shall apply to aerodromes in categories A and B and category C, where required by the Authority.

94. Emergencies in difficult environment.

(1) Where an aerodrome is located close to water or a swampy area and where a significant portion of approach or departure operations takes place over such an area, the emergency plan established under regulation 90 shall include the ready availability of and co-ordination with appropriate specialist rescue services.

(2) At an aerodrome located close to a water body, a swampy area, or difficult terrain, the aerodrome emergency plan shall include the establishment, testing and assessment at regular intervals of a pre-determined response for the specialist rescue services.

(3) This regulation applies to aerodromes in categories A and B and category C, where required by the Authority.

95. Aerodrome rescue and fire fighting services.

(1) For the purpose of this regulation, aerodromes shall be categorised in accordance with Table 2.

(2) An operator shall put in place rescue and fire fighting facilities commensurate with the category of the aerodrome as specified in Table 2.

(3) Where an aerodrome is located close to a water body, a swampy area or difficult terrain and where a significant portion of approach or departure operations takes place over such an area, specialist rescue

services and fire-fighting equipment appropriate to the hazard and risk shall be made available.

Aerodrome category	Aircraft overall length	Maximum fuselage width
1	0 metres up to but not including 9 metres	2 metres
2	9 metres up to but not including 12 metres	2 metres
3	12 metres up to but not including 18 metres	3 metres
4	18 metres up to but not including 24 metres	4 metres
5	24 metres up to but not including 28 metres	4 metres
6	28 metres up to but not including 39 metres	5 metres
7	39 metres up to but not including 49 metres	5 metres
8	49 metres up to but not including 61 metres	7 metres
9	61 metres up to but not including 76 metres	7 metres
10	76 metres up to but not including 90 metres	8 metres

(4) The level of protection provided at an aerodrome for rescue and fire fighting shall be appropriate to the aerodrome category which shall be determined using the principles in subregulations (5) and (6).

(5) For purposes of aerodrome rescue and fire fighting services, the aerodrome category shall be determined using Table 2 and shall be based on the longest aircraft that normally uses the aerodrome, and its fuselage width.

(6) Where after selecting the aerodrome category appropriate to the overall length of the longest aircraft, the fuselage of that aircraft is found to be greater than the maximum width provided for that category, in column 3 of Table 2, the category for that aircraft shall be the next category.

Aerodrome Category (1)	Foam meeting performance level A		Foam meeting performance level B		Complementary agents Dry Chemical Powder (DCP) (kg) (6)
	Water (litres) (2)	Discharge rate Foam solution/minute (litres) (3)	Water (litre) (4)	Discharge rate Foam solution/minute (litres) (5)	
1	350	350	230	230	45
2	1000	800	670	550	90
3	1800	1300	1200	900	135
4	3600	2600	2400	1800	135
5	8100	4500	5400	3000	180
6	11800	6000	7900	4000	225
7	18200	7900	12100	5300	225
8	27300	10800	18200	7200	450
9	36400	13500	24300	9000	450
10	48200	16600	32300	11200	450

Table 2 – Aerodrome category for rescue and fire fighting

(7) The amounts of water for foam production and the complementary agents to be provided on the rescue and fire fighting vehicles shall be in accordance with the aerodrome category determined under subregulations (4) and (5) and Table 3.

(8) The amounts of water for foam production may be replaced as follows—

- (a) for aerodrome categories one and two, up to one hundred *per cent* of water may be replaced by a complementary agent;

- (b) for aerodrome categories three to ten, where a foam meeting performance level A is used, up to thirty *per cent* of the water may be replaced by a complementary agent.

Table 3 - Minimum usable amounts of extinguishing agents

- (9) The quantities of water shown in columns 2 and 4 of Table 3 are

Aerodrome category	Number of rescue and fire fighting vehicles
1	1
2	1
3	1
4	1
5	1
6	2
7	2
8	3
9	3
10	3

based on the average overall length of aircraft in a given category and where operations of aircraft larger than the average size are expected, the quantities of water shall be recalculated.

- (10) Any other complementary agent other than dry chemical powder, which has equivalent fire fighting capability, may be used.

(11) The operational objective of a rescue and fire fighting service shall be to achieve a response time not exceeding three minutes to any point of each operational runway, in optimum visibility and surface conditions.

(12) All rescue and fire fighting personnel shall be properly trained, including training in human performance and team coordination and shall participate in live fire drills commensurate with the types of aircraft and rescue and fire fighting equipment in use at the aerodrome, including pressure-fed fuel fires.

- (13) The minimum number of rescue and fire fighting vehicle

provided at an aerodrome shall be as provided in the second column for the aerodrome category in the first column of Table 4 and shall correspond to the foam meeting performance in the third column of Table 3.

Table 4 - Minimum number of rescue and fire fighting vehicle

(14) This regulation shall not apply to aerodromes in categories C, D and E, unless otherwise specified by the Authority in the licence of the aerodrome.

96. Removal of disabled aircraft.

(1) An operator shall have in place a plan for the removal of disabled aircraft from the movement area or from an area adjacent to it.

(2) The plan for the removal of disabled aircraft shall be based on the characteristics of the type of aircraft operations and shall include—

- (a) a list of equipment and personnel available for the purpose;
- (b) arrangement for the rapid receipt of aircraft recovery equipment kits from other aerodromes, where applicable; and
- (c) the name of the co-ordinator designated to implement the plan.

(3) The plan under this regulation shall include particulars of the procedures for removing a disabled aircraft from the movement area or from an area adjacent to it.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or to both.

(5) This regulation shall not apply to aerodromes in categories C, D and E, unless otherwise specified by the Authority in the licence of the aerodrome.

97. Apron management service.

(1) An operator shall provide an apron management service at an aerodrome where air traffic service is provided at that aerodrome.

(2) The apron management service established under subregulation (1) shall be provided by an operator, an aerodrome air traffic service unit, or a combination of these, as may be specified for each category of aerodrome, in the Aeronautical Information Publication (AIP) and the Aeronautical Information Circular (AIC).

(3) Subject to subregulation (2), where the aerodrome control tower does not participate in the apron management service, procedures shall be established to facilitate the orderly transition of aircraft between the apron management unit and the aerodrome control tower.

(4) An operator shall ensure that, where an apron management service is established, radio communication facilities are provided.

(5) Where low visibility procedures are in effect, persons and vehicles operating in the apron shall be restricted to the essential minimum.

(6) An emergency vehicle responding to an emergency shall have priority over all other surface movement traffic and any vehicle operating on an apron shall give way to an emergency vehicle or to an aircraft which is about to taxi, or which is being pushed or towed.

(7) An aircraft stand at an apron where apron management service is provided shall be visually monitored to ensure that the recommended clearance distances are provided to an aircraft using the stand.

(8) This regulation applies to aerodromes in categories A and B.

98. Ground servicing of aircraft.

(1) An operator shall ensure that fire extinguishing equipment, suitable for at least the initial intervention in the event of a fuel fire, is readily available during the ground servicing of an aircraft, and that there is means of quickly summoning the rescue and fire fighting service in the event of a fire or major fuel spill.

(2) An operator shall ensure that, when aircraft refuelling operations take place while passengers are on board, embarking or disembarking, ground equipment is positioned in a manner that allows—

- (a) the use of a sufficient number of exits for expeditious evacuation; and
- (b) a ready escape route from each of the exits to be used in an emergency.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

99. Aerodrome vehicle operation.

(1) A person shall not operate a vehicle on the manoeuvring area at an aerodrome where air traffic service is provided, except where authorized by the aerodrome control tower.

(2) A person shall not operate a vehicle on an apron of an aerodrome except where authorized by the operator.

(3) A driver of a vehicle operating on the movement area shall have a rotating beacon.

(4) A driver of a vehicle on the movement area shall comply with all mandatory instructions conveyed by markings and signs, when the vehicle is on the manoeuvring area, except where the driver is authorized by the aerodrome control tower.

(5) A driver of the vehicle on the movement area shall comply with all mandatory instructions conveyed by markings and signs, when the vehicle is on an apron, except where the driver is authorized by the aerodrome operator.

(6) A driver of a vehicle on the movement area shall comply with all mandatory instructions conveyed by lights and instructions issued by the aerodrome control tower when the vehicle is on the manoeuvring area or by

the appropriate designated authority, when the vehicle is on an apron.

(7) A driver of a vehicle on the movement area shall be appropriately trained for the tasks to be performed and shall be issued with a permit by the operator.

(8) A driver of a radio-equipped vehicle shall—

(a) establish satisfactory two-way radio communication with the aerodrome control tower before entering the manoeuvring area;

(b) establish satisfactory two-way radio communication with the appropriate designated authority before entering the apron; and

(c) maintain a continuous listening watch on the assigned frequency while on the movement area.

(9) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(10) This regulation shall not apply to aerodromes in categories C, D and E, unless otherwise specified by the Authority in the licence.

100. Location, construction and installation of equipment on operational areas.

(1) Except for the purpose of air navigation, a person shall not construct or install equipment or any installation on a runway strip, a runway end safety area, a taxiway strip, a clearway or within any distances determined by the Authority, where the construction or the equipment may endanger the safety of an aircraft.

(2) Where any equipment or installation required for air navigation purposes is to be located on a portion of a runway strip or on a runway end safety area, a taxiway strip or within any distances determined by the Authority, the equipment or installation shall be located in

accordance with the standards specified by the Authority.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

101. Fencing of aerodromes and installations.

(1) An operator of a aerodrome shall provide a fence or a suitable barrier on the aerodrome—

- (a) to prevent the entrance into the movement area, of any animals likely to be a hazard to aircraft; and
- (b) to deter the inadvertent or premeditated access of an unauthorised person onto a non-public area of the aerodrome.

(2) An operator shall provide suitable means of protection for an aerodrome to deter the inadvertent or premeditated access of unauthorised persons into ground installations and facilities, essential for the safe operation of aircraft.

(3) The fence or barrier required under subregulation (1) shall be located so as to separate the movement area and other facilities or zones on the aerodrome which are vital to the safe operation of aircraft, from areas open to public use.

(4) Where greater security is needed, a cleared area shall be provided on both sides of the fence or barrier to facilitate the work of patrols and to make trespassing more difficult and provision for a perimeter road along the aerodrome fencing for the use of both maintenance personnel and security patrols may be made.

(5) Where the Authority deems it necessary for security reasons, the fence or barrier provided under subregulation (1) shall be illuminated at a minimum essential level and the security lighting shall be located so that the ground area on both sides of the fence or barrier, particularly at access points, is illuminated.

(6) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

(7) This regulation applies to aerodromes in categories A and B.

102. Maintenance of safety inspection programme.

(1) An operator shall establish and maintain a safety inspection programme for the aerodrome.

(2) The safety inspection programme shall—

(a) provide procedures to ensure that competent aerodrome personnel execute the programme effectively; and

(b) provide a reporting system to ensure prompt correction of unsafe aerodrome conditions noted during any inspection.

103. Maintenance of fire prevention programme.

(1) An operator shall establish a fire prevention programme with preventive measures against any possible fire on the aerodrome and identify a person to maintain the fire prevention programme for the aerodrome and the aerodrome buildings.

(2) Where an aerodrome does not have designated fire service, the operator shall arrange with the relevant local government authority or any other concerned authority to maintain a fire prevention programme for the aerodrome and to advise the operator of any dangerous conditions for rectification.

(3) An operator shall ensure that unsafe practices that may result in fire are not performed on the aerodrome or within its vicinity.

(4) Notwithstanding subregulation (3), where unsafe practices are performed during maintenance on the aerodrome, an operator shall alert the rescue and fire fighting services concerned, to be on standby for the duration of the unsafe practices.

(5) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

104. Access of ground vehicles to aerodrome movement area.

(1) An operator shall—

- (a) limit the access of a ground vehicle used for aerodrome and aircraft operations, to the aerodrome manoeuvring area;
- (b) provide adequate procedures for the safe and orderly access to the aerodrome and operation in the manoeuvring area of ground vehicles, where an air traffic service unit is in operation at the aerodrome, in order to ensure that each ground vehicle operating in the aerodrome manoeuvring area is controlled by—
 - (i) two-way radio communication between the vehicle and the air traffic service unit;
 - (ii) an accompanying radio communication or an escort vehicle with adequate measures including signals or guards to control the vehicle, where the vehicle does not have a radio;
- (c) provide adequate measures to ensure that ground vehicles operating in the aerodrome movement area are controlled by signs, pre-arranged signals or standards prescribed by the Authority, where an air traffic service unit is not in operation at the aerodrome;
- (d) ensure that any person who operates a ground vehicle on the aerodrome movement area is familiar with and complies with the rules and procedures for the operation of ground vehicles as prescribed by the Authority.

(2) An operator shall ensure that a person who has access to the aerodrome movement area wears a coloured reflective gear which shall

be conspicuously displayed while on the movement area.

(3) For the purpose of this regulation, “gear” includes a vest, band, overcoat, helmet and socks.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

PART XII—AERODROME MAINTENANCE.

105. Application of Part.

(1) Regulations 106, 107, 108 and 109 apply to aerodromes in categories A and B.

(2) Regulation 110 applies to all categories of aerodromes.

106. Maintenance programme.

(1) To maintain a facility in a condition that does not impair the safety, regularity and efficiency of air navigation, an operator shall establish at the aerodrome, a maintenance programme, which shall include preventive maintenance measures.

(2) For the purpose of this regulation, “preventive maintenance measures” means programme maintenance work done to prevent failure or degradation of a facility.

108. Maintenance of pavements.

(1) An operator shall at all times ensure that—

(a) the surface of pavements including runways, taxiways and aprons are kept clear of any loose stones or other objects which may cause damage to aircraft structures or engines or which may impair the operation of aircraft systems;

(b) the surface of a runway is maintained in a condition that precludes formation of harmful irregularities such as water pools and rough surfaces;

(c) measurements of the friction characteristics of the runway are

made periodically with a continuous friction measuring device using self-wetting features;

- (d) corrective maintenance action is taken whenever the friction characteristics for the entire runway or portion of it are below the prescribed minimum friction level or minimum maintenance planning level;
- (e) where the drainage characteristics of a runway, or portions of the runway are poor due to slopes or depressions, the runway friction characteristics are assessed under natural or simulated conditions that are representative of local rain and that corrective maintenance action is taken where necessary;
- (f) where a taxiway is used by turbine-engine aircraft, the surface of the taxiway shoulders is maintained so as to be free of any loose stones or other objects that may be ingested by the aircraft engines;
- (g) the surfaces of the paved runways, taxiways and aprons, are maintained in a condition that provides good friction characteristics and low rolling resistance;
- (h) any standing water, mud, dust, oil, rubber deposits and other contaminants are removed to minimize accumulation, with priority given to runways, taxiways, aprons, holding bays and other areas, in that order.

(2) An operator shall ensure that the overlaying of runway pavements is done in accordance with standards prescribed by the Authority so that aircraft operations do not experience down ramp.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

108. Preventive maintenance of visual aids.

- (1) An operator shall not operate an aerodrome unless a system of

preventive maintenance of visual aids is employed at the aerodrome.

(2) The system of preventive maintenance required under subregulation (1) shall, if employed for instrument precision approach runways categories I and II include—

- (a) visual inspections and in-field measurement of the intensity, beam spread and orientation of lights included in the approach and runway lighting systems;
- (b) control and measurement of the electrical characteristics of each circuitry included in the approach and runway lighting systems; and
- (c) control of the correct functioning of the light intensity settings used by air traffic control unit.

(3) The in-field measurements of intensity, beam spread and orientation of lights applicable to instrument precision approach runways categories I and II shall be undertaken by measuring all lights, as far as practicable to ensure conformity with prescribed specifications using a mobile measuring unit of sufficient accuracy to analyse the characteristics of individual lights.

(4) The frequency of measurement of lights shall be at least twice a year for instrument precision approach runways categories I and II and at least once a year for other lights.

(5) An operator who is required to employ a system of preventive maintenance under subregulation (1), for instrument precision approach runways categories I and II operations and for operations under runway visual range conditions, shall comply with specifications prescribed by the Authority.

(6) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

109. Construction or maintenance activity during periods of low visibility operations.

(1) An operator shall ensure that any construction or maintenance activity is not undertaken in the proximity of aerodrome electrical systems at any time during periods of low visibility operations.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or to both.

110. Works on aerodrome.

(1) An operator shall establish procedures and precautions to ensure that any works carried out on an aerodrome do not endanger the safety of any aircraft operations.

(2) The procedures and precautions in subregulation (1) shall comply with standards prescribed by the Authority.

PART XIII—ELECTRICAL SYSTEMS

111. Application of Part.

This Part applies to all categories of aerodromes.

112. Electrical power supply systems for air navigation facilities.

(1) An operator shall not operate an aerodrome unless adequate primary power supply systems are made available for the safe functioning of air navigation services and facilities.

(2) The design and provision of electrical power systems for aerodrome visual and radio navigation aids shall be such that equipment failure does not leave the pilot with inadequate visual and non-visual guidance or misleading information.

(3) Where secondary power is required for air navigation services and facilities, the operator shall arrange the electric power supply connections so as to ensure that the facilities are automatically connected to the secondary power supply upon failure of the primary power supply.

(4) Subregulation (3) applies to non-instrument runways except that a secondary power supply for visual aids may not be provided where an emergency lighting system is provided and is capable of being deployed within fifteen minutes.

(5) At an aerodrome where the primary runway is an instrument

Runway Type	Lighting aids requiring power	Maximum switch-over time
Non-instrument	Visual approach slope indicators ^a	15 seconds
	Runway edge ^b	15 seconds
	Runway threshold ^b	15 seconds
	Runway end ^b	15 seconds
	Obstacle	15 seconds
Non-precision approach	Approach lighting system	15 seconds
	Visual approach slope indicators ^{a,d}	15 seconds
	Runway edge ^d	15 seconds
	Runway threshold ^d	15 seconds
	Runway end ^d	15 seconds
Precision approach category I	Approach lighting system	15 seconds
	Visual approach slope indicators ^{a,d}	15 seconds
	Runway edge ^d	15 seconds
	Runway threshold ^d	15 seconds
	Runway end	15 seconds
	Essential taxiways ^a	15 seconds
Precision approach category II	Obstacle ^a	15 seconds
	Inner 300 m of the approach lighting system	1 second
	Other parts of the approach lighting system	15 seconds
	Runway edge	15 seconds
	Runway threshold	1 second
	Runway end	1 second
	Runway centre line	1 second
	Runway touchdown zone	1 second
	All stop bars	1 second
Essential taxiway	15 seconds	
Runway meant for take-off in runway visual range conditions less than a value of 800 m	Runway edge	15 seconds ^c
	Runway end	1 second
	Runway centre line	1 second
	All stop bars	1 second
	Essential taxiway ^a	15 seconds
	Obstacle ^a	15 seconds

Note

a. Supplied with secondary power when their operation is essential to the safety of flight operation.

c. One second where no runway centre line lights are provided.

d. One second where approaches are over hazardous or precipitous terrain.

non-precision approach runway, a secondary power supply capable of fulfilling the requirements of subregulation (3) shall be provided, except that a secondary power supply for visual aids need not be provided for more than one instrument non-precision approach runway.

(6) An operator shall provide the following aerodrome facilities with secondary power supply capable of supplying power where there is a failure of the primary power supply—

- (a) the signalling lamp and the minimum lighting necessary to enable air traffic services personnel to carry out their duties;
- (b) all obstacle lights which, in the opinion of the Authority are essential to ensure the safe operation of aircraft;
- (c) approach, runway and taxiway lighting;
- (d) meteorological equipment;
- (e) essential security lighting, if provided;
- (f) essential equipment and facilities for the aerodrome emergency agencies;
- (g) floodlighting on a designated isolated aircraft parking position if provided; and
- (h) illumination of apron areas over which passengers may walk.

(7) The maximum switch-over time between failure of the primary source of power and the secondary source of power for the services required by subregulation (6) shall be as indicated in Table 5.

Table 5 - Secondary power supply requirements

(8) For the purpose of this regulation, “switch-over time” means the time required for the actual intensity of a light measured in a given direction to fall from fifty *per cent* and recover to fifty *per cent* during a power supply changeover, when the light is being operated at intensities of twenty five *per cent* or more.

(9) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four

months or both.

PART XIV—AERONAUTICAL INFORMATION TO BE REPORTED TO
AERONAUTICAL INFORMATION SERVICES

113. Application of Part.

This Part applies to all categories of aerodromes.

114. Information to be availed to users of aerodromes.

(1) An operator shall ensure that all information relating to the aerodrome and its facilities, which is significant for the conduct of flights to and from the aerodrome, is available to the users of the aerodrome.

(2) An operator shall be responsible for notifying the Aeronautical Information Services of any errors and omissions in the aeronautical information of operational significance, published in the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC) or in the Notice to Airmen (NOTAM), and of any pending changes in the aerodrome or its facilities which are likely to affect this information.

(3) An operator shall provide information on the following for the guidance of pilots and operators—

- (a) construction or maintenance work on or immediately adjacent to the manoeuvring area;
- (b) unserviceable portions of any part of the manoeuvring area;
- (c) the runway surface conditions when affected by water, damp, wet, water patches or flooded, as appropriate;
- (d) parked aircraft or other objects on, or immediately adjacent to the taxiways;
- (e) the presence of other temporary hazards;
- (f) failure or irregular operation of any part of the aerodrome lighting system, or of the aerodrome main and secondary power supplies;

- (g) failure, irregular operation and changes in the operational status of any electronic approach or navigation aid, or aeronautical communication facility;
- (h) failures and changes in the runway visual range observer system; and
- (i) any other information of operational significance.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

115. Action required for occurrences of operational significance other than those involving electronic aids and communication facilities.

(1) Where any of the following conditions occur or are anticipated, an operator shall take immediate action to amend the information contained in the Aeronautical Information Circular (AIC) and where necessary, promulgate the change by Notice to Airmen (NOTAM) through the Aeronautical Information Services using the Aeronautical Information Services address notified in the Aeronautical Information Circular (AIC)—

- (a) changes in the availability of the manoeuvring area and changes in the runway declared distance; except that increases in declared distances may only be made with the approval of the Authority;
- (b) significant changes in aerodrome lighting and other visual aids;
- (c) presence or removal of temporary obstructions to aircraft operation in the manoeuvring area;
- (d) presence of airborne hazards to air navigation;
- (e) interruption, return to service, or major changes to rescue facilities and fire fighting services available; except that permanent

changes to the promulgated rescue fire fighting category may only be made with the approval of the Authority;

- (f) failure of or return to operation of hazard beacons and obstruction lights on or in the vicinity of the aerodrome;
- (g) erection or removal of obstructions to air navigation, and erection or removal of significant obstacles in take-off, climb or approach areas;
- (h) air displays, air races, parachute jumping, or any unusual aviation activity; and
- (i) any other information of operational significance.

(2) Where any of the conditions in subregulation (1) arises at short notice, an operator shall notify the Aeronautical Information Services for promulgation of a Notice to Airmen (NOTAM).

(3) Where any of the conditions in subregulation (1) is intended, the operator shall make a written request to the Aeronautical Information Services, for the amendment of the Aeronautical Information Publication (AIP) and the Aeronautical Information Circular (AIC) or for supplementary action.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

116. Action required for occurrences that affect electronic aids and communication facilities.

(1) An operator or a person in charge of a navigation facility shall initiate Notice to Airmen (NOTAM) action—

- (a) for the establishment or withdrawal of electronic aids to air navigation; and

(b) for changes in the regularity or reliability of operation of any electronic aid to air navigation or aeronautical communication facility.

(2) An operator or a person in charge of a navigation facility shall request for the Notice to Airmen (NOTAM) action, or an amendment or a supplement of the Aeronautical Information Publication (AIP) or the Aeronautical Information Circular (AIC) directly from the Aeronautical Information Services or through channels established by the Authority.

(3) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

117. Aeronautical data reporting

(1) An operator shall provide to the Authority for promulgation, accurate aeronautical data as specified in the Sixth Schedule to these Regulations.

(2) An operator shall ensure that aerodrome related aeronautical data is adequate and accurate and that the integrity of the data is maintained and protected throughout the data process from survey or origin up to the next intended user.

(3) An operator shall determine and report aerodrome related aeronautical data in accordance with prescribed accuracy and integrity requirements while taking into account the established quality system procedures.

(4) Accuracy requirements for aeronautical data shall be based upon a ninety five *per cent* confidence level and in that respect, three types of positional data, namely; surveyed points, calculated points and declared points shall be identified.

(5) Without prejudice to the generality of subregulations (1), (2), (3) and (4), the determination and reporting of aerodrome aeronautical data

shall be in accordance with the accuracy and integrity levels prescribed by the Authority or by a person in charge of a navigation facility.

(6) Subject to subregulation (5), the following classification and data integrity levels shall apply—

- (a) critical data, integrity level 1×10^{-8} : where there is a high probability, when using corrupted critical data that the continued safe flight and landing of an aircraft may be severely at risk with the potential for catastrophe;
- (b) essential data, integrity level 1×10^{-5} : where there is a low probability, when using corrupted essential data that the continued safe flight and landing of an aircraft may be severely at risk with the potential for catastrophe;
- (c) routine data, integrity level 1×10^{-3} : where there is a very low probability when using corrupted essential data that the continued safe flight and landing of an aircraft may be severely at risk with the potential for catastrophe.

(7) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

PART XV—EXEMPTIONS

118. Application of Part.

This Part applies to all categories of aerodromes.

119. Application for exemption.

(1) A person may apply to the Authority for an exemption from any provision of these Regulations.

(2) An application for an exemption from any provision of these Regulations shall be submitted at least sixty days before the proposed effective date of exemption.

(3) An application for exemption shall contain—

- (a) the name, physical address, mailing address, telephone number, fax

- number and email address of the applicant, where available;
- (b) the specific requirement from which the applicant seeks exemption;
 - (c) justification for the exemption;
 - (d) a description of the type of operations to be conducted under the proposed exemption;
 - (e) the proposed duration of the exemption;
 - (f) a detailed description of the alternative means by which the applicant is to ensure a level of safety equivalent to that established by the regulation from which the exemption is applied for;
 - (g) a review of any known safety concerns related to the required exemption, including information about any relevant accidents or incidents of which the applicant is aware;
 - (h) where the applicant seeks to operate under the proposed exemption outside the air space of Uganda, an indication as to whether the exemption may contravene any provision of the standards and any regulations pertaining to the airspace in which the operation is to occur; and
 - (i) any other relevant information that may be required by the Authority.

(4) Where the applicant seeks emergency processing of an application for exemption, the application shall contain facts and reasons to support the reasons for not filing the application within the time specified in subregulation (2) and satisfactory reasons for deeming the application an emergency.

(5) The Authority may refuse an application made under subregulation (4) where in the opinion of the Authority, the reasons given for emergency processing are not satisfactory.

(6) An application for exemption shall be accompanied by a fee

specified by the Authority.

120. Initial review by the Authority.

(1) The Authority shall review an application for exemption, for accuracy and compliance with the requirements of regulation 119.

(2) Where the Authority determines that the application for exemption meets the requirements of this Part and that a review of its merits are justified, the Authority shall notify and may publish in the *Gazette* or at least one local daily newspaper of wide circulation, a detailed summary of the application, for public comment, specifying the date by which the comments are to be received by the Authority for consideration.

(3) Where the applicant does not meet the requirements of regulations 119, the Authority shall inform the applicant and no further action shall be taken on that application.

121. Evaluation of application for exemption

(1) The Authority shall conduct an evaluation of an application after the initial review in accordance with regulation 120, to determine whether—

- (a) the proposal by the applicant provides a level of safety equivalent to that established by the regulation from which the exemption is sought;
- (b) a grant of the exemption would contravene the applicable standards;
- (c) the request should be granted or refused and if granted, any conditions or limitations that may be part of the exemption.

(2) The Authority shall inform the applicant in writing and publish a detailed report of its evaluation and decision to grant or deny the application for exemption.

(3) The report referred to in subregulation (2) shall specify the duration of the exemption and any conditions or limitations of the exemption.

(4) Where an exemption affects a significant population of the

aviation industry in Uganda, the Authority shall publish the report in the Aeronautical Information Circular (AIC).

PART XVI—MISCELLANEOUS.

122. Application of Part.

This Part applies to all categories of aerodromes except where otherwise specified.

123. Change of name.

(1) A holder of an licence or certificate may apply to the Authority to change the name of the holder of the licence or certificate.

(2) An application in subregulation (1) shall be accompanied by—

(a) the current licence or certificate; and

(b) a court order, or any other legal document verifying the change of name, if any.

(3) The Authority shall change the name of the holder and issue a replacement licence or certificate with the appropriate endorsement.

(4) The Authority shall retain copies of the documents submitted under subregulation (2).

124. Change of address.

(1) A holder of an licence or certificate, shall inform the Authority of—

(a) change in the physical address, at least fourteen days before the change; and

(b) the mailing address, upon the change.

(2) Where a holder of a licence or certificate does not inform the Authority of a change in the physical address within the time specified in subregulation (1), the Authority may suspend the licence or certificate.

125. Use and retention of licences, certificates and records.

(1) A person shall not—

- (a) use a licence, certificate, approval, permission, exemption or any other document issued or required by or under these Regulations which is forged, altered, revoked, or suspended, or which the person is not entitled to use;
- (b) forge or alter a licence, certificate, approval, permission, exemption or any other document issued or required by or under these Regulations;
- (c) lend a licence, certificate, approval, permission, exemption or any other document issued or required by or under these Regulations to any other person;
- (d) make any false representation for the purpose of procuring for himself, herself or any other person the issue, renewal or variation of an licence, certificate, approval, permission or exemption or other document.

(2) A person shall not, during the period for which it is required under these Regulations to be preserved—

- (a) mutilate, alter, render illegible or destroy a licence, certificate or any entry made in any record;
- (b) knowingly make, procure or assist in the making of any false entry in a licence, certificate or record;
- (c) wilfully omit to make a material entry in an licence, certificate or record.

(3) A record required to be maintained under these Regulations shall be recorded in a permanent and indelible material.

(4) A person shall not purport to issue a licence, certificate or exemption for the purpose of these Regulations unless that person is authorised to do so.

(5) The Authority may suspend or cancel a licence or certificate of an operator who contravenes any provision of these Regulations.

126. Replacement of documents.

A holder of a licence or certificate who requires a replacement of the licence or certificate may apply to the Authority in the prescribed form.

127. Aeronautical user charges.

(1) The Authority shall notify of the fees to be charged in connection with—

- (a) the issuance, validation, renewal, extension or variation of any licence, certificate or any other document, including a copy of any of these;
- (b) the undertaking of any examination, test, inspection or investigation;
- (c) the grant of any permission or approval required for the purpose of these Regulations.

(2) Where an application for which any fee is chargeable under subregulation (1) is made, the applicant shall, before the application is processed, pay the required fee.

(3) The Authority shall not refund the fees where an application is withdrawn after payment of fees is made or where the application ceases to have effect or is refused.

128. Conditions for operating aerodrome.

(1) A person shall not operate an aerodrome licensed or certificated under these Regulations unless the facilities and characteristics of the aerodrome are effectively related and match the needs of the aircraft for which the aerodrome is intended.

(2) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve

months or both.

129. Standards for physical characteristics.

A person shall not operate an aerodrome unless the physical characteristics of the aerodrome comply with the standards prescribed by the Authority and any publications as may be published or approved by the Authority.

130. Dangerous light.

(1) A person shall not exhibit a light in the vicinity of an aerodrome which, by its glare, endangers the safety of aircraft arriving or departing from the aerodrome.

(2) Where in the opinion of the Authority, a light appears to be capable of endangering the safety of aircraft as described in subregulation (1), the Authority may direct the owner of the place where the light is exhibited or the person having charge of the light, to extinguish the light and to prevent, the exhibition of the light, for a period, as may be specified by the Authority.

(3) Where a light is or may be visible from any waters within the area of a general lighthouse authority, the power of the Authority under this regulation shall not be exercised except with the consent of that lighthouse authority.

(4) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

131. Lighting of en-route obstacles.

(1) An owner or a person in charge of an en-route obstacle shall ensure that the en-route obstacle is fitted with medium intensity steady red light

- (a) positioned as close as possible to the top of the obstacle; and
- (b) spaced as far as practicable, equally between the top lights and ground level with an interval not exceeding thirty three metres, at the intermediate levels.

(2) Where any light which is required by this regulation to be displayed fails, an owner or a person in charge of an en-route obstacle shall repair or replace the light as soon as is reasonably practicable but in any case not later than twenty four hours after the failure of the light.

(3) Subject to subregulation (2), an owner or a person in charge of an en-route obstacle shall ensure that the lights required to be fitted by this regulation are displayed.

(4) An owner or a person in charge of an en-route obstacle shall ensure that sufficient light is fitted and arranged at each level of an obstacle where lights are required to be fitted, so as to show, when displayed, in all directions.

(5) The Authority may direct that an en-route obstacle is fitted with additional lights which shall be displayed in such positions and at such times as the Authority may specify.

(6) For the purpose of this regulation—

(a) “en-route obstacle” means any building, structure or erection, which is one hundred metres or more, above ground level, except a building, structure or erection, which is in the vicinity of an aerodrome;

(b) “medium intensity steady light” means a light, which complies with the characteristics described for a medium intensity type C light as specified in the Manual of Aerodrome Standards.

(7) An operator who contravenes this regulation commits an offence and is liable, on conviction, to a fine not exceeding twenty four currency points or to imprisonment for a term not exceeding twelve months or both.

132. Land use in vicinity of aerodrome.

All land use practices and activities in the vicinity of an aerodrome shall conform to the guidelines prescribed by the Authority.

133. Aeronautical studies.

Where an aerodrome does not meet the requirements of prescribed standards, the Authority may determine, after carrying out aeronautical studies, the conditions and procedures that are necessary to ensure a level of safety equivalent to that established by the relevant prescribed standard.

134. Deviations from standards.

Any deviation from a prescribed standard or procedure in these Regulations shall be set out in an endorsement on the aerodrome manual.

135. Safety inspections and audits.

The Authority shall—

- (a) carry out such safety inspections and audits as may be necessary for the purpose of verifying the validity of an application for construction and operation of an aerodrome;
- (b) carry out safety inspections and audits of any document and records of an operator, which may be necessary to determine compliance with the appropriate requirements as prescribed in these Regulations.

136. Obligation to insure aerodrome.

(1) A person shall not operate, or cause or permit any other person to operate an aerodrome unless there is a policy of insurance in force in relation to that aerodrome.

(2) A policy of insurance shall be of no effect for the purposes of subregulation (1) unless—

- (a) there has been issued by the insurer to the operator a certificate in relation to the policy of insurance in such form and containing such particulars as the Authority may prescribe, and
- (b) the operator has sent, or caused to be sent, to the Authority a copy of the certificate required under subregulation (1).

(3) Where a policy of insurance ceases to have effect, any licence or certificate issued under these Regulations in respect of the aerodrome to which the policy of insurance relates, shall be deemed to have been revoked.

(4) A licence or certificate shall not be renewed or amended under these Regulations, in relation to the operation of an aerodrome where the policy of insurance expires.

(5) For the purpose of this regulation, “policy of insurance” means a policy which insures an operator against liability in respect of loss and damage caused to any person or property at that aerodrome and which complies with any conditions as may be prescribed by the Authority.

(6) This regulation shall not apply to aerodromes in categories C and D, unless required by the Authority.

137. General penalty.

A person who contravenes any provision of these Regulations for which no penalty is prescribed commits an offence and shall on conviction be liable to a fine not exceeding forty eight currency points or to imprisonment for a term not exceeding twenty four months or both.

138. Savings and transition.

(1) A licence, certificate or any other document issued to an operator prior to the commencement of these Regulations shall continue in force as if it was issued under these Regulations, until it expires or is cancelled by the Authority.

(2) A person who, immediately before the commencement of these Regulations was operating as an operator shall within twelve months after the commencement of these Regulations, comply with these Regulations.

FIRST SCHEDULE

Regulation 2

PART I—AERODROMES OWNED OR OPERATED BY THE
AUTHORITY

1. Entebbe International Airport
2. Arua Airfield
3. Gulu Airfield
4. Jinja Airfield
5. Kasese Airfield
6. Kidepo Airfield
7. Kisoro Airfield
8. Lira Airfield
9. Masindi Airfield
10. Mbarara Airfield;
11. Moroto Airfield
12. Pakuba Airfield
13. Soroti Airfield
14. Tororo Airfield

PART II—AREAS OF AERODROMES

1. Entebbe International Airport.

Commencing at a plain concrete markstone 10 which is on an approximate

bearing of $169^{\circ}02'$ and at an approximate distance of 210.3 metres from a trigonometrical point control tower 70.Z.25; thence on an approximate bearing of $258^{\circ}53'$ and for an approximate distance of 64.6 metres to 11; thence on an approximate bearing of $255^{\circ}21'$ and for an approximate distance of 103.2 metres to 12; thence on an approximate bearing of $262^{\circ}37'$ and for an approximate distance of 150.6 metres to 13; thence on an approximate bearing of $223^{\circ}52'$ and for an approximate distance of 97.5 metres to 14; thence on an approximate bearing of $171^{\circ}25'$ and for an approximate distance of 177.3 metres to 15; thence on an approximate bearing of $172^{\circ}37'$ and for an approximate distance of 512.0 metres to 16; thence on an approximate bearing of $172^{\circ}14'$ and for an approximate distance of 705.4 metres to 17; thence on an approximate bearing of $217^{\circ}41'$ and for an approximate distance of 50.5 metres to 18; thence on an approximate bearing of $242^{\circ}06'$ and for an approximate distance of 51.8 metres to 19; thence on an approximate bearing of $260^{\circ}45'$ and for an approximate distance of 115.9 metres to 20; thence on an approximate bearing of $260^{\circ}24'$ and for an approximate distance of 103.6 metres to 21; thence on an approximate bearing of $274^{\circ}29'$ and for an approximate distance of 61.6 metres to 22; thence on an approximate bearing of $290^{\circ}09'$ and for an approximate distance of 43.2 metres to 23; thence on an approximate bearing of $325^{\circ}22'$ and for an approximate distance of 51.3 metres to 24; thence on an approximate bearing of $352^{\circ}04'$ and for an approximate distance of 653.3 metres to 25; thence in a northeasterly direction on an approximate bearing of $38^{\circ}40'$ and for an approximate distance of 6.0 metres to plain concrete markstone 6; then in the same direction on an approximate bearing of $38^{\circ}39'$ and for an approximate distance of 30.0 metres to point F.C.23; thence in a northeasterly direction on an approximate bearing of $312^{\circ}30'$ and for an approximate distance of 8.0 metres to plain concrete markstone; thence in the same direction on an approximate bearing of $312^{\circ}29'$ and for an approximate distance of 9.0 metres to point F.C.23; thence in the same direction on an approximate bearing of $312^{\circ}29'$ and for an approximate distance of 24.0 metres to point on a line joining points F.C.23 and F.C.21; thence in a northerly direction on an approximate bearing of $352^{\circ}38'$ and for an approximate distance of 109.8 metres to a point on a line joining points F.C.2 and F.C.3; thence in an easterly direction on an approximate bearing of $92^{\circ}55'$ and an approximate distance of 9.0 metres to point F.C.2; thence in an easterly direction on an approximate bearing of $13^{\circ}30'$ and for an approximate distance of 58.0 metres to point F.C.1; thence in a northwesterly direction on an approximate bearing of $291^{\circ}04'$ and for an approximate distance of 34.0

metres to a point on a line joining concrete markstone 4/8852 and point F.C.1; thence in a northerly direction on an approximate bearing of $352^{\circ}35'$ and for an approximate distance of 763.2 metres to plain concrete markstone 26; thence on an approximate bearing of $269^{\circ}59'$ and for an approximate distance of 32.3 metres to 27; thence on an approximate bearing of $359^{\circ}59'$ and for an approximate distance of 87.9 metres to 28; thence on an approximate bearing of $81^{\circ}09'$ and for an approximate distance of 18.6 metres to 29; thence on an approximate bearing of $352^{\circ}08'$ and for an approximate distance of 919.8 metres to 30; thence on an approximate bearing of $352^{\circ}07'$ and for an approximate distance of 610.0 metres to a point on a line joining concrete markstones 2/7222 and 2/7221; thence in a northwesterly direction on an approximate bearing of $298^{\circ}30'$ and for an approximate distance of 27.0 metres to concrete markstone 2/7222; thence in a northeasterly direction on an approximate bearing of $28^{\circ}16'$ and for an approximate distance of 37.1 metres to a point on a line joining concrete markstones 2/7222 and 2/7223; thence in a northerly direction on an approximate bearing of $352^{\circ}08'$ and for an approximate distance of 98.0 metres to plain concrete markstone 31; thence in a northerly direction on an approximate bearing of $353^{\circ}36'$ and for an approximate distance of 71.0 metres to a point on a line joining C.P.4 and a point before a sharp turning point of the runway fence; thence in a westerly direction on an approximate bearing of $302^{\circ}30'$ and for an approximate distance of 94.0 metres to that point before the sharp turning point of the runway fence; thence in the same direction on an approximate bearing of $308^{\circ}56'$ and for an approximate distance of 31.1 metres to the sharp point of the runway fence; thence in a northeasterly direction on an approximate bearing of $33^{\circ}10'$ and for an approximate distance of 150.0 metres to a point on the runway fence; thence in a northerly direction on an approximate bearing of $353^{\circ}34'$ and for an approximate distance of 72.0 metres to plain concrete markstone 33; thence on an approximate bearing of $15^{\circ}37'$ and for an approximate distance of 76.2 metres to 34; thence on an approximate bearing of $23^{\circ}31'$ and for an approximate distance of 211.3 metres to 35; thence on an approximate bearing of $54^{\circ}36'$ and for an approximate distance of 32.9 metres to 36; thence on an approximate bearing of $86^{\circ}00'$ and for an approximate distance of 29.1 metres to 37; thence on an approximate bearing of $102^{\circ}27'$ and for an approximate distance of 26.9 metres to 38; thence on an approximate bearing of $135^{\circ}11'$ and for an approximate distance of 46.7 metres to 39; thence on an approximate bearing of $156^{\circ}03'$ and for an approximate distance of 409.2 metres to 40; thence on an approximate bearing of $161^{\circ}16'$ and for an

approximate distance of 96.3 metres to 41; thence on an approximate bearing of $128^{\circ}37'$ and for an approximate distance of 147.1 metres to 42; thence on an approximate bearing of $139^{\circ}32'$ and for an approximate distance of 143.2 metres to 43; thence on an approximate bearing of $168^{\circ}41'$ and for an approximate distance of 92.4 metres to C.P.X.; thence on an approximate bearing of $120^{\circ}57'$ and for an approximate distance of 88.8 metres to C.P.21; thence on an approximate bearing of $120^{\circ}43'$ and for an approximate distance of 36.4 metres to C. Post 22; thence on an approximate bearing of $122^{\circ}28'$ and for an approximate distance of 702.3 metres to C.P. 23; thence on an approximate bearing of $122^{\circ}32'$ and for an approximate distance of 352.0 metres to 2/7226; thence on an approximate bearing of $122^{\circ}17'$ and for an approximate distance of 98.8 metres to C. Post 24; thence on an approximate bearing of $62^{\circ}05'$ and for an approximate distance of 78.8 metres to C. cut 36; thence on an approximate bearing of $62^{\circ}34'$ and for an approximate distance of 5.6 metres to C. Post 25; thence on an approximate bearing of $343^{\circ}36'$ and for an approximate distance of 72.1 metres to C. Post 13; thence on an approximate bearing of $78^{\circ}36'$ and for an approximate distance of 100.8 metres to C.P. 11; thence on an approximate bearing of $168^{\circ}24'$ and for an approximate distance of 55.6 metres to C.P. 27; thence on an approximate bearing of $74^{\circ}057'$ and for an approximate distance of 103.6 metres to C.P. 28; thence on an approximate bearing of $81^{\circ}58'$ and for an approximate distance of 39.5 metres to C.P. 29; thence on an approximate bearing of $62^{\circ}41'$ and for an approximate distance of 6.4 metres to C.P.54; thence on an approximate bearing of $62^{\circ}40'$ and for an approximate distance of 63.5 metres to C.P.30; thence on an approximate bearing of $122^{\circ}08'$ and for an approximate distance of 75.8 metres to C.P.7; thence on an approximate bearing of $85^{\circ}21'$ and for an approximate distance of 36.4 metres to 7/5027; thence on an approximate bearing of $347^{\circ}33'$ and for an approximate distance of 12.9 metres to 7/5055; thence on an approximate bearing of $32^{\circ}36'$ and for an approximate distance of 6.1 metres to 7/5037; thence on an approximate bearing of $122^{\circ}38'$ and for an approximate distance of 30.5 metres to 7/5073; thence on an approximate bearing of $212^{\circ}39'$ and for an approximate distance of 15.2 metres to 7/5026; thence in a southeasterly direction following the existing fence of the runway on an approximate bearing of $123^{\circ}18'$ and for an approximate distance of 30.0 metres to a turning point; thence in an easterly direction following the existing runway fence on an approximate bearing of $85^{\circ}04'$ and for an approximate distance of 113.5 metres on a turning point; thence in a northerly direction following the existing runway fence on an approximate bearing of $0^{\circ}00'$ and

for an approximate distance of 631.0 metres to a bearing point; thence in a northeasterly direction following the existing runway fence on an approximate bearing of $41^{\circ}10'$ and for an approximate distance of 79.5 metres to a turning point; thence in an easterly direction following the existing runway fence on an approximate bearing of $85^{\circ}04'$ and for an approximate distance of 20.0 metres to a turning point; thence in a southeasterly direction following the existing runway fence on an approximate bearing of $146^{\circ}16'$ and for an approximate distance of 79.5 metres to a turning point; thence in southerly direction following the existing fence on an approximate bearing of $180^{\circ}05'$ and for an approximate distance of 87.8 metres to a point C.P.X. which is the northwest corner of Polts 148 – 156; thence on an approximate bearing of $180^{\circ}07'$ and for an approximate distance of 302.1 metres to C.P.M.; thence on an approximate bearing of $180^{\circ}05'$ and for an approximate distance of 363.5 metres to C.P.L.; thence on an approximate bearing of $88^{\circ}10'$ and for an approximate distance of 107.6 metres to C.P.K; thence on an approximate bearing of $145^{\circ}38'$ and for an approximate distance of 14.8 metres to C.P.J.; thence on an approximate bearing of $152^{\circ}06'$ and for an approximate distance of 16.5 metres to C.P.I.; thence on an approximate bearing of $159^{\circ}06'$ and for an approximate distance of 18.7 metres to C.P.H.; thence on an approximate bearing of $165^{\circ}17'$ and for an approximate distance of 10.5 metres to C.P.G; thence on an approximate bearing of $171^{\circ}13'$ and for an approximate distance of 14.1 metres to C.P.F; thence on an approximate bearing of $175^{\circ}41'$ and for an approximate distance of 14.9 metres to C.P.E.; thence on an approximate bearing of $180^{\circ}50'$ and for an approximate distance of 67.8 metres to C.P.D; thence on an approximate bearing of $268^{\circ}53'$ and for an approximate distance of 135.6 metres to C.P.C; thence on an approximate bearing of $180^{\circ}04'$ and for an approximate distance of 291.1 metres to C.P.B; thence on an approximate bearing of $116^{\circ}41'$ and for an approximate distance of 278.8 metres to C.P.A; thence in a southwesterly direction following the existing runway fence on an approximate bearing of $188^{\circ}50'$ and for an approximate distance of 95.0 metres to a turning point; thence in the same direction following the existing runway fence on an approximate bearing of $184^{\circ}02'$ and for an approximate distance of 169.1 metres to a turning point; $184^{\circ}02'$ and for an approximate distance of 169.1 metres to a turning point; thence in the same direction following the existing runway fence on an approximate bearing of $231^{\circ}58'$ and for an approximate distance of 191.5 meters to a turning point; thence in a westerly direction following the existing runway fence on an approximate bearing of $266^{\circ}43'$ and for an approximate distance of 105.0 metres to point C.P2; thence on an

approximate bearing of 180°27' and for an approximate distance of 25.5 metres to 2; thence on an approximate bearing of 261°44' and for an approximate distance of 41.1 metres to RTS57; thence on an approximate bearing of 261°03' and for an approximate distance of 51.4 metres to 8/2183; thence on an approximate bearing of 273°35' and for an approximate distance of 2190 metres to 1; thence on an approximate bearing of 298°36' and for an approximate distance of 302.5 metres to 2; thence in a northwesterly direction on an approximate bearing of 327°04' and for an approximate distance of 20.0 metres to a point between concrete markstones 2 and 8/2254; thence in a northeasterly direction on an approximate bearing of 21°10' and for an approximate distance of 16.4 metres to concrete markstone 8/2254; thence on an approximate bearing of 292°40' and for an approximate distance of 18.7 metres to 8/2194; thence on an approximate bearing of 326°50' and for an approximate distance of 209.1 metres to 3; thence on an approximate bearing of 246°57' and for an approximate distance of 7.5 metres to 4; thence on an approximate bearing of 242°38' and for an approximate distance of 50.5 metres to 5; thence on an approximate bearing of 232°31' and for an approximate distance of 75.1 metres to 6; thence on an approximate bearing of 197°45' and for an approximate distance of 111.5 metres to 7; thence on an approximate bearing of 224°15' and for an approximate distance of 39.1 metres to 8; thence on an approximate bearing of 236°43' and for an approximate distance of 133.7 metres to 9; thence on an approximate bearing of 246°52' and for an approximate distance of 168.8 metres to 10, which is the point of commencement.

The boundary so described is more particularly delineated and outlined in red on Boundary Plan No. 359 filed in the Survey Records Office of the Department of Lands and Surveys, Entebbe.

2. Tororo Aerodrome.

That area which falls within the boundary established by commencing at concrete markstone number 5/6551 situated at the northeast corner of the Oil Stone plot, and proceeding thence on an approximate bearing of 174°55' for an approximate distance of 150 feet to concrete markstone number 5/8043; thence on an approximate bearing of 174°55' for an approximate distance of 660 feet to an unnumbered concrete markstone; thence on an approximate bearing of 264°54' for an approximate distance of 375 feet to an unnumbered concrete markstone; thence on an approximate bearing of 174°54' for an approximate distance of 1,816 feet to an unnumbered concrete markstone; thence on an approximate bearing of 164°55' for an approximate distance of 600 feet to an

unnumbered concrete markstone; thence on an approximate bearing of 354°55' for an approximate distance of 6,606 feet to an unnumbered concrete markstone; thence on an approximate bearing of 84°54' for an approximate distance of 600 feet to an unnumbered concrete markstone; thence on an approximate bearing of 174°55' for an approximate distance of 3,080 feet to an unnumbered concrete markstone; thence on an approximate bearing of 84°55' for an approximate distance of 375 feet to an unnumbered concrete markstone; thence on an approximate bearing of 174°55' for an approximate distance of 325 feet to concrete markstone number 5/8783; thence on an approximate bearing of 174°55' for an approximate distance of 66 feet to concrete markstone number 5/8784; thence on a bearing of 174°55' for an approximate distance of 509 feet to concrete markstone number 5/6551, the point of commencement.

This boundary is more particularly shown bordered in red on Boundary Plan No. 247 deposited at the Survey Records Office, Department of Lands and Surveys, Entebbe.

3. Gulu Aerodrome.

That area which falls within the boundary established by commencing at an unnumbered concrete markstone situated on a bearing of 168°42' and at an approximate distance of 49 feet from the southeast corner of the Shell Company plot, and proceeding thence on an approximate bearing of 184°30' for an approximate distance of 429 feet to an unnumbered concrete markstone; thence on an approximate bearing of 160°45' for an approximate distance of 706 feet to an unnumbered concrete markstone; thence on an approximate bearing of 160°45' for an approximate distance of 1,370 feet to an unnumbered concrete markstone; thence on an approximate bearing of 160°45' for an approximate distance of 593 feet to an unnumbered concrete markstone; thence on an approximate bearing of 251°36' for an approximate distance of 567 feet to an unnumbered concrete markstone; thence on an approximate bearing of 340°52' for an approximate distance of 1,354 feet to an unnumbered concrete markstone; thence on an approximate bearing of 340°52' for an approximate distance of 1,201 feet to an unnumbered concrete markstone; thence on an approximate bearing of 340°52' for an approximate distance of 1,200 feet to an unnumbered concrete markstone; thence on an approximate bearing of 340°52' for an approximate distance of 778 feet to an unnumbered concrete markstone; thence on an approximate bearing of 69°26' for an approximate distance of 552 feet to an unnumbered concrete markstone; thence on an approximate bearing of 160°44' for an approximate distance of 607 feet to an unnumbered concrete

markstone; thence on an approximate bearing of 160°44' for an approximate distance of 891 feet to an unnumbered concrete markstone; thence on an approximate bearing of 160°44' for an approximate distance of 1,579 feet to an unnumbered concrete markstone; thence on an approximate bearing of 70°44' for an approximate distance of 439 feet to an unnumbered concrete markstone; thence on an approximate bearing of 160°35' for an approximate distance of 759 feet to an unnumbered concrete markstone; thence on a bearing of 250°46' for an approximate distance of 243 feet to an unnumbered concrete markstone the point of commencement.

This boundary is more particularly shown bordered in red on Boundary Plan No. 251 deposited at the Survey Records Office, Department of Lands and Surveys, Entebbe.

4. Arua Aerodrome.

That area which falls within the boundary established by commencing at concrete markstone number 0/529 situated at a bearing of 180°41' and at a distance of 1,987 feet from the southeast corner of the Shell Company plot, and proceeding thence on an approximate bearing of 263°54' for an approximate distance of 500 feet to concrete markstone number 0/530; thence on an approximate bearing of 353°54' for an approximate distance of 6,038 feet to concrete markstone number 0/537; thence on an approximate bearing of 83°54' for an approximate distance of 500 feet to concrete markstone number 0/542; thence on a bearing of 173°54' for an approximate distance of 6,038 feet to concrete markstone number 0/529, the point of commencement.

This boundary is more particularly shown bordered in red on Boundary Plan No. 250 deposited at the Survey Records Office, Department of Lands and Surveys, Entebbe.

5. Soroti Aerodrome.

That area which falls within the boundary established by commencing at concrete markstone number 5/8181 situated at the southeast corner of the Oil Store plot, and proceeding thence on an approximate bearing of 231°15' for an approximate distance of 150 feet to concrete markstone number 5/8219; thence on an approximate bearing of 231°15' for an approximate distance of 650 feet to concrete markstone number 5/8353; thence on an approximate bearing of 231°15' for an approximate distance of 300 feet to concrete markstone number 5/8355' thence on an approximate bearing of 321°15' for an approximate distance of 380 feet to concrete markstone number 5/8374; thence on an

approximate bearing of 231°15' for an approximate distance of 1,239 feet to concrete markstone number 5/8366; thence on an approximate bearing of 321°15' for an approximate distance of 650 feet to concrete markstone number 5/8183; thence on an approximate bearing of 51°15' for an approximate distance of 2,006 feet to concrete markstone number 5/8352; thence on an approximate bearing of 51°15' for an approximate distance of 1,421 feet to concrete markstone number 5/8361; thence on an approximate bearing of 51°15' for an approximate distance of 1,293 feet to concrete markstone number 5/8368; thence on an approximate bearing of 51°15' for an approximate distance of 2,278 feet to concrete markstone number 5/8356; thence on an approximate bearing of 141°15' for an approximate distance of 650 feet to concrete markstone number 5/7384; thence on an approximate bearing of 231°15' for an approximate distance of 879 feet to concrete markstone number 5/8856; thence on an approximate bearing of 231°15' for an approximate distance of 446 feet to concrete markstone number 5/8358; thence on an approximate bearing of 231°15' for an approximate distance of 1,106 feet to concrete markstone number 5/8359; thence on an approximate bearing of 231°15' for an approximate distance of 1,468 feet to concrete markstone number 5/8371; thence on an approximate bearing of 141°16' for an approximate distance of 380 feet to concrete markstone number 5/8372; thence on a bearing of 231°15' for an approximate distance of 750 feet to concrete markstone number 5/8484 the point of commencement.

This boundary is more particularly shown bordered in red on Boundary Plan No. 248 deposited at the Survey Records Office, Department of Lands and Surveys, Entebbe

6. Kasese Aerodrome.

That area which falls within the boundary established by commencing at concrete markstone number 9/4132 situated on the southern side of Kabarole Road Reserve at a distance of 560 feet approximate to the southwest from River Rukoki Bridge, and proceeding thence on an approximate bearing of 197°30' for an approximate distance of 1,241 feet to concrete markstone number 9/3206; thence on an approximate bearing of 191°00' for an approximate distance of 729 feet to concrete markstone number 9/3197; thence on an approximate bearing of 191°00' for an approximate distance of 441 feet to concrete markstone number 9/3294; thence on an approximate bearing of 190°59' for an approximate distance of 709 feet to concrete markstone number 9/3295; thence on an approximate bearing of 191°00' for an approximate distance of 613 feet to concrete markstone number 9/4037; thence on an

approximate bearing of 191°00' for an approximate distance of 598 feet to concrete markstone number 9/3308; thence on an approximate bearing of 101°01' for an approximate distance of 261 feet to concrete markstone number 9/3198; thence on an approximate bearing of 191°42' for an approximate distance of 159 feet to concrete markstone number 9/3311; thence on an approximate bearing of 272°10' for an approximate distance of 262 feet to concrete markstone number 9/3195; thence on an approximate bearing of 190°57' for an approximate distance of 616 feet to concrete markstone number 9/3343; thence on an approximate bearing of 190°57' for an approximate distance of 990 feet to concrete markstone number 9/3194; thence on an approximate bearing of 191°07' for an approximate distance of 654 feet to concrete markstone number 9/3209; thence on an approximate bearing of 282°00' for an approximate distance of 500 feet to concrete markstone number 9/3209; thence on an approximate bearing of 11°00' for an approximate distance of 905 feet to concrete markstone number 9/2196; thence on an approximate bearing of 10°50' for an approximate distance of 896 feet to concrete markstone number 9/4040; thence on an approximate bearing of 10°50' for an approximate distance of 652 feet to concrete markstone number 9/3318; thence on an approximate bearing of 11°00' for an approximate distance of 599 feet to concrete markstone number 9/4041; thence on an approximate bearing of 11°00' for an approximate distance of 612 feet to concrete markstone number 9/3319; thence on an approximate bearing of 11°00' for an approximate distance of 709 feet to concrete markstone number 9/3309; thence on an approximate bearing of 285°24' for an approximate distance of 661 feet to concrete markstone number 9/3199; thence on an approximate bearing of 316°31' for an approximate distance of 597 feet to concrete markstone number 9/4425; thence on an approximate bearing of 52°46' for an approximate distance of 652 feet to concrete markstone number 9/4138; thence on an approximate bearing of 52°05' for an approximate distance of 1,091 feet to concrete markstone number 9/4416; thence on a bearing of 52°06' for an approximate distance of 1,045 feet to concrete markstone number 9/4432, the point of commencement.

This boundary is more particularly shown bordered in red on a Boundary Plan No. 249 deposited at the Survey Records Office, Department of Lands and Surveys, Entebbe.

7. Jinja Aerodrome.

That area which falls within the boundary established by commencing at concrete markstone number 5/2828 situated at the south corner of the Petrol Station plot, and

proceeding thence on an approximate bearing of 306°23' for an approximate distance of 100 feet to concrete markstone number 5/2900; thence on an approximate bearing of 306°23' for an approximate distance of 104 feet to concrete markstone number 5/1276; thence on an approximate bearing of 36°23' for an approximate distance of 358 feet to concrete markstone number 5/2494; thence on an approximate bearing of 306°35' for an approximate distance of 787 feet to concrete markstone number 5/2808; thence on an approximate bearing of 306°35' for an approximate distance of 1,081 feet to concrete markstone number 5/1951; thence on an approximate bearing of 306°35' for an approximate distance of 535 feet to concrete markstone number 5/2169; thence on an approximate bearing of 306°35' for an approximate distance of 393 feet to concrete markstone number 5/2378; thence on an approximate bearing of 30°21' for an approximate distance of 38 feet to concrete markstone number 5/2196; thence on an approximate bearing of 30°21' for an approximate distance of 659 feet to concrete markstone number 5/2266; thence on an approximate bearing of 126°48' for an approximate distance of 828 feet to concrete markstone number 5/2406; thence on an approximate bearing of 126°29' for an approximate distance of 3,283 feet to an unnumbered concrete markstone; thence on an approximate bearing of 126°18' for an approximate distance of 695 feet to concrete markstone number 5/2016; thence on an approximate bearing of 126°16' for an approximate distance of 597 feet to concrete markstone number 5/1234; thence on an approximate bearing of 216°14' for an approximate distance of 609 feet to concrete markstone number 5/2004; thence on an approximate bearing of 306°24' for an approximate distance of 626 feet to concrete markstone number 5/3892; thence on an approximate bearing of 306°24' for an approximate distance of 108 feet to concrete markstone number 5/1998; thence on an approximate bearing of 306°24' for an approximate distance of 177 feet to concrete markstone number 5/2411; thence on an approximate bearing of 306°24' for an approximate distance of 231 feet to concrete markstone number 5/1593; thence on an approximate bearing of 216°24' for an approximate distance of 234 feet to concrete markstone number 5/4533; thence on an approximate bearing of 292°51' for an approximate distance of 510 feet to concrete markstone number 5/4535; thence on an approximate bearing of 306°24' for an approximate distance of 264 feet to concrete markstone number 5/2052; thence on a bearing of 306°23' for an approximate distance of 439 feet to concrete markstone number 5/2828 the point of commencement.

This boundary is more particularly shown bordered in red on Boundary Plan No. 252 deposited at the Survey Records Office, Department of Lands and Surveys, Entebbe.

SECOND SCHEDULE

CURRENCY POINT

A currency point is equivalent to twenty thousand shillings.

THIRD SCHEDULE

PART A

Systematic Management of Safety at Aerodrome

1. Safety Management

Aerodromes in Category A shall have in place a system for managing safety, to which it is committed, is readily identifiable by the personnel of the Aerodrome and the personnel of the Authority and is clearly documented in the Aerodrome Manual.

2. Interpretation

In this Schedule, unless the context otherwise requires—

“risk” is the combination of the probability, or frequency of occurrence of a defined hazard and the magnitude of the consequences of the occurrence.

3. Safety Objective

An aerodrome and the facilities, equipment and systems of the aerodrome shall be designed and operated such that for any hazard, the combination of the probability of occurrence and the seriousness of the consequences of the hazard occurring must not result in a level of risk that is unacceptable.

4. Safety Management Policy Statements

Safety Management Systems established at aerodromes shall include the following—

- (a) a statement that the highest priority shall be attached to safety in relations to all business activities;
- (b) a business objective for safety that shall minimise the aerodrome’s contribution to aviation accidents risk to as low as reasonably practicable;
- (c) a commitment by the aerodrome operator to adopt an explicit and proactive approach to safety management;
- (d) statements of safety-related responsibilities at all levels of the organization;
- (e) a commitment to comply with all appropriate safety standards;
- (f) a commitment that the safety assurance processes used by external

suppliers comply with safety standards and requirements.

5. Safety Management Principles

- (1) (a) Whenever practicable, quantitative safety levels shall be derived, maintained and improved for all aviation products and services delivered by the aerodrome; and when quantitative safety levels cannot be derived, a qualitative reasoning shall be performed in order to meet the safety objective.
 - (b) An operator shall assess all existing operations, proposed changes, additions or replacements for their safety significance.
 - (c) An operator shall identify and record the safety requirements for a service or product, the results of the safety assessment process and the evidence that the safety requirements have been met; and the records shall be maintained throughout the life of the service or product.
 - (d) An operator shall ensure that personnel whose functions impact on safety at the aerodrome are and remain adequately trained and qualified for the job they are required to do and for which they have accountability.
- (2) (a) An operator shall ensure that there is accountability, at a suitable senior level for the management, development and monitoring of the safety management system.
 - (b) An operator shall routinely carry out internal safety audits to provide assurance of the safety activities and to confirm compliance with the safety requirements and the safety management system.
 - (c) An operator shall have in place suitable monitoring arrangements so that undesirable trends in service or product performance can be recognized and be subject to remedial action; and in order to achieve this, the operator shall in accordance with the provisions of the Part B of this Schedule—
 - (i) establish a reporting system for accident and incident reporting that ensures the Authority is informed of the

aviation safety aspects in connection with the aerodrome;

(ii) investigate safety significant occurrences, identify any failures of its management of safety and take corrective action if required;

(d) The operator shall establish and maintain procedures, which enable tracing of documents and data related to the safety management system, and the procedures shall ensure that all safety related documents and data are available, and that invalid documents and data shall be destroyed and secured against unintended use.

6. Safety Management Strategy

(1) An operator shall establish processes to identify safety shortcomings, so that remedial action can be taken to ensure safety levels are maintained.

(2) The basic principles to be applied in the safety management strategy shall include—

(a) safety achievement; specifying the means by which the safety performance of the organization meets its safety objectives and derived requirements;

(b) safety assurance; specifying the means for providing assurance that risks are being managed properly and effectively;

(c) safety promotion; specifying the means by which safety issues are communicated within the aerodrome to eliminate unnecessary risks and avoid repeat errors or risks.

7. Operational safety assurances documentation

An operator shall produce and maintain safety assurance documentation, and this documentation shall cover—

(a) all safety related roles and functions;

(b) a safety based risk assessment of the roles and functions where practicable;

(c) a process of risk management for safety related tasks and functions to ensure that identified risks remain tolerable;

(d) safety performance measurements of the current operations as part of the ongoing risk management; and

(e) corrective procedures and measures that modify the original tasks or functions to address inadequate performance.

8. Safety assurance documentation on systems requiring approval

(1) An operator shall, when intending to introduce new systems into operation, or introduce changes to, or replace existing systems, submit an application for approval by the Authority.

(2) The aerodrome operator shall also submit an application for approval if the intended changes affect the approvals in the aerodrome licence.

(3) An aerodrome licensee shall, if satisfied that their own safety requirements as well as those issued by the Authority have met the compliance criteria, notify the Authority in writing indicating compliance with the specified safety requirements for any operational system.

9. Safety assessment methodology

The safety assessment of the aerodrome shall involve—

(a) systematic identification of possible hazards to aircraft;

(b) evaluation of the seriousness of the consequences of the hazard occurring;

(c) considering the chances of a hazard happening;

(d) determining whether the consequent risk is tolerable and within the operators acceptable safety performance criteria; and

(e) taking action to reduce the severity of the hazard or the probability of it arising in order to reduce the risk to a tolerable level.

10. Safety auditing of aerodromes

An operator shall carry out internal safety auditing of the aerodrome in order to determine—

(a) the level of compliance with requirements;

(b) the areas and degree of risk and their effective management; and

(c) the competence and performance of those responsible for safety.

PART B

Aircraft accident and incident reporting and investigation at aerodromes

1. Aerodrome occurrence reporting.

(1) This schedule prescribes the requirements for reporting the occurrence or detection of defects, failures or malfunctions at an aerodrome, its components or equipment, which could jeopardize the safe operation of the aerodrome or cause it to become a danger to persons or property.

(2) The objectives of the aerodrome occurrence reports are as follows—

- (a) to ensure that knowledge of these occurrences is disseminated so that other persons and organizations may learn from them; and
- (b) to enable an assessment to be made by those concerned (whether internal or external to the aerodrome operator) of the safety implications of each occurrence, both in itself and in relation to previous similar occurrences, so that they may take or initiate any necessary action.

2. Reportable occurrences and reporting procedures.

(1) An operator shall notify the Authority of any accident, serious incident, fatal or serious injury occurring at the aerodrome as soon as practicable after the occurrence and provide a detailed occurrence report thereafter.

(2) For the purpose of this Schedule—

(a) “accident” means an occurrence associated with the operation of an aircraft, which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which;

(i) a person is fatally or seriously injured as a result of—

(aa) being in the aircraft, or

(bb) direct contact with any part of the aircraft, including parts which have become detached from the aircraft, or

(cc) direct exposure to jet blast, except when the injury are from natural causes, self-inflicted, or inflicted by other persons, or when the injuries are to stowaways hiding outside the areas normally available to the passengers and crew or;

(ii) the aircraft sustains damage or structural failure which—

(aa) adversely affects the structural strength, performance or flight characteristics of the aircraft; and

(bb) would normally require major repair or replacement of the affected component except for engine failure or damage, when the damage is limited to the engine, its cowlings or accessories; or for damage limited to propellers, wing tips, antennas, tires, brakes, fairings, small dents or puncture holes in the aircraft skin; or

(iii) the aircraft is missing or is completely inaccessible.

(b) “serious incident” includes—

(i) a near collision requiring avoidance manoeuvre to avoid a collision or an unsafe situation or where an avoidance action would have been appropriate;

(ii) a controlled flight into terrain only marginally avoided;

(iii) an aborted take-off on a closed or engaged runway;

(iv) a take-off from a closed or engaged runway with marginal separation from an obstacle;

(v) a landing or attempted landing on a closed or engaged runway;

(vi) a take-off or landing incident such as undershooting; or overrunning or running off the side of runways; or

(v) a major failure of any navigation aid when a runway is in use;

(c) “serious injury” means any injury that is sustained by a person in an accident and that—

(i) requires hospitalisation for more than forty eight hours, commencing within seven days from the date the injury was received;

(ii) results in a fracture of any bone, except simple fractures of fingers, toes or nose;

(iii) involves lacerations which cause severe haemorrhage, nerve,

muscle, or tendon damage;

(iv) involves any injury to any internal organ;

(v) involves second or third degree burns, or any burns affecting more than 5% of the body surface; or

(vi) involves verified exposure to infectious substances or injurious radiation.

(3) The operator shall notify the Aircraft Accident and Incident Investigation Branch whenever an accident or serious incident occurs on or adjacent to his aerodrome in accordance with the provisions of the Civil Aviation (Aircraft Accident and Incident Investigation) Regulations.

(4) Information to be provided in the reporting and notification of an accident, serious incident or serious injury shall as far as possible include the following—

(a) the date and local time of occurrence;

(b) the exact location of the occurrence with reference to some easily defined geographical point;

(c) detailed particulars of the parties involved, including the owner, operator, manufacturer, nationality, registration marks, serial numbers, assigned identities of aircraft and equipment;

(d) a detailed description of the sequence of events leading up to the incident;

(e) the physical characteristics, environment or circumstances of the area in which the incident occurred and an indication of the access difficulties or special requirements to reach the site;

(f) the identification of the person sending the notice and where the incident occurred;

(g) in the case of an aircraft accident, the number of crew members, passengers or other persons respectively killed or seriously injured as a result of the accident; and

(h) a description of the follow-up action being taken after the incident has

occurred.

3. Aerodrome occurrence records.

(1) An operator shall establish and maintain aerodrome occurrence reports for any accident, serious incident, serious injury or any occurrence or event that has a bearing on the safety of aerodrome operations.

(2) An operator shall use aerodrome occurrence reports to monitor and improve the level of operational safety, including reviews of safety standards required.

(3) The Authority may require the operator to produce and provide information contained in the aerodrome occurrence report relating to any safety occurrence or event.

4. Aircraft accident and incident investigation.

(1) In the event of an accident or serious incident, an operator shall carry out its own investigations.

(2) The investigations carried out by the aerodrome operator shall be additional to that carried out by the Aircraft Accident and Incident Investigation Branch to enable the operator to assess safety of aircraft operations at his aerodrome.

(3) The investigator, or team of investigators, shall be technically competent and shall either possess or have access to the background information, so that the facts and events are interpreted accurately. The investigations shall be a search to establish how the mishap happened, why it occurred, including organizational contributing factors, and to recommend action to prevent a recurrence, and shall not be intended to apportion blame.

(4) The lesson learnt derived from an aerodrome incident or accident investigation shall be disseminated to personnel to provide feedback for safety improvement.

(5) The Authority may require the operator to produce and provide information contained in the aerodrome accident or incident investigation report relating to any such event.

(6) An operator shall inspect his aerodrome, as circumstances require, to ensure safety as soon as practicable after any aircraft accident or incident.

FOURTH SCHEDULE

PARTICULARS TO BE INCLUDED IN AN AERODROME MANUAL
FOR AERODROMES IN CATEGORIES A AND B

PART I: GENERAL

General information, including the following—

- (a) purpose and scope of the aerodrome manual;
- (b) the legal requirement for an certificate and an aerodrome manual as prescribed in the national regulations;
- (c) conditions for use of the aerodrome - a statement to indicate that the aerodrome shall at all times, when it is available for the take-off and landing of aircraft, be so available to all persons on equal terms and conditions;
- (d) the available aeronautical information system and procedures for its promulgation;
- (e) the system for recording aircraft movements; and
- (f) obligations of the operator.

PART 2: PARTICULARS OF THE AERODROME SITE

General information, including the following—

- (a) a plan of the aerodrome showing the main aerodrome facilities for the operation of the aerodrome including, particularly, the location of each wind direction indicator;
- (b) a plan of the aerodrome showing the aerodrome boundaries;
- (c) a plan showing the distance of the aerodrome from the nearest city, town or other populous area, and the location of any aerodrome facilities and equipment outside the boundaries of the aerodrome; and
- (d) particulars of the land title of the aerodrome site. If the boundaries of

the aerodrome are not defined in the land title documents particulars of the land title to, or interest in, the property on which the aerodrome is located and a plan showing the boundaries and position of the aerodrome.

PART 3: PARTICULARS OF THE AERODROME REQUIRED TO BE REPORTED TO THE AERONAUTICAL INFORMATION SERVICE

1. **General Information.**

- (a) the name of the aerodrome;
- (b) the location of the aerodrome;
- (c) the geographical coordinates of the aerodrome reference point determined in terms of the World Geodetic System - 1984 reference datum;
- (d) the aerodrome elevation and geoid undulation;
- (e) the elevation of each threshold and geoid undulation, the elevation of each runway end and any significant high and low points along the runway, and the highest elevation of the touchdown zone of a precision approach runway;
- (f) the aerodrome reference temperature;
- (g) details of the aerodrome beacon; and
- (h) the name of the operator and the address, telephone and facsimile numbers at which the operator may be contacted at all times.

2. **Aerodrome dimensions and related information.**

General information, including the following—

- (a) runway - true bearing, designation number, length, width, displaced threshold location, slope, surface type, type of runway and, for a precision approach runway, the existence of an obstacle free zone;
- (b) length, width and surface type of strip, runway end safety areas, stopways;
- (c) length, width and surface type of taxiways;

- (d) apron surface type and aircraft stands;
- (e) clearway length and ground profile;
- (f) visual aids for approach procedures, viz. Approach lighting type and visual approach slope indicator system (PAPI/APAPI and T-VASIS/AT-VASIS); marking and lighting of runways, taxiways, and aprons; other visual guidance and control aids on taxiways (including runway holding positions, intermediate holding positions and stop bars) and aprons, location and type of visual docking guidance system; availability of standby power for lighting;
- (g) the location and radio frequency of VOR aerodrome checkpoints;
- (h) the location and designation of standard taxi routes;
- (i) the geographical coordinates of each threshold;
- (j) the geographical coordinates of appropriate taxiway centre line points;
- (k) the geographical coordinates of each aircraft stand;
- (l) the geographical coordinates and the top elevation of significant obstacles in the approach and take-off area, in the circling area and in the vicinity of the aerodrome. (This information may best be shown in the form of charts such as those required for the preparation of aeronautical information publications, as specified in Annexes 4 and 15 to the Convention);
- (m) pavement surface type and bearing strength using the Aircraft Classification Number - Pavement Classification Number (PCN) method;
- (n) one or more pre-flight altimeter check locations established on an apron and their elevation;
- (o) declared distances: take-off run available, take-off distances available, accelerate-stop distance available, landing distance available;
- (p) disabled aircraft removal plan: the telephone/telex/ facsimile number and e-mail address of the aerodrome coordinator for the removal of a disabled aircraft on or adjacent to the movement area, information on the capability to remove a disabled aircraft, expressed in terms of the largest type of aircraft which the aerodrome is equipped to remove; and

- (q) rescue and fire-fighting; the level of protection provided, expressed in terms of the category of the rescue and fire-fighting services, which should be in accordance with the longest aircraft normally using the aerodrome and the type and amounts of extinguishing agents normally available at the aerodrome.

Note.- the accuracy of the information in Part 3 is critical to aircraft safety. Information requiring engineering survey and assessment should be gathered or verified by qualified technical persons.

PART 4: PARTICULARS OF THE AERODROME OPERATING PROCEDURES AND SAFETY MEASURES

1. **Aerodrome reporting**

Particulars of the procedures for reporting any changes to the aerodrome information set out in the Aeronautical Information Publication (AIP) and Aeronautical Information Circular (AIC) and procedures for requesting the issue of Notices to Airmen (NOTAMs), including the following—

- (a) arrangements for reporting any changes to the Authority and recording the reporting of changes during and outside the normal hours of aerodrome operations;
- (b) the names and roles of persons responsible for notifying the changes, and their telephone numbers during and outside the normal hours of aerodrome operations; and
- (c) the address and telephone and facsimile numbers, as provided by the Authority, of the place where changes are to be reported to the Authority.

2. **Access to the aerodrome movement area.**

Particulars of the procedures that have been developed and are to be followed in coordination with the agency responsible for preventing unlawful interference in civil aviation at the aerodrome and for preventing unauthorized entry of persons, vehicles, equipment, animals or other things into the movement area, including the following—

- (a) the role of the operator, the aircraft operator, aerodrome fixed-base operator, the aerodrome security entity, the Authority and other government departments, as applicable; and

- (b) the personnel responsible for controlling access to the aerodrome, and the telephone numbers for contacting them during and after working hours.

3. Aerodrome emergency plan.

Particulars of the aerodrome emergency plan, including the following—

- (a) plans for dealing with emergencies occurring at the aerodrome or in its vicinity, including the malfunction of aircraft in flight; structural fires; sabotage, including bomb threats (aircraft or structure); unlawful seizure of aircraft; and incidents on the airport covering “during the emergency” and “after the emergency” considerations;
- (b) details of test and aerodrome facilities and equipment to be used in emergencies, including the frequency of those tests;
- (c) details of exercises to test emergency plans, including the frequency of those exercises;
- (d) a list of organizations, agencies and persons of authority, both on- and/off-airport, for site roles; their telephone and facsimile numbers, e-mail addresses and the radio frequencies of their offices;
- (e) the establishment of an aerodrome emergency committee to organize training and other preparations for dealing with emergencies; and
- (f) the appointment of an on-scene commander for the overall emergency operation.

4. Rescue and fire-fighting.

Particulars of the facilities, equipment, personnel and procedures for meeting the rescue and fire-fighting requirements, including the names and roles of the persons responsible for dealing with the rescue and fire-fighting services at the aerodrome.

5. Inspection of the aerodrome movement area and obstacle limitation surface by the operator.

Particulars of the procedures for the inspection of the aerodrome movement area and obstacle limitation surfaces, including the following—

- (a) arrangements for carrying out inspections, including runway friction and water-depth measurements on runways and taxiways, during and outside the normal hours of aerodrome operations;
- (b) arrangements and means of communicating with air traffic control during an inspection;
- (c) arrangements for keeping an inspection logbook, and the location of the logbook;
- (d) details of inspection intervals and times;
- (e) inspection checklist;
- (f) arrangements for reporting the results of inspections and for taking prompt follow-up actions to ensure correction of unsafe conditions; and
- (g) the names and roles of persons responsible for carrying out inspections, and their telephone numbers during and after working hours.

6. Visual aids and aerodrome electrical systems.

Particulars of the procedures for the inspection and maintenance of aeronautical lights (including obstacle lighting), signs, markers and aerodrome electrical systems, including the following—

- (a) arrangements for carrying out inspections during and outside the normal hours of aerodrome operation, and the checklist for such inspections;
- (b) arrangements for recording the result of inspections and for taking follow-up action to correct deficiencies;
- (c) arrangements for carrying out routine maintenance and emergency maintenance;
- (d) arrangements for secondary power supplies and, if applicable, the particulars of any other method of dealing with partial or total system failure; and
- (e) personnel responsible for the inspection and maintenance of the lighting, and the telephone numbers for contacting those persons during and after working hours.

7. Maintenance of the movement area.

Particulars of the facilities and procedures for the maintenance of the movement area, including arrangements for—

- (a) maintaining the paved areas;
- (b) maintaining the unpaved runways and taxiways;
- (c) maintaining the runway and taxiway strips; and
- (d) the maintenance of aerodrome drainage.

8. Aerodrome works - safety

Particulars of the procedures for planning and carrying out construction and maintenance work safely (including work that may have to be carried out at short notice) on or in the vicinity of the movement area which may extend above an obstacle limitation surface, including the following—

- (a) arrangements for communicating with air traffic control during the progress of such work;
- (b) the names, telephone numbers and roles of the persons and organizations responsible for planning and carrying out the work, and arrangements for contacting those persons and organizations at all times;
- (c) the names and telephone numbers, during and after working hours, of the aerodrome fixed-base operators, ground handling agents and aircraft operators who are to be notified of the work;
- (d) a distribution list for work plans, if required.

9. Apron management

Particulars of the apron management procedures, including the following—

- (a) arrangements between air traffic control and the apron management unit;
- (b) arrangements for allocating aircraft parking positions;
- (c) arrangements for initiating engine start and ensuring clearance of aircraft push-back;

- (d) marshalling service; and
- (e) leader (van) service.

10. Apron safety management.

Procedures to ensure apron safety, including—

- (a) protection from jet blasts;
- (b) enforcement of safety precautions during aircraft refuelling operations;
- (c) apron sweeping;
- (d) apron cleaning;
- (e) arrangements for reporting incidents and accidents on an apron; and
- (f) arrangements for auditing the safety compliance of all personnel working on the apron.

11. Airside vehicle control.

Particulars of the procedure for the control of surface vehicles operating on or in the vicinity of the movement area, including the following—

- (a) details of the applicable traffic rules (including speed limits and the means of enforcing the rules);
- (b) the method of issuing driving permits for operating vehicles in the movement area.

12. Birds and wildlife hazard management

Particulars of the procedures to deal with the danger posed to aircraft operations by the presence of birds or mammals in the aerodrome flight pattern or movement area, including the following—

- (a) arrangements for assessing birds and wildlife hazards;
- (b) arrangements for implementing birds and wildlife control programmes; and
- (c) the names and roles of the persons responsible for dealing with birds and wildlife hazards, and their telephone numbers during and after working hours.

13. Obstacle control.

Particulars setting out the procedures for—

- (a) monitoring the obstacle limitation surfaces and type A chart for obstacles in the take-off surface;
- (b) controlling obstacles within the authority of the operator;
- (c) monitoring the height of buildings or structures within the boundaries of the obstacle limitation surfaces;
- (d) controlling new developments in the vicinity of aerodromes; and
- (e) notifying the Authority of the nature and location of obstacles and subsequent addition or removal of obstacles for action as necessary, including amendment of the Aeronautical Information Services publications.

14. Removal of disabled aircraft.

Particulars of the procedures for removing a disabled aircraft on or adjacent to the movement area, including the following—

- (a) the roles of the operator and the holder of the aircraft operator certificate;
- (b) arrangements for notifying the aircraft operator;
- (c) arrangements for liaising with the air traffic control unit;
- (d) arrangements for obtaining equipment and personnel to remove the disabled aircraft; and
- (e) role and telephone numbers of personnel responsible for arranging for the action as necessary, including amendment of the AIS publications.

15. Handling of hazardous materials.

(1) Particulars of the procedures for the safe handling and storage of hazardous materials on the aerodrome, including the following—

- (a) arrangements for special areas of the aerodrome to be set up for the storage of inflammable liquids (including aviation fuels) and any other hazardous materials; and

(b) the method to be followed for the delivery storage, dispensing and handling of hazardous materials.

(2) For the purposes of this paragraph “hazardous materials” include inflammable liquids and solids, corrosive liquids, compressed gases and magnetized or radioactive materials.

16. Low visibility operations.

Particulars of procedures to be introduced for low-visibility operations, including the measurement and reporting of runway visual range as and when required, and the personnel, their telephone numbers, responsible for measuring the Runway Visual Range.

17. Protection of sites for radar and navigational aids.

Particulars of the procedures for the protection of sites for radar and radio navigational aids located on the aerodrome to ensure that their performance will not be degraded, including the following—

(a) arrangements for the control of activities in the vicinity of radar and navigational aids installations;

(b) arrangements for ground maintenance in the vicinity of these installations; and

(c) arrangements for the supply and installation of signs warning of hazardous microwave radiation.

Note 1. In writing the procedures for each category, clear and precise information should be included on—

- (i) when, or in what circumstances, an operating procedure is to be activated;
- (ii) how an operating procedure is to be activated;
- (iii) actions to be taken;
- (iv) the equipment necessary for carrying out the actions, and access to such equipment.

Note 2. if any of the procedures specified above are not relevant or applicable, reasons should be given.

PART 5: AERODROME ADMINISTRATION AND SAFETY MANAGEMENT SYSTEM

1. **Aerodrome administration**

Particulars of the aerodrome administration, including the following—

- (a) an aerodrome organizational chart showing the names and positions of key personnel, including their responsibilities;
- (b) the name, position and telephone number of the person who has overall responsibility for aerodrome safety; and
- (c) airport committees.

2. **Safety Management System.**

Particulars of the safety management system established for ensuring compliance with all safety requirements and achieving continuous improvement in safety performance, the essential features being—

- (a) the safety policy, in so far as applicable, on the safety management process and its relation to the operational and maintenance process;
- (b) the structure or organization of the Safety Management System, including staffing and the assignment of individual and group responsibilities for safety issues;
- (c) Safety Management System strategy and planning, such as setting safety performance target, allocating priorities for implementing safety initiative and providing a framework for controlling the risks to as low a level as is reasonably practicable keeping always in view the requirements of the prescribed standards and recommended practice, and regulations;
- (d) Safety Management System implementation, including facilities, methods and procedures for the effective communication of safety messages and the enforcement of safety requirements;
- (e) a system for the implementation of, and action on, critical safety areas which require a higher level of safety management integrity (safety measures programme);

- (f) measures for safety promotion and accident prevention and a system for risk control involving analysis and handling of accidents, incidents, complaints, defects, faults, discrepancies and failures, and continuing safety monitoring.
- (g) the internal safety audit and review system detailing the systems and programmes for quality control of safety;
- (h) the system for documenting all safety-related airport facilities as well as airport operational and maintenance records, including information on the design and construction of aircraft payments and aerodrome lighting. The system should enable easy retrieval of records including charts;
- (i) personnel training and competency, including the review and evaluation of the adequacy of training provided to personnel on safety-related duties and of the certification system for testing their competency; and
- (j) the incorporation and enforcement of safety-related clauses in the contract for construction work at the aerodrome.

FIFTH SCHEDULE

Regulation 57

PARTICULARS TO BE INCLUDED IN AN AERODROME MANUAL FOR AERODROMES IN CATEGORIES C, D AND E.

PART I: GENERAL

General information, including the following—

- (a) purpose and scope of the aerodrome manual;
- (b) the legal requirement for an aerodrome licence and an aerodrome Handbook as prescribed in the national regulations;
- (c) conditions for use of the aerodrome - a statement to indicate that the aerodrome shall at all times, when it is available for the take-off and landing of aircraft, be so available to all persons on equal terms and conditions;
- (d) the available aeronautical information system and procedures for its promulgation;
- (e) the system for recording aircraft movements; and
- (f) obligations of the aerodrome operator.

PART 2: PARTICULARS OF THE AERODROME SITE

General information, including the following—

- (a) a plan of the aerodrome showing the main aerodrome facilities for the operation of the aerodrome including, particularly, the location of each wind direction indicator;
- (b) a plan of the aerodrome showing the aerodrome boundaries;
- (c) a plan showing the distance of the aerodrome from the nearest city, town or other populous area, and the location of any aerodrome facilities and equipment outside the boundaries of the aerodrome; and

PART 3: PARTICULARS OF THE AERODROME REQUIRED TO BE REPORTED TO THE AERONAUTICAL INFORMATION SERVICE (AIS)

1. General Information.

- (a) the name of the aerodrome;
- (b) the location of the aerodrome;
- (c) the geographical coordinates of the aerodrome reference point determined in terms of the World Geodetic System - 1984 (WGS-84) reference datum;
- (d) the aerodrome elevation
- (e) points along the runway, and the highest elevation of the touchdown zone of a precision approach runway;
- (f) the aerodrome reference temperature;
- (h) the name of the aerodrome operator and the address, telephone and facsimile numbers at which the aerodrome operator may be contacted at all times.

2. Aerodrome dimensions and related information.

General information, including the following—

- (a) runway - true bearing, designation number, length, width, displaced threshold location, slope, surface type, type of runway and, for a precision approach runway, the existence of an obstacle free zone;
- (b) Length, width and surface type of strip;
- (c) apron surface type and aircraft stands;
- (n) one or more pre-flight altimeter check locations established on an apron and their elevation;
- (o) rescue and fire-fighting plan;

Note.- the accuracy of the information in Part 3 is critical to aircraft safety. Information requiring engineering survey and assessment should be gathered or verified by qualified technical persons.

PART 4: PARTICULARS OF THE AERODROME OPERATING PROCEDURES AND SAFETY MEASURES

1. **Aerodrome reporting.**

Particulars of the procedures for reporting any changes to the aerodrome information set out in the AIP and AIC and procedures for requesting the issue of Notices to Airmen (NOTAMs), including the following—

- (a) arrangements for reporting any changes to the Authority and recording the reporting of changes during and outside the normal hours of aerodrome operations;
- (b) the names and roles of persons responsible for notifying the changes, and their telephone numbers during and outside the normal hours of aerodrome operations; and
- (c) the address and telephone and facsimile numbers, as provided by the Authority, of the place where changes are to be reported to the Authority.

2. **Access to the aerodrome movement area.**

Particulars of the procedures that have been developed and are to be followed in coordination with the agency responsible for preventing unlawful interference in civil aviation at the aerodrome and for preventing unauthorized entry of persons, vehicles, equipment, animals or other things into the movement area, including the following—

- (a) the role of the aerodrome operator, the aircraft operator, aerodrome fixed-base operator, the aerodrome security entity, the Authority and other government departments, as applicable;
- (b) the personnel responsible for controlling access to the aerodrome, and the telephone numbers for contacting them during and after working hours;
- (c) inspection checklist;
- (d) arrangements for reporting the results of inspections and for taking prompt follow-up actions to ensure correction of unsafe conditions; and

(e) the names and roles of persons responsible for carrying out inspections, and their telephone numbers during and after working hours.

4. Maintenance of the movement area.

Particulars of the facilities and procedures for the maintenance of the movement area, including—

- (a) arrangements for maintaining the unpaved runways and taxiways;
- (b) arrangements for maintaining the runway and taxiway strips; and
- (c) arrangements for the maintenance of aerodrome drainage.

5. Aerodrome works – safety.

Particulars of the procedures for planning and carrying out construction and maintenance work safely (including work that may have to be carried out at short notice) on or in the vicinity of the movement area which may extend above an obstacle limitation surface, including the following—

- (a) the names, telephone numbers and roles of the persons and organizations responsible for planning and carrying out the work, and arrangements for contacting those persons and organizations at all times;
- (b) a distribution list for work plans, if required.

6. Birds and Wildlife Hazard Management

7. Obstacle Control

Particulars setting out the procedures for—

- (a) monitoring the obstacle limitation surfaces and Type A Chart for obstacles in the take-off surface;
- (b) controlling obstacles within the authority of the operator;
- (c) monitoring the height of buildings or structures within the boundaries of the obstacle limitation surfaces;
- (d) controlling new developments in the vicinity of aerodromes; and
- (e) notifying the Authority of the nature and location of obstacles and subsequent addition or removal of obstacles for action as necessary, including amendment of the AIS publications.

8. Handling of Hazardous Materials

- (1) Particulars of the procedures for the safe handling and storage of hazardous materials on the aerodrome, including the following—
 - (a) arrangements for special areas of the aerodrome to be set up for the storage of inflammable liquids (including aviation fuels) and any other hazardous materials; and
 - (b) the method to be followed for the delivery storage, dispensing and handling of hazardous materials.
- (2) For the purposes of rule 15 (1) “hazardous materials” include inflammable liquids and solids, corrosive liquids, compressed gases and magnetized or radioactive materials.

9. Protection of Sites for Radar and Navigational Aids.

Particulars of the procedures for the protection of sites for radar and radio navigational aids located on the aerodrome to ensure that their performance will not be degraded, including the following—

- (a) arrangements for the control of activities in the vicinity of radar and navigational aids installations;
- (b) arrangements for ground maintenance in the vicinity of these installations; and
- (c) arrangements for the supply and installation of signs warning of hazardous microwave radiation.

Note 1. In writing the procedures for each category, clear and precise information should be included on—

- when, or in what circumstances, an operating procedure is to be activated;
- how an operating procedure is to be activated;
- actions to be taken;
- the equipment necessary for carrying out the actions, and access to such equipment.

Note 2. if any of the procedures specified above are not relevant or applicable, the reason should be given.

AERODROME DATA

1. Aerodrome geographical coordinates.

Geographical coordinates indicating latitude and longitude for ground positions at aerodromes shall be determined and reported in World Geodetic System – 1984 geodetic reference datum.

2. Aerodrome reference point.

(1) An aerodrome reference point shall be established for an aerodrome.

(2) The aerodrome reference point shall be located near the initial or planned geometric centre of the aerodrome and shall normally remain where first established.

(3) The position of the aerodrome reference point shall be measured and reported in degrees, minutes and seconds.

3. Aerodrome and runway elevations.

The aerodrome elevation and geoid undulation at the aerodrome shall be measured and reported in accordance with specifications prescribed in the Manual of Aerodrome Standards.

4. Aerodrome reference temperature.

(1) An aerodrome reference temperature shall be determined for an aerodrome in degrees Celsius.

(2) The aerodrome reference temperature should be the monthly mean of the daily maximum temperatures for the hottest month of the year (the hottest month being, that which has the highest monthly mean temperature). This temperature should be averaged over a period of years.

5. Aerodrome dimensions and related information.

(1) The following data shall be measured or described, as appropriate, for each facility provided on an aerodrome—

- (a) runway – true bearing to one-hundredth of a degree, designation number, length, width, displaced threshold location to the nearest metre, slope, surface type, type of runway and, for a precision approach runway category I, the existence of an obstacle free zone when provided;
- (b) strip, runway end safety area, stopway – length, width to the nearest metre, surface type;
- (c) taxiway – designation, width, surface type;
- (d) apron – surface type, aircraft stands;
- (e) the boundaries of the air traffic control service;
- (f) clearway – length to the nearest metre, ground profile;
- (g) visual aids for approach procedures, marking and lighting of runways, taxiways and aprons, other visual guidance and control aids on taxiways and aprons, including runway-holding positions and stop bars, and location and type of visual docking guidance systems;
- (h) location and radio frequency of any VOR aerodrome check-point;
- (i) location and designation of standard taxi-routes; and
- (j) distances to the nearest metre of localizer and glide path elements comprising an instrument landing system or azimuth and elevation antenna of microwave landing system in relation to the associated runway extremities.

(2) The geographical coordinates of each threshold, appropriate taxiway centre line points and each aircraft stand shall be measured and reported in degrees, minutes, seconds and hundredths of seconds.

(3) The geographical coordinates of significant obstacles in the approach and take-off areas, in the circling area and in the vicinity of an aerodrome shall be measured and reported in degrees, minutes, seconds and tenths of seconds, and in addition, the top elevation rounded up to the nearest metre, type, marking and lighting (if any) of the significant obstacles shall be reported.

(4) This regulation shall not apply to aerodromes in categories C and D unless otherwise specified by the Authority in the licence.

6. Strength of pavements.

The bearing strength of a pavement at an aerodrome shall be determined and reported using guidelines prescribed by the Authority in the Manual of Aerodrome Standards.

7. Pre-flight altimeter check location.

(1) One or more pre-flight altimeter check locations shall be established for the aerodrome.

(2) A pre-flight check location shall be located on an apron.

Note 1 – Locating a pre-flight altimeter location on an apron enables an altimeter check to be made prior to obtaining taxi clearance and eliminates the need for stopping for that purpose after leaving the apron.

Note 2 – Normally an entire apron can serve as a satisfactory altimeter check location.

(3) The elevation of a pre-flight altimeter check location shall be given as the average elevation, rounded to the nearest metre, of the area on which it is located. The elevation of any portion of a pre-flight altimeter check location shall be within 3m of the average elevation for that location.

8. Declared distances.

The following distances shall be calculated to the nearest metre for a runway intended for use by international commercial air transport—

- (a) take-off run available;
- (b) take-off distance available;
- (c) accelerate-stop distance available; and
- (d) landing distance available.

9. Condition of the movement area and related facilities.

(1) An operator shall provide information on the condition of the movement area and the operational status of related facilities in accordance with the requirements specified in the Manual of Aerodrome Standards including information of operational significance to the air traffic service units without delay.

(2) The condition of the movement area and the operational status of related facilities shall be monitored and reports on matters of operational significance or affecting aircraft performance given, particularly in respect of the following—

- (a) construction or maintenance work;
- (b) rough or broken surfaces on a runway, taxiway or an apron;
- (c) water on a runway, a taxiway or an apron;
- (d) other temporary hazards, including parked aircraft;
- (e) failure or irregular operation of part of all of the aerodrome visual aids; and
- (f) failure of the normal or secondary power supply.

(3) To facilitate compliance with rules (1) and (2), inspections of the movement area shall be carried out each day at least once where the aerodrome code number is 1 or 2 and at least twice where the aerodrome code number is 3 or 4.

(4) The presence of water on a runway including a description of the runway surface conditions and the water depth, where applicable, shall be reported using the following terms—

- (a) damp – the surface shows a change of colour due to moisture;
- (b) wet – the surface is soaked but there is no stagnant water;
- (c) water patches – significant patches of standing water are visible;
- (d) flooded – extensive standing water is visible.

Note – Guidance on determining and expressing the minimum friction level of a runway is provided in the Manual of Aerodrome Standards.

10. Disabled aircraft removal

(1) The telephone and fax number(s) of the officer of the aerodrome responsible for the coordination of operations for the removal of an aircraft disabled on or adjacent to the movement area shall be made available to aircraft operators.

(2) The operator shall provide information concerning the capability to remove an aircraft disabled on or adjacent to the movement area.

Note – The capability to remove a disabled aircraft may be expressed in terms of the largest type of aircraft which the aerodrome is equipped to remove.

11. Rescue and fire fighting.

(1) Information concerning the level of protection provided for aircraft rescue and fire fighting purposes shall be made available.

(2) The level of protection normally available at the aerodrome shall be expressed in terms of the category of the rescue and fire fighting services and in accordance with the types and amounts of extinguishing agents normally available at the aerodrome.

(3) An operator shall notified to the air traffic services unit and the Aeronautical Information Services significant changes in the level of protection normally available at an aerodrome for rescue and fire fighting to enable those units to provide the necessary information to arriving and departing aircraft and shall advise those units when such a change has been corrected.

Note – A significant change in the level of protection is considered to be a change in the category of the rescue and fire fighting service from the category normally available at the aerodrome, resulting from a change in availability of extinguishing agents, equipment to deliver the agents or personnel to operate the equipment, etc. A report of a significant change should include the new category of the rescue and fire fighting service available at the aerodrome.

12. Visual approach slope indicator systems.

An operator shall provide information concerning the status of the visual approach slope indicator system installed at the aerodrome including—

- (a) associated runway designation number;
- (b) type of system for an AT-VASIS, PAPI or APAPI installation, the side of the runway on which the lights are installed, i.e. left or right, shall be given;

- (c) where the axis of the system is not parallel to the runway centre line, the angle of displacement and the direction of displacement, i.e. left or right shall be indicated;
- (d) nominal approach slope angle(s). (For a T-VASIS or an ATVASIS this shall be angle α and for a PAPI and an APAPI this shall be angle $(B+C)/2$ and $(A+B)/2$, respectively); and
- (e) minimum edge height(s) over the threshold of the on-slope signal(s). For a T-VASIS or an AT-VASIS this shall be the lowest height at which only the wing bar(s) are visible; however, the additional heights at which the wing bar(s) plus one, two or three fly down light units come into view may also be reported if such information would be of benefit of aircraft using the approach. For a PAPI, this shall be the setting angle of the third unit from the runway minus 2° , i.e. angle B minus 2° , and for an APAPI this shall be the setting angle of the unit farther from the runway minus 2° , i.e. angle A minus 2° .

13. Coordination between the operator and the Aeronautical Information Services.

(1) To ensure that the Aeronautical Information Services obtain information to enable them to provide up-to-date pre-flight information and to meet the need for in-flight information, the operator shall establish arrangements with the Aeronautical Information Services to report, with a minimum of delay—

- (a) information on aerodrome conditions;
- (b) the operational status of associated facilities, services and navigation aids within their area of responsibility;
- (c) any other information considered to be of operational significance.

(2) Before introducing changes to the air navigation system, due account shall be taken by the operator of the time needed by the Aeronautical Information Services for the preparation, production and issue of relevant material for promulgation. To ensure timely provision of information to the Aeronautical Information Services, close coordination between those services concerned is therefore required.
